TCE	Trichloroethylene
VOC	Volatile Organic Compound

Executive Summary

On behalf of UniFirst Corporation (UniFirst) of Wilmington, Massachusetts, GEI Consultants, Inc. (GEI) prepared this Phase V Status Report No. 28 and Remedial Monitoring Report (RMR) No. 43 for the site located at 50 Tufts Street in Somerville, Massachusetts (the Site). The Site is identified by Massachusetts Department of Environmental Protection (MassDEP) Release Tracking Number (RTN) 3-23246. The Site includes the 50 Tufts Street property (the Property), other properties in the neighborhoods east and immediately north, south, and west of the Property, and the Michael E. Capuano Early Childhood Center (Capuano Center) located at 150 Glen Street in Somerville, Massachusetts. The Site has been in Phase V since 2011. This Phase V Status Report No. 27 covers the period from December 15, 2024, to June 15, 2025.

E.S.1. Background

From approximately 1955 to 2002, the Property was used for storage and distribution of industrial chemicals, laundry supplies, and dry-cleaning supplies. Chemicals stored at, and transported to and from the Property, included chlorinated volatile organic compounds (VOCs). These chlorinated VOCs – particularly tetrachloroethylene (also called perchloroethylene [PCE]), trichloroethylene (TCE), and 1,1,1-trichloroethane (TCA) – have been detected in soil, soil vapor, indoor air, and groundwater at the Property and are therefore the compounds of potential concern (COPCs) for the Site. In some buildings within the Site, chlorinated VOCs have been detected in indoor air samples.

The detection of chlorinated VOCs in indoor air at some buildings required the implementation of an Immediate Response Action (IRA). The “Immediate Response Action Plan” associated with RTN 3-23246 was submitted to MassDEP on January 9, 2006. The Site was classified as Tier IC (Permit No. W085813). The “Phase II Comprehensive Site Assessment (CSA), Method 3 Risk Characterization, and Phase III Remedial Action Plan (RAP)” (Phase II/III) for the Site was submitted to MassDEP on July 14, 2008. The “Phase IV Remedy Implementation Plan” (Phase IV RIP) was submitted to MassDEP on August 10, 2009. The “Immediate Response Action Completion Report and Remedial Monitoring Report No. 11” (IRAC Report) was submitted to MassDEP on November 13, 2009, and the “Immediate Response Action Completion Report Amendment” (IRAC Report Amendment) was submitted to MassDEP on April 1, 2011. The “Phase IV Final Inspection Report, Remedial Monitoring Report No. 15, and Phase V Remedy Operation Status Report” (Phase IV FIR/Phase V ROS) was submitted to MassDEP on August 4, 2011. The Site was reclassified as Tier II on August 1, 2014, and a Tier Classification Extension was submitted on May 9, 2025.

The remedial action alternative (RAA) selected by the Phase III evaluation included:

1. Installing Exposure Pathway Mitigation Measures (EPMs) to the extent feasible (e.g. vapor barriers and venting systems, or sub-slab depressurization systems [SSDs]), and recording Activity and Use Limitations (AULs) as appropriate, for residences where the soil vapor migration pathway to indoor air has been confirmed, and installing EPMs in occupied commercial buildings to reduce chlorinated VOC concentrations in indoor air to that which constitutes a condition of No Significant Risk (NSR).

2. Continuing to operate the soil vapor extraction (SVE) system at the Property to remove COPCs from the vadose zone.
3. Conducting a Site-wide Monitored Natural Attenuation (MNA) program to evaluate overburden and bedrock groundwater plume concentrations over time to assess the rate of natural attenuation processes, and to confirm that groundwater concentrations of chlorinated VOCs are generally stable or decreasing.

The Phase IV FIR/Phase V ROS documented that construction and implementation of the Comprehensive Response Action (CRA) has been completed; and additional activities, such as operation and monitoring of active remedial systems, will be conducted under Phase V.

In accordance with the MCP, particularly 310 CMR 40.0892, this Phase V Status Report No. 28 and RMR No. 43 includes the following information regarding the remedial actions being conducted at the Site:

- A description of the type and frequency of operation, maintenance, and/or monitoring (OMM) activities.
- A description of any significant modifications made to the OMM activities since the last reporting period.
- An evaluation of the performance of the remedial action during the reporting period, including whether the remedial action is achieving remedial goals specified in the Phase IV RIP as described in 310 CMR 40.0874(3), and a description of any conditions or problems identified through OMM activities during the reporting period that are, or may be, affecting the performance of the remedial action.
- A description of the measures taken to address any conditions or problems identified through OMM activities during the reporting period.
- The name, license number, signature, and seal of the LSP.

Following is a summary of OMM activities conducted at the Site to date:

E.S.2. Capuano Center

An SSDS is installed in the east wing of the Capuano Center. In addition, GEI sealed certain slab/wall joints at the Capuano Center to mitigate a potential preferred migration pathway. GEI conducted 24 rounds of indoor air sampling after the SSDS was installed in February 2007. The Critical Exposure Pathway (CEP) to indoor air has been eliminated and a condition of NSR has been achieved for occupants of the Capuano Center. Accordingly, it is GEI's opinion that the system was constructed and operates in accordance with the design standards provided in the Phase IV RIP and has achieved the remedial objectives.

The system currently includes three radon fans on dedicated discharge pipes for each collection header extending above the roofline. Remote telemetry sensors are installed on the system. GEI performed post-modification indoor air sampling on May 23 and 24, 2015. VOCs were not detected above laboratory reporting limits during the indoor air sampling, indicating that the system as modified continues to meet the remedial objectives.

GEI will continue to inspect and maintain the system and continue operation and monitoring.

E.S.3. Residential and Commercial Properties

As part of the IRA, while Site conditions were still under investigation, GEI took timely action to evaluate and implement measures to eliminate or mitigate CEPs to the extent feasible. The feasibility of such measures was determined by physical conditions, including the suitability of each property to install active or passive vapor controls, and by amenability of property owners to provide access. Mitigative measures were initially implemented as IRA activities. The Phase II/Phase III assessment and evaluation of RAAs included response actions to address CEPs as part of the recommended CRA. With the submittal of the Phase IV RIP, the IRA addressing CEPs was closed with an IRAC Report and an IRAC Report Amendment. In accordance with the MCP (310 CMR 40.0427), “mitigation of Critical Exposure Pathway(s) is continuing by incorporation of ongoing response actions to address the Critical Exposure Pathway(s) into the Phase IV Remedy Implementation Plan for the disposal site.” Following the submittal of the IRAC Report and IRAC Report Amendment, all further response actions have been conducted in accordance with the Phase IV RIP. Construction and implementation of the CRA has been completed. OMM activities, including operation of active remedial systems and active EPMMs (AEPMMs), continue to be conducted under Phase V or are being implemented as Partial Permanent Solutions Statements (PSSs) with Conditions. As construction and redevelopment occurs within the Disposal Site, GEI continues to evaluate the need for new or modified EPMMs, consistent with the CRA and Phase IV RIP, and implement those measures pursuant to Phase V.

The following is a summary of activities conducted and results obtained with respect to EPMMs through June 15, 2025:

- EPMMs have been installed or are being installed in 24 residential and commercial properties, not including the EPMMs installed at 50 Tufts Street, 60 Tufts Street, and the Capuano Center. Currently EPMMs are relied upon to meet the remedial objectives at 20 properties and are not being relied on at the following:
 - One EPMM (at 103 Washington Street) was abandoned when the building was vacated and then demolished as part of redevelopment. The redevelopment of the mixed-use building at 103 Washington Street did not include an EPMM (see below for additional information).
 - An EPMM was installed at 163 Glen Street when the former American Legion Post building was redeveloped as multi-family housing. It was demonstrated that the EPMM was not required based on sub-slab soil gas sampling results that were below residential sub-slab soil gas Screening Values (SSGSV).
 - The EPMM at 10 Morton Street was temporarily removed during building renovation activities. The construction of a new EPMM was completed during this reporting period.
 - An EPMM is in the process of being installed at 121 Washington Street, a mixed-use building with retail space on the ground floor and residences above, but it is not yet complete.

- The property at 103 Washington Street has been redeveloped as a mixed-use building with commercial space and open-air parking on the first floor and residential units above without an EPMM. As of February 2024, construction is complete, and the building is occupied. GEI has conducted indoor air and sub-slab soil vapor sampling in May 2023, July 2023, March 2024, December 2024, and February 2025. Based on the results of the sampling and a Method 3 Risk Characterization, GEI prepared a Partial Permanent Solution with No Conditions Statement that was submitted to MassDEP in June 2025.
- The property at 105 Washington Street has been redeveloped as a mixed-use building with commercial space and open-air parking on the first floor and residential units above. Construction activities were completed in June 2022, and the building is occupied. An EPMM was not installed. GEI has conducted indoor air and sub-slab soil vapor sampling in August 2021, March 2022, February 2023, May 2023, December 2024, and February 2025. Based on the results of the sampling, GEI will prepare a Partial Permanent Solution Statement for the Property.
- The property at 10 Morton Street is being renovated, which includes lowering the elevation of the basement floor and installing a replacement EPMM. The replacement EPMM provides for a sub-slab venting system and 20 mil vapor barrier. Post installation sub-slab soil vapor and indoor air testing will be conducted to evaluate whether the EPMM and an AUL are required to maintain a condition of NSR. The EPMM installation was completed when the riser pipe to the roof was reconnected in September 2024. Confirmatory sub-slab soil vapor samples were collected in October 2024 and March 2025.
- The property at 31 Tufts Street, formerly a paved parking lot, has been redeveloped with multi-family housing. The development is a three-story residential apartment building with surface parking and public open space. An EPMM was incorporated into the new construction pursuant to a RAM Plan submitted for this property in July 2022. GEI conducted indoor air and sub-slab soil vapor sampling at 31 Tufts Street in October 2023, January 2024, September 2024, and February 2025. GEI will continue coordinating with the owner of the property to continue performing the vapor intrusion evaluation at the property. Additional soil gas and indoor air sampling is planned for fall 2025.
- The property at 121 Washington Street is being redeveloped into a mixed-use building with commercial space on the ground floor and apartment units above, there is no parking associated with the development. A small commercial building formerly occupied the property and was demolished in 2020. As of June 2025, the building envelope is complete. An EPMM has been incorporated into the new construction, consistent with a RAM Plan submitted in February 2024. The EPMM was completed by December 2024 when the system riser piping had extended through the roof of the building.
- GEI conducted one EPMM inspection during this reporting period in February 2025. GEI will conduct annual EPMM inspections again in the fall of 2025. GEI was unable to access two of the residential properties (4 Morton Street and 95R Franklin Street) but will continue its attempts to obtain access for EPMM inspections at these properties during the next reporting period.
- ARCADIS U.S., Inc. (ARCADIS) prepared an Updated 2015 Method 3 Risk Characterization, which incorporated updated soil, groundwater, and indoor air data sets, and included updated MassDEP

toxicity information, particularly for PCE and TCE. Based on the Updated 2015 Method 3 Risk Characterization, the performance of individual EPMMs, and a review of indoor air sampling results for samples collected since the Updated 2015 Method 3 Risk Characterization, a condition of NSR exists for current and future building occupants at each property within the Site.

- A Permanent Solution with Conditions Statement will be submitted for each property with an active or passive EPMM, where the EPMM has achieved the remedial objectives, an AUL has been recorded for the property, and sufficient post-EPMM indoor air sampling has been conducted. The filing of a Partial PSS with Conditions for an individual property documents the achievement of regulatory closure under the MCP for that property. Therefore, the Phase V provisions will not apply to properties for which a Partial PSS with Conditions has been submitted.

E.S.4. 60 Tufts Street

An SSDS has been installed in the 17-unit condominium building at 60 Tufts Street. The SSDS monitoring data show that the sub-slab vacuum field generated by the SSDS provides sufficient coverage to be protective. Indoor air testing results indicate that a condition of NSR has been achieved for building occupants at 60 Tufts Street. Accordingly, it is GEI's opinion that the system was constructed and is operating in accordance with the design standards provided in the Phase IV RIP and has achieved the remedial objectives.

Remote telemetry was installed on the system on July 24, 2015. GEI will continue to inspect and maintain the system. GEI monitors parameters and sub-slab conditions for the system (e.g., flow rate, vacuum) at the headers on a quarterly basis. GEI will continue operation and monitoring of the SSDS at 60 Tufts Street.

Based on pre-EPMM indoor air testing at 60 Tufts Street, and changes to the toxicological characteristics for PCE, the AEPMM may not be required to maintain a condition of NSR. GEI has communicated with the owners and occupants of 60 Tufts Street, who are amenable to EPMM closure indoor air testing. In accordance with MassDEP's 2016 VI Guidance, GEI initiated a closure indoor air testing program at 60 Tufts Street. However, this testing was suspended during the COVID-19 pandemic. The unit GEI had been testing was sold and the condominium property management company changed, GEI has been in communication with the new property management company.

E.S.5. 50 Tufts Street Property

An SSDS and an SVE system have been installed at the Property. The SSDS monitoring data continue to show that the sub-slab vacuum field generated by the SSDS provides sufficient coverage to be protective. The building is currently occupied by several commercial tenants. Based on indoor air testing results collected since the combined system has been in operation, a condition of NSR has been achieved for the building at the Property for full-time commercial workers. Accordingly, it is GEI's opinion that the system was constructed and operates in accordance with the design standards provided in the Phase IV RIP and has achieved the remedial objectives. GEI will continue the operation and monitoring of the combined SSDS/SVE system at 50 Tufts Street.

Remote telemetry was installed on the 50 Tufts Street system on April 14, 2015. The telemetry system at 50 Tufts Street consists of a wireless remote monitoring hub that receives telemetry notification from the other AEPMMs throughout the Site. GEI monitors parameters and sub-slab conditions for the system (e.g., flow rate, vacuum, off-gas treatment efficiency) quarterly, and monitors for off-gas treatment efficiency monthly.

The combined SSDS/SVE system installed at the Property serves to protect indoor air quality and to remove source material from the vadose zone below and around the building. Monitoring data from both the SSDS and SVE components through June 15, 2025, show that approximately 9,507 lbs of VOCs have been removed from the vadose zone at the Property. GEI will continue operation and monitoring of the combined SSDS/SVE system at 50 Tufts Street.

E.S.6. Telemetry

The MCP requires that remote telemetry provide the owner and operator of the building and MassDEP notification upon failure of the system. Remote telemetry has been installed at each property with an AEPMM including the Capuano Center, except for 9 Knowlton Street. The owner of 9 Knowlton Street has been unresponsive to telemetry access request letters, telephone calls, and property visits. Therefore, it is currently infeasible to install telemetry at this property.

GEI evaluated the current telemetry system in consideration of the 2024 MCP amendments, effective March 1, 2024. The MCP amendments include a requirement for continual monitoring of system vacuum. However, GEI understands that properties where telemetry systems are already registered with MassDEP will be grandfathered in (310 CMR 40.1026[3][d][6]) and are not required to continually report system vacuum.

E.S.7. Tufts Street Reconstruction Project

The City of Somerville is reconstructing the Tufts Street sidewalks and roadway in the area of the Site, including planting trees and greenery. In March 2024, eight soil borings were conducted by the City's LSP to assess contamination in the project area. The findings, along with additional data, were submitted to MassDEP as part of a Utility-Related Abatement Measure (URAM) and a Contained-In Determination (CID) in May 2025. The CID identified low levels of PCE detected in one soil sample and requested soil in that area be reclassified for in-state landfill disposal. The URAM described the integration of soil and groundwater management into project design, soil management procedures and health and safety requirements for contractors.

E.S.8. GLX Project

The MBTA, through its contractor GLX Constructors (GLXC), has completed work to extend MBTA Green Line service to Union Square in Somerville and beyond to College Avenue in Medford. This Green Line Extension (GLX) Project included significant infrastructure improvements near the Site, including a new pump station, reconstruction of the bridge passing over Washington Street, new train tracks within the MBTA right-of-way (ROW), a new train station, and utility improvements.

Between 2019 and 2024, approximately 25,400 cubic yards of soil were excavated, managed, and disposed of off-site during construction. Construction dewatering and on-site groundwater treatment, which included the use of granular activated carbon, were conducted primarily along Washington Street between April 2019 and September 2020. Over the course of these operations, more than 8 million gallons of groundwater were pumped for treatment, with PCE concentrations in the influent ranging between 410 and 1,660 micrograms per liter. The dewatering effluent water was treated then discharged to the Millers River through a storm drain.

Though the GLX Project is now complete, GEI has determined that certain aspects of the project may have had a permanent effect on altering groundwater conditions at the Site, as further discussed in this report.

E.S.9. Monitored Natural Attenuation

MNA was selected as a part of the remedial strategy to reach a Permanent Solution for the Site, as documented in the Phase III Report submitted to MassDEP in 2008. GEI has implemented an MNA program to confirm on-going natural attenuation is occurring at the Site. GEI is currently conducting a significant update of the MNA evaluation which will be provided under separate cover and in future Status Reports.

E.S.10. Notice of Audit Finding/Notice of Non-Compliance

On December 12, 2024, MassDEP issued to UniFirst a Notice of Audit Finding, Notice of Noncompliance (NOAF/NON) and Termination of ROS. The Site had been in ROS since August 2014; however, MassDEP stated in the NOAF/NON that the requirements of 310 CMR 40.0893(2) were not being met and thus terminated ROS through the NOAF/NON. After clarification of the current regulatory status of the Site through subsequent meetings and discussions with MassDEP, UniFirst is continuing Phase V activities during the pendency of the NOAF/NON.

During a meeting among MassDEP, UniFirst, GEI, and their respective counsel on April 25, 2025, MassDEP clarified that the submissions called for in the section of the NOAF/NON titled “Actions to be Taken and Deadline for Taking Such Actions,” including the “revised” Phase II, Phase III, and Phase IV reports should take the form of supplements or addendums to the existing reports, rather than comprehensive revisions. Also at the April 25, 2025, meeting, MassDEP extended the time for submission of the Tier Classification Extension form to May 9, 2025. UniFirst submitted the Tier Extension form within the extended time period provided by MassDEP.

To support the Phase II CSA Addendum and the Conceptual Site Model update, as required by the NOAF/NON, GEI will install up to ten new groundwater monitoring wells across the site, targeting three main areas: the 50 Tufts Street source area, the neighborhood downgradient and north of Washington Street, and the area south of Washington Street. The installation is expected to take place in September 2025. Among the proposed wells, three deep bedrock wells at 50 Tufts Street and a combination of new and replacement wells in the downgradient neighborhood will be installed. One shallow bedrock well is planned for installation near Morton and Knowlton Streets, and another, along with an adjacent overburden well, is planned for installation on Franklin Street. Additionally, three wells will be installed along the southern side of Washington Street.

Following well installation, GEI will conduct comprehensive groundwater sampling in the fall of 2025 and into the winter of 2025/2026. Samples from 44 monitoring wells will be collected and analyzed for VOCs, with select samples further tested for MNA parameters.

As required by the NOAF/NON, GEI will seek access to conduct two rounds of indoor air testing at the following residences where passive EPMMs have been installed: 91 and 93 Franklin Street; 166-168 Glen Street, 17, 32 and 34 Knowlton Street; 4, 11, and 19-19A Morton Street. 91 and 93 Franklin is a single building. Indoor air testing was conducted in 7 of the 8 properties between February and April 2025; however, access was not granted by the owner of 4 Morton Street. A second round of indoor air testing will be conducted at the cooperating properties in the fall of 2025. GEI will continue to attempt to access the 4 Morton Street property.

As further directed in the NOAF/NON, GEI will attempt to obtain access at the seven properties identified in the NOAF/NON where the owners historically refused UniFirst's offer to install vapor mitigation systems. These seven properties include: 99 Franklin Street, 162-164 Glen Street, and 9, 11-13, 17, 19, and 25 Tufts Street. If access is granted, UniFirst intends to collect indoor air samples from these properties for further evaluation of present conditions.

E.S.11. Remedial Monitoring Report No. 43

Remedial Monitoring Report No. 43, documenting OMM activities of active remedial systems at the Site, is presented in the BWSC-108A and 108B Transmittal Forms in Appendix A.

1. Introduction

On behalf of UniFirst Corporation (UniFirst) of Wilmington, Massachusetts, GEI Consultants, Inc. (GEI) prepared this Phase V Status Report No. 28 and Remedial Monitoring Report (RMR) No. 43 for the site located at 50 Tufts Street in Somerville, Massachusetts (the Site; Fig. 1-1). The Site is identified by Massachusetts Department of Environmental Protection (MassDEP) Release Tracking Number (RTN) 3-23246. The Site includes the 50 Tufts Street property (the Property), other properties in the neighborhoods east and immediately north, south, and west of the Property, and the Michael E. Capuano Early Childhood Center (Capuano Center) located at 150 Glen Street in Somerville, Massachusetts (Fig. 1-2). The Site has been in Phase V since 2011. This Phase V Status Report No. 28 covers the period from December 16, 2024, to June 15, 2025.

On December 12, 2024, MassDEP issued a Notice of Audit Finding, Notice of Noncompliance (NOAF/NON) and Termination of Remedy Operation Status (ROS). The Site had been in ROS since August 2014; however, MassDEP stated in the NOAF/NON that the requirements of 310 CMR 40.0893(2) were not being met and thus terminated ROS. UniFirst is continuing Phase V activities, consistent with discussions with MassDEP following its issuance of the NOAF/NON.

The NOAF/NON also required revisions to the Massachusetts Contingency Plan (MCP; 310 CMR 40.0000) milestone reports in accordance with the following schedule:

- By February 12, 2025, submit a Tier Classification Extension in accordance with 310 CMR 40.0560(7).
- By April 14, 2026, submit an addendum to the Phase II Comprehensive Site Assessment Report in accordance with the requirements 310 CMR 40.0835 including an updated Conceptual Site Model, site boundary based on the nature and extent of contamination.
- By June 12, 2026, submit an addendum to the Phase III Remedial Action Plan in accordance with the 310 CMR 40.0850 considering technological advances made in the treatment of chlorinated volatile organic compounds (CVOs).
- By August 12, 2026, submit an addendum to the Phase IV Remedy Implementation Plan in accordance 310 CMR 40.0874.
- By December 14, 2026, in accordance with the provisions of 310 CMR 40.40.0893(6)(e), achieve a Permanent or Temporary Solution for the Site.

During a meeting among MassDEP, UniFirst, GEI, and their respective counsel on April 25, 2025, MassDEP clarified that the submissions called for in the section of the NOAF/NON titled “Actions to be Taken and Deadline for Taking Such Actions,” including the “revised” Phase II, Phase III, and Phase IV reports should take the form of supplements or addendums to the existing reports, rather than comprehensive revisions. Also at the April 25, 2025, meeting, MassDEP extended the time for submission of the Tier Classification Extension form to May 9, 2025. UniFirst submitted the Tier Extension form within the extended time period provided by MassDEP.

1.2. Background

In 2002, a release of chlorinated volatile organic compounds (VOCs) (particularly tetrachloroethylene [also known as perchloroethylene (PCE)], trichloroethylene [TCE], and 1,1,1-trichloroethane [TCA]) to soil and groundwater at the Property was reported to the MassDEP and assigned RTN 3-23246. Three other RTNs were subsequently issued for the Site: 3-24358, 3-24376, and 3-26114. For tracking and reporting purposes, these RTNs have been consolidated under RTN 3-23246.

The detection of chlorinated VOCs in indoor air at some buildings within the Site required the implementation of an Immediate Response Action (IRA). The “Immediate Response Action Plan” associated with RTN 3-23246 was submitted to MassDEP on January 9, 2006. The Site was classified as Tier IC (Permit No. W085813). The “Phase II Comprehensive Site Assessment (CSA), Method 3 Risk Characterization, and Phase III Remedial Action Plan (RAP)” (Phase II/III) for the Site was submitted to MassDEP on July 14, 2008. The “Phase IV Remedy Implementation Plan” (Phase IV RIP) was submitted to MassDEP on August 10, 2009. The “Immediate Response Action Completion Report and Remedial Monitoring Report No. 11” (IRAC Report) was submitted to MassDEP on November 13, 2009, and the “Immediate Response Action Completion Report Amendment” (IRAC Report Amendment) was submitted to MassDEP on April 1, 2011. The “Phase IV Final Inspection Report, Remedial Monitoring Report No. 15, and Phase V Remedy Operation Status Report,” (Phase IV FIR/Phase V ROS) was submitted to MassDEP on August 4, 2011. The Site was reclassified as Tier II on August 1, 2014, and a Tier Classification Extension was submitted on May 9, 2025, as required by the December 2024 NOAF/NON and a subsequent extension of the required submission date provided by MassDEP.

The Phase II/Phase III identified the following areas of the Site requiring investigation and mitigation:

- The Property.
- The Capuano Center.

- 60 Tufts Street, a 17-unit condominium building north of the Property.
- Certain residences and commercial buildings located near the Property.

The RAA selected in the Phase III was:

1. Installing Exposure Pathway Mitigation Measures (EPMs) to the extent feasible (e.g. vapor barrier and venting system, or sub-slab depressurization systems [SSDs]), and recording Activity and Use Limitations (AULs) as appropriate, for residences where the soil vapor migration pathway to indoor air has been confirmed, and installing EPMs in occupied commercial buildings to reduce chlorinated VOC concentrations in indoor air to that which constitutes a condition of No Significant Risk (NSR).
2. Continuing to operate the soil vapor extraction (SVE) system at the Property to remove compounds of potential concern (COPCs) from the vadose zone.
3. Conducting a Site-wide Monitored Natural Attenuation (MNA) program to evaluate overburden and bedrock groundwater plume concentrations over time to assess the rate of natural attenuation processes, and to confirm that groundwater concentrations of chlorinated VOCs are generally stable or decreasing.

As part of the IRA, while Site conditions were still under investigation, GEI took timely action to evaluate and implement measures to eliminate or mitigate Critical Exposure Pathways (CEPs) to the extent feasible. The feasibility of such measures was determined by physical conditions, including the suitability of each property to install an active or passive vapor controls, and by amenability of property owners to provide legal access. Mitigative measures were initially implemented as IRA activities. The Phase II/Phase III assessment and evaluation of RAAs included response actions to address CEPs as part of the recommended Comprehensive Response Action (CRA). With the submittal of the Phase IV RIP, the IRA addressing CEPs was closed with an IRAC Report and IRAC Report Amendment, in accordance with the MCP, particularly 310 CMR 40.0427 ("mitigation of Critical Exposure Pathway(s) is continuing by incorporation of ongoing response actions to address the Critical Exposure Pathway(s) into the Phase IV Remedy Implementation Plan for the disposal site"). Following submittal of the IRAC Report and IRAC Report Amendment, all further response actions were continued under Phase IV and Phase V.

The CRA for the Site includes continued active operation and maintenance of the existing commercial and residential EPMs, the SSDs at the Capuano Center, and the SSDs and SVE system at the Property, to achieve a Permanent Solution pursuant to 310 CMR 40.0890. As required by the NOAF/NON, GEI will provide supplements or addendums to the Phase III RAP and Phase IV RIP, which may augment the current CRA. Despite MassDEP's formal revocation of ROS through the NOAF/NON, it is GEI's opinion that the conditions at the Site continue to meet the requirements for ROS in accordance with the MCP (310 CMR 40.0893[2]) because:

- The Phase III RAP was completed on July 14, 2008. The Phase IV RIP was completed on August 10, 2009.
- A final inspection has been performed and confirmed that the CRA has been constructed and implemented in accordance with the Phase IV RIP and is meeting projected design standards to achieve a Permanent Solution.

- Each source of oil and/or hazardous material (OHM) is controlled at the Site. Non-aqueous phase liquid (NAPL) is not visibly present at the Site. Any dense non-aqueous phase liquid (DNAPL) that may be present is not migrating and exists in a stable configuration. The Phase III RAP demonstrated that it is not feasible to eliminate DNAPL at the Site. Although there has been an increase in groundwater concentrations in two wells in recent sampling events, which may be due to construction dewatering conducted by the Massachusetts Bay Transit Authority (MBTA) that shifted the geographic location of the plume within the Site, in general the dissolved-phase groundwater plumes and vapor plumes are stable and are not causing an increase in concentrations of VOCs in groundwater, soil, soil vapor, or indoor air across the Site. Natural attenuation processes are occurring and are continuing to balance contaminant levels. There are no unpermitted or uncontrolled releases of OHM at the Site.
- Any substantial hazards have been eliminated as documented in the Substantial Hazard Evaluation (SHE) completed by ARCADIS U.S., Inc. (ARCADIS) of Chelmsford, Massachusetts in August 2011. ARCADIS also completed a Site-wide Method 3 Risk Characterization in August 2015, and GEI routinely performs Method 3 risk screening for additional indoor air data collected since 2015. Based on these risk evaluations, and based on the performance of individual EPMMs, a condition of NSR exists for current and future building occupants at each property within the Site.
- GEI has identified the longest duration of a shutdown of each active EPMM (AEPMM) that would be consistent with levels of exposure that do not pose an Imminent Hazard (IH) and poses a condition of NSR.

Construction and implementation of the CRA identified in the Phase IV RIP have been completed; additional activities, such as operation and monitoring of active remedial systems, or installation of new EPMMs, are being conducted under Phase V. When appropriate, portions of the Site may be closed under Partial Permanent Solution Statements (PSSs), with or without Conditions. Operating the SSDS and SVE systems, together with MNA, will ultimately achieve a Permanent Solution for the Site.

GEI will continue to conduct annual operation, maintenance, and/or monitoring (OMM) activities for installed EPMMs where sufficient indoor air sampling has been conducted, and not repeat indoor air testing, to confirm continued system effectiveness. GEI also conducts groundwater sampling and analysis as part of the MNA program.

1.3. Purpose and Scope

The Site entered Phase V on August 4, 2011. In accordance with the MCP (310 CMR 40.0892), this Phase V Status Report No. 28 and RMR No. 43 includes the following information regarding the remedial actions being conducted at the Site:

- A description of the type and frequency of OMM activities.
- A description of any significant modifications made to the OMM activities since the last reporting period.
- An evaluation of the performance of the remedial action during the reporting period, including whether the remedial action is achieving remedial goals specified in the Phase IV RIP as

described in 310 CMR 40.0874(3), and a description of any conditions or problems noted during the reporting period that are or may be affecting the performance of the remedial action.

- A description of the measures taken to correct any conditions or problems that may have been encountered during the reporting period.
- The name, license number, signature, and seal of the LSP.

This report covers the period from December 15, 2024, through June 15, 2025. Details of the engineering concepts, design criteria, construction plans, and specifications were previously provided to MassDEP as part of the Phase IV RIP, IRA Status Reports, RMRs, and IRA Plan Modifications and are not revisited in this report.

1.4. Public Involvement (310 CMR 40.1400)

UniFirst and GEI conducted a series of community meetings to inform property owners, residents, and City of Somerville (the City) officials about the Site. GEI will provide copies of this Phase V Status Report No. 26 and RMR No. 41 to the local public document repository that was established for the Site at the Somerville Central Public Library. The Somerville Public Library has made documents available on the Internet Archive: (<https://archive.org/details/somervillepubliclibrary?tab=collection&query=GEI+Consultants&sort=-date>) .

This report was submitted through eDEP (Transaction No. 1910828) on August X, 2025. A draft copy of the eDEP Transmittal Form (BWSC-108) is provided in Appendix A.

Copies of property owner notification letters, including notice of sampling letters, chemical testing results letters, and other miscellaneous correspondence sent during the reporting period, are in Appendix B. A table summarizing in-person communication with residences is also in Appendix B.

2. GLX Project

2.1. Background

The Massachusetts Bay Transit Authority (MBTA), through its contractor GLX Constructors (GLXC), has completed the extension of MBTA Green Line service to Union Square in Somerville and beyond to College Avenue in Medford. The GLX Project included significant infrastructure improvements near and through the Site, including a new pump station, reconstruction of the bridge passing over Washington Street, new train tracks within the MBTA right-of-way (ROW), a new train station, and utility improvements. The MBTA, GLXC, and their contractors initiated three RTNs (3-35528, 3-34742, and 3-30620) related to construction activities undertaken at the Site. Chris McDermott of TRC Environmental of Lowell, Massachusetts, a subcontractor to GLXC, is the LSP of Record for GLXC.

2.2. Soil Management

The MBTA and GLXC constructed the GLX Project with a combination of a Utility-related Abatement Measure (URAM) and Release Abatement Measures (RAMs) between 2019 and 2024. Approximately 1,950 cubic yards were initially excavated and managed under a URAM for RTN 3-35528. Additional soil excavation and management was conducted under a RAM Plan for RTN 3-34742 submitted in July 2019.

TRC, on behalf of GLXC, filed nine RAM Status Reports between November 2019 and November 2023 and a RAM Completion Report in May 2024. Approximately 18,000 cubic yards of soil was disposed off-site. A summary of the volume of remediation waste disposed off-site during each Status Report reporting period is summarized in Table 2-1 along with the totals reported in the RAM Completion Report. The total cubic yard for each facility based on the summation from the Status Reports and reported in the RAM Completion likely do not agree based on the estimating the number of cubic yards per ton. This estimate is based on a uniform conversion of 1.7 tons per cubic yards which is likely variable.

In addition to the soil managed under RTNs 3-35528 and 3-34742, approximately 5,440 cubic yards of soil were excavated from within the Site boundary as part of GLX Project activities conducted under the Special Projects Designation (SPD) for RTN 3-30620.

2.3. Construction Dewatering

Construction dewatering, groundwater treatment and discharge activities were conducted as part of the RAM. Construction dewatering, generally in Washington Street, and groundwater treatment including with granular activated carbon management was conducted between April 2019 and September 2020. More than 8 million gallons of groundwater was pumped and the PCE concentration in the dewatering influent ranged 410 to 1,660 ug/L. The dewatering effluent was treated then discharged to the Millers River through a storm drain.

2.4. Right-of-Way Contained-in Determinations

TRC prepared sixteen Contained-In Determinations for soil generated near the Washington Street Pump Station and on the MBTA ROW. Soil included in the Contained-In Determination exhibited concentrations of PCE above the laboratory reporting limits but below the applicable MCP Method 1 S-1/GW-1 standard. A summary of the Contained-In Determinations is in Table 2-2.

2.5. Soil Characterization Data from MBTA ROW and Washington Street

Between May 2010 and September 2023, soil samples were collected by Kleinfelder of Cambridge, Massachusetts, on behalf of the MBTA, or TRC, on behalf of GLXC to characterize soil for off-site disposal within the MBTA right of way (ROW), including Washington Street. The date of sampling and the reference location where the sampling is documented is in Table 2-3. The ROW sample locations are on Fig. 2-2, and a summary of the soil analytical results are in Appendix C.

3. Current Conceptual Site Model and Disposal Site Boundary

As defined in the MCP, the Conceptual Site Model (CSM) is a “dynamic framework for assessing site characteristics and risk, identifying and addressing data gaps and managing uncertainty, eliminating or controlling contaminant sources, developing and conducting response action strategies, and evaluating whether those strategies have been effective in achieving desired endpoints.” (310 CMR 40.0006). GEI has developed and continued to update the CSM for the Site as appropriate based upon the investigation data documented in previous reports, including the Phase II Comprehensive Site Assessment, Immediate Response Action (IRA) Plan and Status Reports, the Phase IV Remedy Implementation Plan (RIP), and prior Phase V Remedy Operations (ROS) Status Reports. In 2014, in Phase V Status Report No. 6, GEI updated the CSM and Disposal Site Boundary to include groundwater data collected by the MBTA. In Phase V Status Report No. 17, GEI updated the CSM and Disposal Site Boundary to include a portion of the MBTA ROW near Cross Street where de minimis PCE concentrations were detected in soil samples collected for construction purposes.

The CSM will likely be updated following additional subsurface investigations including groundwater sampling as described in Section 4.4.

4. Subsurface Investigation

4.1. Groundwater Sampling

GEI conducted groundwater sampling at three monitoring wells (MW104R, MW301, and MW115R) in January 2025 to support additional site investigation. GEI installed MW301 in January 2025, as described in section 4.2.

GEI also conducted semi-annual groundwater sampling at 34 monitoring wells in March and April 2025. This included the 18 monitoring wells historically sampled annually in the spring, the 13 additional monitoring wells included in the April 2024 sampling event (described in Phase V Status Report No. 26), and 3 additional wells added for this year's sampling event (MW111R, MW115R, and MW301). Five monitoring wells were sampled earlier in March 2025 (MW106, MW109, GEO-4, GEO-5, and GEO-6) due to the City of Somerville's schedule for the planned reconstruction of Tufts Street. Monitoring well MW111R was sampled twice, once in March 2025 and again in April 2025.

The groundwater samples collected during this period were analyzed by Alpha Analytical, Inc. a Pace Laboratory (Alpha-Pace) of Westborough, Massachusetts for VOCs. A summary of all GEI groundwater sampling activities at the Site, including dates of sampling during this reporting period, is in Table 4-1. The groundwater testing results are summarized in Table 4-2, along with groundwater data from previous investigations. GEI measured groundwater levels at monitoring wells shown in Table 4-3. Groundwater sampling conducted on behalf of the MBTA between 2012 and 2014 by Kleinfelder, and in 2020 by TRC, as part of the GLX Project is summarized in Table 4-4.

Monitoring well locations and the monitoring wells sampled by GEI during this reporting period are shown in Fig. 4-1. The laboratory data reports associated with the January, March, and April 2025 groundwater testing are in Appendix D.

4.1.1. *MW104R Groundwater Results Interpretation*

GEI installed replacement well MW104R in May 2022. The location of MW104R was adjusted slightly south and is located adjacent to the MBTA underdrain vault. Groundwater monitoring well MW104R was intended to be a replacement well for MW104 which was destroyed by the MBTA during its GLX project. MBTA excavation activities affected installation of the replacement well because the southern portion of the 50 Tufts Street property was heavily re-worked as part of construction. The screen for MW104R is approximately 2 feet deeper than MW104 and is also approximately 25 feet south of MW104.

During the April 2024 groundwater sampling event, concentrations of PCE in MW104R (2,200 µg/L), were substantially greater than observed in the destroyed MW104 (less than 20 µg/L since 2009) which was last sampled in 2018. GEI sampled MW104R twice during the previous reporting period, in September and November 2024, where concentrations of PCE were detected at 510 µg/L and 620 µg/L, respectively. GEI sampled MW104R twice during this reporting period, in January and April 2025, where concentrations of PCE were detected at 690 µg/L and 1,700 µg/L, respectively. The concentrations in MW104R are higher than in MW104 and do not likely represent the same data set because:

- The groundwater samples are collected from a deeper interval.
- The location of MW104R is further south than former MW104.
- MBTA construction activities, including dewatering between 2019 and 2020, have likely permanently relocated the plume center of mass southward.

4.2. Boring and Monitoring Well Installation

On January 3, 2025, GEI observed Northern Drill Service, Inc. of Northborough, Massachusetts (Northern) install one soil boring completed as a monitoring well (MW301). The location was first precleared to 5 feet via air knife. MW301 is located within the fire lane adjacent to (north of) the Capuano Center, just off Franklin Street. The boring was installed as a new monitoring well to support additional site investigation. The boring was installed using direct push drilling techniques.

Soil samples collected from the boring were continuously logged (lithology and physical observations) in accordance with the USCS guidelines. Field screening for VOCs in the jar headspace for soil samples was performed with a PID equipped with a 10.6 eV lamp. PID field screening results are summarized on the boring log in Appendix E. Jar headspace screening results were all 0.0 ppm.

The boring was advanced to a depth of 15 feet. Monitoring well MW301 was installed with a well screen interval from 5 to 15 feet. The monitoring well was constructed of 2-inch diameter PVC. The monitoring well installation log is in Appendix E.

4.3. Hydraulic Flow Data Loggers

GEI installed vented Level TROLL 500 Data Loggers in MW104R on December 27, 2023, and MW203R and SH-MW2R on April 12, 2024. GEI installed well MW104R in May 2022. The data loggers were installed to evaluate long term groundwater flow trends in this portion of the Site, which was heavily influenced by the GLX construction. GEI has downloaded the data approximately every four weeks and will continue to monitor groundwater elevations monthly. Between April 21 and May 7, 2024, the transducer in MW203R was above the height of the groundwater table; when GEI collected data on May 7, the transducer was lowered in the well. Between August 1 and 4, 2024, the transducer in MW203R was above the height of the groundwater table; however, it could not be lowered further into the well. Hydrographs for the three monitoring wells are included in Appendix F.

4.4. Further Phase V Activities

4.4.1. Installation of Groundwater Monitoring Wells

To revise the Phase II CSA and the CSM as required by the NOAF/NON, GEI will install up to 10 groundwater monitoring wells at the Site. The proposed borings are in three areas: the 50 Tufts Street source area, the downgradient neighborhood and north of Washington Street, and south of Washington Street as shown on Fig. 4-2. We expect to install the wells in September 2025.

We are proposing installing three deep bedrock monitoring wells (MW401, MW402, and MW403) at the 50 Tufts Street property.

We are proposing to install three new monitoring wells and one replacement monitoring well within the neighborhood downgradient of the 50 Tufts Street property. Monitoring well GEO-3 was formerly located at the vacant lot, now known as 31 Tufts Street, and was destroyed as part of the redevelopment. The monitoring well GEO-3R will be screened from approximately 5 to 20 feet, similar to the original well. One shallow bedrock monitoring well (MW404) is proposed to be installed near the intersection of Morton Street and Knowlton Street and one shallow bedrock monitoring well (MW405D) is proposed to be installed on Franklin Street. We anticipate that approximately 10 feet of bedrock will be cored for the wells to be screened within the bedrock. An overburden well (MW405S) will be installed next to MW405D without soil sampling.

Three monitoring wells (MW406, MW407, and MW408) are proposed along the southern side of Washington Street.

4.4.2. Groundwater Sampling

Following installation and development of the new monitoring wells, GEI will conduct site wide groundwater sampling in the fall of 2025 and the winter of 2025/2026. We will collect groundwater samples from 44 monitoring wells, and each will be sampled for VOCs. Groundwater and QA/QC samples will be submitted to Alpha-Pace chemical testing of VOCs. Select groundwater samples will also be submitted for chemical testing of monitored natural attenuation (MNA) parameters.

5. Indoor Air and Soil Vapor Sampling

5.1. Soil Vapor Sampling

From January 2006 through June 15, 2025, GEI collected soil vapor samples at 58 residences and commercial buildings. Fig. 5-1 shows buildings where GEI conducted soil vapor sampling. The procedure for collecting soil vapor samples was in IRA Status Report No. 3. Samples typically were collected from below the basement slab.

During this reporting period, GEI collected sub-slab samples from the properties listed in the table below:

Property	Date Sampled	Table	Purpose
97 Franklin Street	February 19, 2025	5-1	Site Investigation
156 Glen Street	February 19, 2025	5-2	Property Owner Request
10 Morton Street	March 18, 2025	5-3	RAM Objective
21 Morton Street	February 19, 2025	5-4	Property Owner Request
31 Tufts Street	February 19, 2025	5-5	Closure
103 Washington Street	February 11, 2025	5-6	Closure
105 Washington Street	February 11, 2025	5-7	Closure

The sub-slab soil vapor samples were submitted to Alpha-Pace for laboratory analysis by EPA Method TO-15 with the following modified list of analytes:

- 1,1-Dichloroethane
- 1,1-Dichloroethylene (1,1-DCE)
- trans-1,2-Dichloroethylene
- cis-1,2-Dichloroethylene
- 1,1,1-Trichloroethane (TCA)
- 1,1,2,2-Tetrachloroethane
- 1,1,2-Trichloroethane
- Tetrachloroethylene (PCE)
- Trichloroethylene (TCE)
- Vinyl Chloride

The soil vapor sampling results are summarized on Table 5-1 through 5-7 and the laboratory data reports are in Appendix D.

5.1.1. Soil Vapor Sampling – Checklists and Methods

Sub-slab soil vapor samples were collected to evaluate the concentrations of chlorinated VOCs in soil vapor beneath the buildings. GEI collected soil vapor samples using SUMMA® canisters and regulators provided by Alpha-Pace. Each canister was certified clean by the laboratory. Copies of the certifications are in Appendix D. The soil vapor samples were collected over a 1-hour period.

Flow regulators were attached to the SUMMA® canisters at the location of the testing. The laboratory-set flow regulator was then turned on, and the starting pressure and time recorded. The regulator was turned off before reaching ambient pressure, and the final pressure and time were recorded. Sub-Slab Monitoring

Point Installation Logs, Pre-Sampling Checklists, and Sub-Slab Sampling Checklists completed for the sub-slab soil vapor samples collected during this reporting period are in Appendix G.

5.1.2. Soil Vapor Sampling – Results

5.1.2.1. 97 Franklin Street

On February 19, 2025, two soil vapor samples from previously installed sub-slab monitoring points were collected from beneath the building slab. Concentrations of PCE and TCE were detected above laboratory reporting limits. Concentrations of chlorinated CVOCs in soil vapor are below the applicable residential sub-slab soil gas Screening Values (SSGSV).

5.1.2.2. 10 Morton Street

On March 18, 2025, two soil vapor samples from previously installed sub-slab monitoring points were collected from beneath the building slab. Concentrations of PCE and trans-1,2-dichloroethylene (trans-1,2-DCE) were detected above laboratory reporting limits but below applicable residential SSGSV.

5.1.2.3. 21 Morton Street and 156 Glen Street

21 Morton Street and 156 Glen Street is a single building. On February 19, 2025, GEI installed two soil vapor sampling points and collected two soil vapor samples from the portion of the basement at 21 Morton Street and installed one soil vapor sampling point and collected one soil vapor sample from the portion of the basement at 156 Glen Street. Concentrations of PCE and TCA were detected above laboratory reporting limits in all the samples but below applicable residential SSGSV.

5.1.2.4. 31 Tufts Street

On February 19, 2025, two soil vapor samples from previously installed sub-slab monitoring points were collected from beneath the building slab. One week prior to collecting the soil vapor samples the venting system was closed to simulate conditions in the absence of passive venting. Concentrations of PCE, TCE, and TCA were detected above laboratory reporting limits but below applicable residential SSGSV.

5.1.2.5. 103 Washington Street

On February 11, 2025, two soil vapor samples from previously installed sub-slab monitoring points were collected from beneath the building slab. Concentrations of PCE, TCE, trans-1,2-DCE, and cis-1,2-dichloroethylene (cis-1,2-DCE) were detected above laboratory reporting limits in at least one sample but below applicable commercial SSGSV and residential SSGSV.

5.1.2.6. 105 Washington Street

On February 11, 2025, one soil vapor sample from the previously installed sub-slab monitoring point was collected from beneath the building slab. Concentrations of PCE, and trans-1,2-DCE were detected above laboratory reporting limits in at least one sample but below applicable commercial SSGSV and residential SSGSV.

5.2. Indoor Air Sampling

From January 2006 through June 15, 2025, GEI collected indoor air samples at 76 residences and commercial buildings. Fig. 5-1 shows buildings where GEI conducted indoor air sampling. The procedure for collecting indoor air samples was included in IRA Status Report No. 3. Samples are typically collected from the basement and first floor of each building.

In the NOAF/NON, MassDEP requested indoor air sampling at 9 properties where EPMMs have been installed (91 and 93 Franklin Street; 166-168 Glen Street, 17, 32 and 34 Knowlton Street; 4, 11, and 19-19A Morton Street). This list actually identifies 8 properties because 91 and 93 Franklin are a single building. During the reporting period we gained access to 7 of the 8 properties, but we could not access 4 Morton Street.

During this reporting period, GEI collected indoor air samples from the properties listed in the table below:

Property	Date Sampled	Table	EPMM	Purpose	Requested by MassDEP
84 Franklin Street	May 7, 2025	5-8	No system	Site Investigation	--
91-93 Franklin Street	February 28, 2025	5-9	Passive	EPMM Effectiveness	yes
97 Franklin Street	February 19, 2025	5-10	No System	Site Investigation	--
156 Glen Street	February 19, 2025	5-11	No system	Property Owner Request	--
166-168 Glen Street	February 21, 2025	5-12	Passive	EPMM Effectiveness	yes
17 Knowlton Street	March 6, 2025	5-13	Passive	EPMM Effectiveness	yes
32 Knowlton Street	February 28, 2025	5-14	Passive	EPMM Effectiveness	yes
34 Knowlton Street	February 25, 2025 and April 9, 2025	5-15	Passive	EPMM Effectiveness	yes
10 Morton Street	March 18, 2025	5-16	Passive	RAM Objective	--
11 Morton Street	April 8, 2025 and May 7, 2025	5-17	Passive	EPMM Effectiveness	yes
19-19A Morton Street	February 27, 2025	5-18	Passive	EPMM Effectiveness	yes
21 Morton Street	February 19, 2025	5-19	No system	Property Owner Request	--
31 Tufts Street	February 19, 2025	5-20	Passive	Closure	--
103 Washington Street	February 11 and 21, 2025	5-21	No system	Closure	--
105 Washington Street	February 11, 2025	5-22	No system	Closure	--

The indoor air samples were submitted to Alpha-Pace for laboratory analysis by EPA Method TO-15 with the following modified list of analytes:

- 1,1-Dichloroethane
- 1,1-Dichloroethylene (1,1-DCE)
- trans-1,2-Dichloroethylene
- cis-1,2-Dichloroethylene
- 1,1,1-Trichloroethane (TCA)
- 1,1,2,2-Tetrachloroethane
- 1,1,2-Trichloroethane
- Tetrachloroethylene (PCE)
- Trichloroethylene (TCE)
- Vinyl Chloride

The indoor air sampling results are summarized on Table 5-8 through 5-22 and the laboratory data reports are in Appendix D.

5.2.1. Indoor Air Sampling – Checklists and Methods

The indoor air samples were collected to evaluate if there was likely a complete vapor intrusion pathway in the buildings' occupied space. The samples were collected using SUMMA® canisters and regulators provided by Alpha-Pace. Each canister was certified clean by the laboratory. Copies of the certifications are in Appendix D. The indoor air samples were collected over an approximately 24-hour period.

Flow regulators were attached to the SUMMA® canisters at the location of the testing. The SUMMA® canisters were placed so that the air inlet was approximately 3 to 5 feet above the floor. The laboratory-set flow regulator was then turned on, and the starting pressure and time were recorded. The regulator was turned off before reaching ambient pressure, and the final pressure and time were recorded. Pre-Sampling Checklists and Indoor Air Sampling Checklists completed for each indoor air sample collected during this reporting period are in Appendix G.

5.2.2. Indoor Air Sampling – Results

5.2.2.1. 84 Franklin Street

On May 7, 2025, one indoor air sample was collected from each of the basement, the first floor, and the second floor. PCE was detected above laboratory reporting limits in all three samples. Additionally, trans-1,2-DCE was detected above laboratory reporting limits in the samples collected in the basement and on the first floor. Concentrations of chlorinated VOCs are below the residential Threshold Values (TVr).

5.2.2.2. 91-93 Franklin Street

On February 28, 2025, one indoor air sample was collected in the basement and two samples were collected on the first floor, one in each of the units (91 Franklin Street and 93 Franklin Street). PCE was detected above laboratory reporting limits in all three samples but below TVr.

5.2.2.3. 97 Franklin Street

On February 19, 2025, one indoor air sample was collected from each of the basement, the first floor, and the second floor. PCE and TCE were detected above laboratory reporting limits in all three samples. Additionally, TCA and 1,1-dichloroethane were detected above laboratory reporting limits in the

basement sample. In the basement sample, the concentration of TCE was $1.10 \mu\text{g}/\text{m}^3$, which is greater than the TVr. However, the basement is not living or working space. Concentrations of TCE on the first and second floor, along with other chlorinated VOCs detected, were below the TVr.

5.2.2.4. 166-168 Glen Street

On February 21, 2025, one indoor air sample was collected from each of the basement and first floor. PCE was detected above laboratory reporting limits in both samples. Additionally, trans-1,2-DCE was detected above laboratory reporting limits in the basement sample. Concentrations of chlorinated VOCs were less than TVr.

5.2.2.5. 17 Knowlton Street

On March 6, 2025, one indoor air sample was collected from each of the basement and first floor. PCE was detected above laboratory reporting limits in both samples but below TVr.

5.2.2.6. 32 Knowlton Street

On February 28, 2025, one indoor air sample was collected from each of the basement and the first floor. PCE was detected above laboratory reporting limits in both samples but below TVr.

5.2.2.7. 34 Knowlton Street

On February 25, 2025, one indoor air sample was collected from each of the basement and the first floor. During sampling, the regulator used to collect the sample from the first floor malfunctioned, and the sample was not able to be analyzed by the laboratory. We returned on April 9, 2025, and collected one indoor air sample on the first floor. PCE was detected above laboratory reporting limits in the first-floor sample. Additionally, trans-1,2-DCE was detected above laboratory reporting limits in both samples. Concentrations of chlorinated VOCs were below TVr.

5.2.2.8. 10 Morton Street

On March 18, 2025, one indoor air sample was collected from each of the basement and the first floor. PCE was detected above laboratory reporting limits in the first-floor sample but below TVr.

Trans-1,2-DCE was detected above laboratory reporting limits in first floor and basement samples at concentrations of $159 \mu\text{g}/\text{m}^3$ and $25.3 \mu\text{g}/\text{m}^3$, respectively. The concentrations of trans 1,2 DCE in both the first floor and basement samples are greater than the applicable TVr. It is likely that the trans-1,2-DCE is not associated with the disposal site and is attributed with the polyurethane spray foam used during home renovation which is discussed further in 10 Morton Street RAM Status Report No. 4 submitted in May 2025 to MassDEP.

5.2.2.9. 11 Morton Street

On April 8, 2025, one indoor air sample was collected from each of the basement and the first floor. During sampling, the regulator used to collect the sample in the basement malfunctioned, and the sample was not able to be analyzed by the laboratory. GEI returned on May 7 to recollect both the first

floor and basement indoor air samples. PCE was detected above laboratory reporting limits in both the first floor and basement samples during the May 2025 sampling, but it was not detected in the first-floor sample during the April 2025 sampling. The concentrations of PCE detected were below TVr.

TCE was detected at a concentration of $0.269 \mu\text{g}/\text{m}^3$ in the basement during the May 2025 sampling which is below the TVr. TCE was detected on the first floor in both the April and May 2025 sampling events at concentrations of $1.05 \mu\text{g}/\text{m}^3$ and $2.77 \mu\text{g}/\text{m}^3$, respectively, which are above the TVr but at concentrations that pose NSR based on the MCP Shortform. One of the residents of this property is an artist, and there are significant amounts of art supplies in the home that could be contributing to these results. Soil vapor samples were not collected at the time of indoor air sampling.

GEI is further investigating the potential source of the TCE on the first floor since it is significantly higher than the concentration of TCE detected in the basement and at other properties within the disposal Site. Though the concentrations of TCE identified on the first floor of this unit do not appear to be Site-related, GEI has nevertheless arranged for an air purifying unit to be installed on the first floor of 11 Morton Street out of an abundance of caution. We installed two sub-slab soil vapor monitoring points on July 16, 2025, and collected sub-slab soil vapor samples. We also collected indoor air samples, prior to deploying the APU, from the basement and first floors. The results of the sampling will be included in the next status report.

5.2.2.10. 19-19A Morton Street

On February 27, 2025, one indoor air sample was collected from each of the basement and the first floor. PCE was detected above laboratory reporting limits in both samples but below TVr.

5.2.2.11. 21 Morton Street and 156 Glen Street

On February 19, 2025, one indoor air sample was collected from each of the basement and the first floor of both the 21 Morton and 156 Glen Street portions of the residence (a total of four samples). Concentrations of chlorinated VOCs were not detected above laboratory reporting limits in any of the samples.

5.2.2.12 31 Tufts Street

On February 19, 2025, five indoor air samples were collected on the first floor in each of the four units and in the utility room. One week prior to collecting the soil vapor samples the venting system was closed to simulate conditions in the absence of passive venting. PCE was detected above laboratory reporting limits in samples IA-2 (Unit 101) and IA-3 (utility room). Trans-1,2-DCE was detected above laboratory reporting limits in sample IA-1 (Unit 104). Concentrations of chlorinated VOCs were below TVr.

5.2.2.12. 103 Washington Street

On February 11, 2025, one indoor air sample was collected from each of the basement, the first floor, Unit 1 on the second floor and the second-floor hallway for a total of four samples. On February 21, 2025, one indoor air sample was collected again on the first floor because the regulator used to collect the sample from the first floor on February 11 malfunctioned, and the sample was not able to be

analyzed by the laboratory. PCE was detected above laboratory reporting limits in samples from the basement, Unit 1 on the second floor, and in the sample from the second-floor hallway, but concentrations at each location were below the TVr.

5.2.2.13. 105 Washington Street

On February 11, 2025, two indoor air samples were collected in the basement, one sample was collected in the first-floor commercial space, and one sample was collected from the hallway on the second floor. PCE was detected above laboratory reporting limits in all four samples. Trans-1,2-DCE was also detected above laboratory reporting limits in the first-floor sample. Concentrations of all chlorinated VOCs detected were below the TVr.

5.3. Meteorological Conditions

Measurements were taken with a portable barometer and thermometer during soil vapor sampling at and were recorded on the Indoor Air and Sub-Slab Sampling Checklists (Appendix G). Meteorological conditions recorded during indoor air sampling events for this reporting period are summarized in Table 5-23

6. Capuano Center

6.1. Background

The mitigation system at the Capuano Center is an SSDS with 18 sub-slab extraction points in six classrooms of the east wing. The interior slab/exterior wall joints of the six classrooms were sealed with a flexible epoxy sealant and extraction points were installed horizontally through the exterior wall. GEI began operating the SSDS on February 1, 2007.

The system sub-slab vapor extraction points are attached to three collection headers in exterior underground trenches, which are connected to three dedicated discharge pipes with radon fans for each collection header above the roofline of the Capuano Center. Remote telemetry on the system consists of two radio nodes and three pressure switches connected to the three radon fans to send notification of a system shut down remotely to the wireless remote monitoring hub located at the Property.

The system does not include off-gas treatment. Based upon the measured flow rate and VOC concentrations, the annual discharge rate of VOCs from the system has been significantly less than 100 lbs per year; therefore, off-gas treatment is not required per MassDEP Policy No. WSC-94-150: "Off-gas Treatment of Point-Source Remedial Air Emissions," dated 1994.

6.2. Remedial Objectives

The design objectives of the Capuano Center mitigation system were to:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor migration pathway to indoor air.
- Achieve a condition of NSR for occupants of the Capuano Center.

The SSDS monitoring data show that the sub-slab vacuum field generated by the SSDS influences the southern portion of the east wing. In conjunction with the physical sealing of the slab/wall joint, this indicates the soil vapor migration pathway to indoor air is controlled by the system.

6.3. Inspection and Monitoring

The system has been monitored in accordance with the requirements and schedule in the Phase IV RIP, and in accordance with the requirements and schedule presented in subsequent Phase IV Status Reports, and the Phase IV FIR/Phase V ROS.

Monitoring of the system was historically performed monthly; however, once telemetry was installed on the system, GEI began performing quarterly monitoring in July 2015. Monitoring of system parameters at the headers (flow rate, vacuum, and photoionization detector [PID] readings) and PID readings at outdoor monitoring points are conducted quarterly. Inspection and monitoring at the Capuano Center were performed twice from December 2024 to June 2025. A summary of monitoring activities conducted during this reporting period is in Table 6-1 and the Field Monitoring Forms are in Appendix H.

6.4. System Modifications

On January 3, 2025, GEI replaced and adjusted the pressure switches at the fans installed due to inconsistent readings from the telemetry system. On February 21, 2025, we replaced the battery in the radio node.

6.5. Performance Efficiency and Effectiveness

GEI has completed 24 rounds of indoor air sampling in the Capuano Center. The results of each round of sampling show that the system is meeting remedial design objectives (Table 6-2). Based on the indoor air testing results, and regularly collected system performance data, the soil vapor migration pathway to indoor air has been eliminated and a condition of NSR has been achieved for occupants of the Capuano Center. GEI has discontinued indoor air sampling and relies on monitoring of operating parameters for the system to confirm continued effectiveness.

6.6. Management of Waste Materials

No waste materials were managed at the Capuano Center during this reporting period.

6.7. Future Phase V Activities

Based on indoor air testing results, a condition of NSR has been achieved for occupants of the Capuano Center and the system is achieving the remedial design objectives. Since remote telemetry is now installed on the system, GEI will continue to monitor operational parameters and sub-slab conditions for the system (e.g., flow rate, vacuum), and collect readings from all outdoor monitoring points quarterly, to confirm ongoing system performance. GEI discontinued monitoring at interior monitoring points in April 2016 and instead relies on vacuum monitoring at exterior monitoring points to evaluate system effectiveness. During monitoring events, GEI will also perform maintenance tasks, which may include draining accumulated water from the collection headers and correcting any issues observed during routine inspection of system components.

6.7.1. Longest Allowable Duration of AEPMM Shutdown

An operating regime and OMM plan for the Capuano Center AEPMM were included in the Phase IV FIR/Phase V ROS submitted on August 4, 2011. In accordance with the MCP (310 CMR 40.1026[3][e]), and as presented in Status Report No. 7 and RMR No. 22, the longest duration of a shutdown that would be consistent with a level of exposure that does not pose an IH and that poses NSR is 6 years for the Capuano Center system.

6.7.2. Regulatory Closure

As discussed further in Section 7.7, a Permanent Solution with Conditions can be achieved for properties where an AEPMM has achieved the remedial objectives, an AUL has been recorded for the property, and telemetry is installed. A Partial Permanent Solution with Conditions Statement may be submitted to achieve regulatory closure for the Capuano Center if the owner of the property, the City of Somerville, executes an AUL.

7. Residential and Commercial Properties

7.1. 103 and 105 Washington Street

The properties at 103 and 105 Washington Street have been redeveloped into mixed-use commercial and residential buildings by the same entity without the installation of an EPMM and GEI has been evaluating the likelihood of a complete vapor intrusion pathway.

7.1.1. 103 Washington Street

The building at 103 Washington Street, formerly an automobile repair shop, was demolished around March 2019. The former AEPMM was deactivated in May 2017 when the building was vacated. 103 Washington Street has been redeveloped as a mixed-use development with commercial space and open-air parking on the first floor and residential units above. GEI reached out numerous times to the developer regarding installing a vapor mitigation system at 103 Washington Street. The developer did not agree to installation of a system, although they did consent to soil gas and indoor air testing. As of February 2024, construction was complete, and the building occupied. GEI has conducted indoor air and sub-slab soil vapor sampling in May 2023, July 2023, March 2024, December 2024, and February 2025. Based on the results of the sampling and a Method 3 Risk Characterization, GEI prepared and submitted to MassDEP a Partial Permanent Solution with No Conditions Statement in June 2025.

7.1.2. 105 Washington Street

The building at 105 Washington Street, formerly a multi-family house, was demolished between March and June 2019 and construction on the development began in July 2019. As of June 2022, construction was complete, and the building is occupied. 105 Washington Street is a mixed-use development with commercial space and open-air parking on the first floor and residential units above. GEI has conducted indoor air and sub-slab soil vapor sampling in August 2021, March 2022, February 2023, May 2023, December 2024, and February 2025. Based on the results of the sampling, GEI will prepare a Partial Permanent Solution Statement for the Property.

7.2. EPMM Status

Through June 15, 2025, EPMMs have been installed or are being installed at 24 residential and commercial properties. Currently EPMMs are relied upon to meet the remedial objectives at 20 properties and are not being relied on at the following:

- The EPMM at 103 Washington Street, as discussed in Section 7.1.1, was abandoned when the building was vacated and then demolished as part of redevelopment. The redevelopment of the mixed-use building at 103 Washington Street did not include an EPMM because the new owner declined offers to include one.
- An EPMM was installed at 163 Glen Street when the former American Legion Post building was redeveloped as multi-family housing. It was later demonstrated that the EPMM was not required based on sub-slab soil gas sampling results that were below residential SSGSV.

- The EPMM at 10 Morton Street was temporarily removed during building renovation activities. A new EPMM has since been installed, as discussed in Section 6.5.1.1.
- An EPMM is in the process of being installed at 121 Washington Street, a mixed-use building with retail space on the ground floor and residences above but is not yet complete, as discussed in Section 6.5.3.1.

Fig. 7-1 shows the buildings with EPMMs installed. Table 7-1 presents the as-built design information for each installed EPMM. EPMMs were also installed at 50 Tufts Street, 60 Tufts Street, and the Capuano Center. The EPMMs at 50 Tufts Street, 60 Tufts Street, and the Capuano Center are discussed separately in this report.

The EPMM designs are categorized as Option 1, Option 2, Option 3, or Option 4, as conceptually defined below:

- Option 1 – SSDS: This option includes the installation of one or more sub-slab vapor extraction points and a collection piping network connected to an electric fan located outside the building envelope. The fan is equipped with a condensate bypass drain and the fan exhaust is discharged above the eave line of the roof. To date, no SSDSs (except for the system at the Property) require off-gas treatment. This option is installed in buildings with adequate sub-slab air flow and a competent concrete slab, or those properties where vapor barrier and venting systems are infeasible.
- Option 2 – Vapor Trench: The vapor trench option is a sub-slab venting system installed in a shallow trench around the interior basement perimeter, cement stucco applied to the walls, and an epoxy vapor barrier applied to the slab and stucco walls. The trench is backfilled with crushed stone and finished with approximately three inches of new concrete to meet the existing slab surface. This option is installed in buildings with poor sub-slab air flow, a competent concrete slab, and a fieldstone and/or brick foundation. Sub-slab vapors are vented through a piping network that exits the building envelope at the sill elevation and terminates above the eave line of the roof.
- Option 3 – New Slab: The new slab installation option is a new concrete slab, a sub-slab vapor barrier, and a floor venting system; applying cement stucco to the walls; and applying an epoxy vapor barrier to the new slab and stucco walls. This option is installed in buildings with poor sub-slab air flow, an incompetent concrete slab, and a fieldstone and/or brick foundation. As with Option 2, sub-slab vapors are vented through a piping network that exits the building envelope at the sill elevation and terminates above the eave line of the roof.
- Option 4 – Passive Vapor Mitigation in New Construction: This option has been installed in new construction buildings. A sub-slab venting system installed in gravel with riser pipes through the roof, a sub-slab vapor barrier, and new concrete floor. This option can be converted to an active system.

The decision-making process for selecting a conceptual design based on Site-specific conditions is illustrated in Fig. 7-2. Table 7-1 identifies the design option for each EPMM currently installed and the primary engineering components of each.

7.2.1. Remedial Objectives

The design objectives of the EPMMs were to:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor migration pathway to indoor air in residential buildings.
- Achieve a condition of NSR for occupants of the residence or commercial building.

7.3. Option 1 EPMMs (SSDS)

Option 1 EPMMs consist of active sub-slab depressurization achieved by the installation of a radon fan and associated network of piping. Several of the Option 1 EPMMs were originally installed as Option 2 or Option 3 EPMMs; however, the concentrations of PCE measured in the post-installation indoor air did not constitute a condition of NSR, and a fan was installed. Option 1 EPMMs are installed at the following 10 properties:

- | | |
|-------------------------|----------------------|
| • 35-37 Knowlton Street | • 95 Franklin Street |
| • 31-33 Knowlton Street | • 9 Knowlton Street |
| • 13 Morton Street | • 13 Knowlton Street |
| • 18 Morton Street | • 27 Tufts Street |
| • 23 Tufts Street | |

Prior to the MCP amendments effective June 20, 2014, these properties could not achieve a Permanent Solution because of the operation of an active system. These properties can now achieve regulatory closure with a Partial PSS with Conditions, provided that the property owner executes an AUL. The condition associated with the PSS would be operation and maintenance of the AEPMM in accordance with the AUL.

7.3.1. Operation and Monitoring

To confirm the performance of an EPMM, indoor air samples are collected shortly after installation is complete. As identified in the Phase IV FIR/Phase V ROS for Option 1 EPMMs, following the initial post-installation indoor air sampling, indoor air samples were collected one time per winter for two consecutive years. In accordance with MassDEP guidance, “WSC No. 16-435: Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure,” dated October 14, 2016 (2016 VI Guidance), GEI modified the post-installation indoor air sampling for newly installed Option 1 EPMMs to demonstrate effectiveness. Once a pressure differential has been established, one round of indoor air sampling is performed during the heating season. The samples are analyzed for Site-specific chlorinated VOCs. Following one round of indoor air sampling, differential pressure across the slab will be used to demonstrate system effectiveness.

Inspection and monitoring also includes measuring VOCs at sub-slab sampling points with a PID, collecting pressure measurements using a manometer, and inspecting system components. If needed, repairs or modifications will be scheduled.

A summary of OMM activities performed for Option 1 EPMMs during this reporting period is in Table 7-2. During this reporting period GEI conducted one EPMM inspection at 27 Tufts Street. The EPMM Inspection Form is in Appendix I.

7.3.2. EPMM Shutdown

At the request of the property owners at 9 Knowlton Street and 13 Knowlton Street, GEI is evaluating if the operation of the Option 1 EPMMs are required to maintain a condition of NSR.

7.3.2.1. AEPMM Closure Testing at 9 Knowlton Street

On May 11, 2022, a shutdown valve was installed on the SSDS riser pipe at 9 Knowlton Street. To simulate conditions without operation of the AEPMM, the SSDS fan was turned off and the shutdown valve was closed, for six weeks, prior to collecting soil vapor and indoor air samples in June 2022. The SSDS fan was turned off and the shutdown valve was closed, for one week, prior to collecting additional rounds of soil vapor and indoor air samples in January and March 2023.

After the indoor air and soil vapor sampling was completed, the shutdown valve was opened, and GEI requested that the owner reactivate the fan. Based on the results of the Option 1 EPMM closure sampling, GEI will evaluate the need for an AEPMM to achieve a condition of NSR at 9 Knowlton Street based on a Method 3 Risk Characterization.

7.3.2.2. AEPMM Closure Testing at 13 Knowlton Street

On November 1, 2016, a shutdown valve was installed on the SSDS riser pipe at 13 Knowlton Street. To simulate conditions without operation of the AEPMM, the SSDS fan was turned off and the shutdown valve was closed, for one week, prior to collecting soil vapor and indoor air samples in December 2016, February 2018, March and November 2019, and January 2023.

After the indoor air and soil vapor sampling was completed, the shutdown valve was opened, and the fan was reactivated. Based on the results of the Option 1 EPMM closure sampling, GEI will evaluate the need for an AEPMM to achieve a condition of NSR at 9 Knowlton Street based on a Method 3 Risk Characterization.

7.3.3. Longest Allowable Duration of AEPMM Shutdown

An operating regime for residential AEPMMs was included in the Phase IV FIR/Phase V ROS submitted on August 4, 2011, which included an OMM plan for the systems. In accordance with the MCP (310 CMR 40.1026[3][f]), and as presented in Status Report No. 7 and RMR No. 22, the following exposure durations were calculated for Option 1 EPMMs where pre-EPMM indoor air data were available:

- 13 Knowlton Street: 54 years
- 23 Tufts Street: 11 years
- 27 Tufts Street: 25 years

- 31-33 Knowlton Street: 31 years
- 35-37 Knowlton Street: 4 years

Several Option 1 EPMMs were installed based on sub-slab soil vapor results, and pre-EPMM indoor air data are not available (including 13 Morton Street, 18 Morton Street, 95 Franklin Street, and 9 Knowlton Street). However, based on the proximity of the AEPMMs throughout the Site, the shutdown exposure durations calculated for the properties with pre-AEPMM indoor air data are likely representative of the AEPMM properties with no pre-AEPMM indoor air data. Therefore, the longest duration of shutdown that would be consistent with a level of exposure that does not pose an IH and that poses NSR at these properties is likely between 4 and 54 years.

7.3.4. Efficiency and Effectiveness

The remedial objectives of the EPMMs were defined the Phase IV:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor exposure pathway to indoor air.
- Achieve a condition of NSR for occupants of the residence or commercial building.

Through June 15, 2025, the results of post-EPMM installation indoor air sampling and monitoring indicate that each of the Option 1 EPMMs installed or activated at residential and commercial properties has achieved the remedial objectives.

7.3.5. System Maintenance and Modifications

In February 2025, GEI replaced the battery in the radio node at 27 Tufts Street during the EPMM inspection.

GEI has been evaluating the current telemetry system in consideration of the 2024 MCP amendments. The 2024 amendments include continual monitoring of system vacuum. However, GEI understands that properties where telemetry systems are already registered with MassDEP will be grandfathered in (310 CMR 40.1026[3][d][6], effective March 1, 2024), are not required to report system vacuum.

If a property is to be closed with a Partial Permanent Solution with Conditions requiring an AUL, hardware changes at residences will be necessary, including replacing the radio node on the exterior of the house and replacing vacuum pressure switches with vacuum pressure transducers in the basement of each residence. These modifications will require GEI to access the interior of residences. Should this option be selected for closure in the future, GEI will coordinate with property owners at that time to perform the required system modifications.

7.3.6. Management of Waste Materials

No waste materials associated with Option 1 EPMMs were generated during the reporting period.

7.4. Option 2 and 3 EPMMs (Vapor Trench and/or New Slab)

Option 2 and 3 EPMMs consist of passive vapor mitigation and do not require mechanical operation or maintenance. Option 2 or 3 EPMMs have been installed at the following 9 properties:

- 95R Franklin Street (Option 2)
- 12 Morton Street (Option 3)
- 11 Morton Street (Option 2)
- 4 Morton Street (Option 3)
- 91-93 Franklin Street (Option 3)
- 17 Knowlton Street (Option 3)
- 32 Knowlton Street (Option 3)
- 19-19A Morton Street (Option 3)
- 166-168 Glen Street (Option 3)

In accordance with the MCP (310 CMR 40.1000) prior to the June 20, 2014 MCP amendments, regulatory closure was achieved with a Class A-3 Response Action Outcome Partial (RAO-P) Statement for several properties with an Option 2 or 3 EPMM. The properties that have achieved a Class A-3 RAO-P are presented in Fig. 7-3. In the amended MCP, the term “Response Action Outcome” has been replaced with “Permanent or Temporary Solution.” Subsequent regulatory closure for individual properties with Option 2 or 3 EPMMs will be achieved with Partial PSSs with Conditions. The condition associated with the PSSs with Conditions will be maintenance of the passive EPMM in accordance with an AUL.

7.4.1. Operation and Monitoring

To confirm the performance of an EPMM, indoor air samples were collected shortly after installation was completed. As identified in the Phase IV FIR/Phase V ROS for Option 2 and 3 EPMMs, following the initial post-installation indoor air sampling, indoor air samples were collected two times per year (including one winter sample) for two consecutive years. Samples were analyzed for Site-specific chlorinated VOCs.

Following the completion of post-installation indoor air sampling, annual inspection is conducted including inspecting system components. If needed, repairs or modifications are scheduled.

A summary of OMM activities performed for Option 2 and 3 EPMMs during this reporting period is in Table 7-2. During this reporting period GEI did not conduct EPMM inspections at any Option 2 or Option 3 properties. GEI was unable to access 4 Morton Street and 95R Franklin Street during the reporting period. GEI will continue its attempts to obtain access for EPMM inspections at these properties during the next reporting period. Additionally, GEI collected indoor air samples from Option 2 and Option 3 residences during this reporting period including: 91-93 Franklin Street, 17 Knowlton Street, 32 Knowlton Street, 166-168 Glen Street, 11 Morton Street, and 19-19A Morton Street as described in Section 5.2.

7.4.2. Efficiency and Effectiveness

The remedial objectives of the EPMMs were defined the Phase IV:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor exposure pathway to indoor air.

- Achieve a condition of NSR for occupants of the residence or commercial building.

Through June 15, 2025, the results of post-EPMM installation indoor air sampling indicate that the Option 2 or 3 EPMMs currently installed at residential properties have achieved the remedial objectives.

7.4.3. System Maintenance and Modifications

No modifications were made to systems during the reporting period.

7.4.4. Management of Waste Materials

No waste materials associated with Option 2 or 3 EPMMs were generated during the reporting period.

7.5. Option 4 EPMMs (Passive Vapor Mitigation in New Construction)

Option 4 EPMMs consist of passive vapor mitigation installed in renovation or new construction and do not require mechanical operation or maintenance. Option 4 EPMMs have been installed at the following properties:

- 10 Morton Street (previously Option 3)
- 163 Glen Street (demonstrated to be not required)
- 34 Knowlton Street (previously listed under Option 3)
- 31 Tufts Street
- 121 Washington Street (in progress)

An EPMM was installed at 163 Glen Street when the former American Legion Post building was redeveloped as multifamily housing. It was demonstrated that the EPMM was not required based on sub slab soil gas sampling results that were below residential SSGSV.

Regulatory closure for individual properties with Option 4 EPMMs will be achieved with Partial PSS with Conditions. The condition associated with the PSSs with Conditions will be maintenance of the passive EPMM in accordance with an AUL.

7.5.1. Operation and Monitoring

To confirm the performance of an EPMM, indoor air samples are collected shortly after installation is complete. Option 4 EPMMs have been conducted as RAMs, and post-installation indoor air sampling for newly installed Option 4 EPMMs to demonstrate effectiveness has been conducted in accordance with MassDEP 2016 VI Guidance:

- If groundwater concentrations are less than two times the Method 1 GW-2 standard, and sub-slab soil gas concentrations are less than two times soil gas screening values, and indoor air concentrations are less than two times threshold values (TVs), GEI performs 2 rounds of indoor air sampling, with one round occurring during the heating season.

- If groundwater concentrations are greater than two times the Method 1 GW-2 standard, and/or sub-slab soil gas concentrations are greater than two times soil gas screening values, and/or indoor air concentrations are greater than two times TVs, GEI performs quarterly indoor air sampling, with two rounds occurring during the heating season.

Additional indoor air sampling beyond the first year may be performed based on property-specific conditions. Samples will be analyzed for Site-specific chlorinated VOCs. During indoor air sampling, the condition of the EPMM will be inspected and, if needed, repairs or modifications will be scheduled.

Following the completion of post-installation indoor air sampling, annual inspection includes inspecting system components. If needed, repairs or modifications will be scheduled.

A summary of OMM activities performed for Option 4 EPMMs during this reporting period is presented in Table 7-2. GEI conducted indoor air testing at: 31 Tufts Street, 34 Knowlton Street, and 10 Morton Street during this reporting period as described in Section 5.2..

7.5.1.1. 10 Morton Street Renovation

GEI was made aware of a property sale for 10 Morton Street on February 14, 2023, through contact with the new homeowner. The new homeowners indicated that they had plans to renovate the basement of the home. To evaluate the need for the continued presence of the EPMM installed beneath the slab, four soil vapor points were installed and sampled in March and April 2023. GEI submitted a RAM Plan to address contemplated changes to activities and uses of the Property as they relate to the previously-installed EPMM in June 2023. A RAM Plan Modification was submitted in November 2023 to provide for a sub-slab venting system and 20 mil vapor barrier to be installed during renovations and for post installation sub-slab soil gas and indoor air testing to be conducted to evaluate whether an EPMM and an AUL are required to maintain a condition of NSR. Details of the vapor mitigation system installation, smoke testing, sub-slab point installation, and sub-slab soil gas sampling were included in RAM Status Reports.

7.5.1.2. 31 Tufts Street

The property at 31 Tufts Street, formerly a paved parking lot, has been redeveloped as multi-family housing. 31 Tufts Street LLC and Tufts Glen Pocket Park LLC are currently joint owners of the property. MassDEP assigned RTN 3-37468 to the 31 Tufts Street property based on concentrations of polycyclic aromatic hydrocarbons (PAHs) and metals exceeding the applicable MassDEP reportable concentrations in soil (RCS-1) standards. These conditions are not attributable to the 50 Tufts Street Site. GEI submitted a RAM Plan on behalf of the owner for response actions in connection with construction, including soil management and installation of a vapor barrier and a sub-slab ventilation piping network beneath the building. In December 2023, GEI submitted a RAM Completion Report and Permanent Solution Statement for RTN 3-37468.

GEI has conducted four rounds of sub-slab soil vapor and indoor air sampling as discussed in Section 5.

We will continue coordinating with the owner of the property to perform additional sub-slab soil vapor and indoor air testing with the venting closed in summer/fall 2025.

7.5.2. Efficiency and Effectiveness

The remedial objectives of the EPEMs were defined the Phase IV:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor exposure pathway to indoor air.
- Achieve a condition of NSR for occupants of the residence or commercial building.

Through June 15, 2025, the results of post-EPMM installation indoor air sampling indicate that the Option 4 EPMMs currently installed at residential properties have achieved the remedial objectives.

7.5.3. System Maintenance and Modifications

Construction and installation of the EPMM at 121 Washington Street is ongoing.

7.5.3.1. 121 Washington Street

The property at 121 Washington Street is being redeveloped into residential apartment units. A small commercial building and paved parking formerly occupied property. The building was demolished in October 2020. As of December 2024, most of the building envelope is complete. GEI submitted a RAM Plan on behalf of the owner (Wooden Teeth, LLC) on March 12, 2024. The RAM consists of the installation of installation of a vapor barrier and a sub-slab ventilation piping network beneath the building. Details of the vapor mitigation system installation and smoke testing were included in RAM Status Reports.

7.5.4. Management of Waste Materials

No waste materials associated with Option 4 EPMMs were generated during the reporting period.

7.6. Activity and Use Limitations

It is anticipated that AULs may be warranted for each property where an EPMM is installed, and it is determined that the EPMM is necessary long-term. No AULs were recorded during this reporting period.

7.7. Permanent Solution Statements

GEI evaluates the groundwater chemical testing results collected during MNA activities to update and supplement the plume stability monitoring and natural attenuation evaluation, as presented in the Phase II CSA / Phase III RAP report. GEI is currently updating the MNA evaluation which indicates that the groundwater plume is stable, groundwater concentrations are decreasing in portions of the plume, and natural attenuation processes are occurring at the Site which are reducing contaminant concentrations in groundwater over time. Although there has been an increase in PCE concentrations in groundwater in select wells (GEO-6, MW104, MW112A and MW122), some of which may be due to relocation of the core of the plume caused by construction dewatering conducted by the MBTA, in general the dissolved-phase groundwater plumes and vapor plumes are stable and are not causing an increase in concentrations of VOCs in groundwater, soil, soil vapor, or indoor air. Natural attenuation processes are balancing contaminant levels. As discussed in Section 4.4, GEI will be installing additional groundwater

monitoring wells to better characterize these localized changes in the plume and will be collecting additional groundwater samples to further evaluate the attenuation of the plume over time.

Visible DNAPL has not been observed at the Site, although based on lines of evidence, it is likely that DNAPL is present in overburden at portions of the Site. Any DNAPLs that may be present are no longer migrating and have reached a stable configuration because of capillary trapping forces. The stability of these DNAPL sources is supported by groundwater concentration data collected from monitoring wells within the area of DNAPL occurrence. The Phase III demonstrated that it is not feasible to eliminate DNAPL at the Site. There are no unpermitted releases of OHM at the Site. Accordingly, all sources of OHM at the Site have been eliminated or controlled to the extent feasible.

The Updated 2015 Method 3 Risk Characterization that ARCADIS prepared was presented in Phase V Status Report No. 8 and RMR No. 23. The Updated 2015 Method 3 Risk Characterization incorporated updated soil, groundwater, and indoor air data sets, and included updated MassDEP toxicity information, particularly for PCE and TCE. GEI also routinely performs Method 3 risk screening for additional indoor air data collected since 2015. Based on these risk evaluations, a condition of NSR exists for current and future building occupants at each property within the Site. Based on the Updated 2015 Method 3 Risk Characterization, a condition of NSR does not exist for future construction workers performing excavations at the Property or within the MBTA ROW. The inhalation of excavation air pathway associated with the MassDEP change in TCE toxicity is the main driver of potential risks for construction workers in both exposure areas. However, these construction worker risks can and should be managed with a Health and Safety Plan (HASP) that is prepared and implemented prior to subsurface work in these exposure areas.

A condition of NSR has been demonstrated at individual properties based on adequate data collected to reflect temporal variability of contaminant levels in indoor air, sub-slab soil gas and groundwater. These individual properties are eligible for a Partial PSS in accordance with the MCP (310 CMR 40.1000). The filing of a Partial PSS for an individual property documents the achievement of regulatory closure under the MCP for that property. Therefore, the Phase V provisions do not apply to properties for which an RAO-P or Partial PSS has been submitted.

The properties that have achieved a Partial PSS are shown on Fig. 7-3. A Partial Permanent Solution Statement was submitted for the property at 103 Washington Street on June 13, 2025.

7.7.1. Permanent Solution without Conditions

GEI will prepare a Partial PSS without Conditions for residences where multiple lines of evidence have demonstrated the absence of a soil vapor migration pathway to indoor air and an EPMM is not required. GEI will also prepare Partial PSSs for residences where a Method 3 Risk Characterization, based on multiple rounds of sampling, indicated that concentrations of chlorinated VOCs in indoor air constitute NSR. In addition, GEI will prepare a Partial PSS without Conditions for the portion of the Site occupied by public rights-of-way. The properties that have achieved a Partial PSS without Conditions are shown in Fig. 7-3.

7.7.2. *Permanent Solution with Conditions*

Active operation and maintenance is required for Option 1 EPMMs. Based on the MCP amendments effective June 20, 2014, a PSS with Conditions can be achieved for properties with an Option 1 EPMM. The condition associated with the PSSs with Conditions would be maintenance of the EPMM in accordance with an AUL.

GEI will attempt to record an AUL at each property with an EPMM to maintain the integrity of the EPMM. No new AULs were recorded during the reporting period. After an AUL is recorded, GEI will prepare a Partial PSS with Conditions for residential properties with Option 1, 2 or Option 3 EPMMs where 2 years of post-installation indoor air samples have demonstrated that the EPMM is effective. Following the post-installation indoor air sampling, GEI will continue annual inspections of EPMMs as provided for in the Phase IV RIP. The properties that have achieved a Partial PSS with Conditions are shown in Fig. 7-3. If a property owner does not execute an AUL, inspections will continue as Phase V activities.

7.8. Future Phase V Activities

7.8.1. *EPMM Operation and Monitoring*

The results of post-EPMM installation indoor air sampling indicate that the Option 1, 2, 3 and 4 EPMMs installed at the Site have achieved the remedial objectives. GEI will continue to conduct annual OMM activities for installed EPMMs where sufficient indoor air sampling has been conducted, but not repeat indoor air testing, unless requested.

GEI has been communicating with property developers for 31 Tufts Street and 121 Washington Street. An EPMM has been installed at 31 Tufts Street and an EPMM is in the process of being installed at 121 Washington Street. GEI will plan with the property owners to continue the operation and monitoring program outlined in Section 7.5.

7.8.2. *EPMM Modifications*

As discussed in Section 7.3, remote telemetry has been installed at each Option 1 EPMM except for 9 Knowlton Street. The owner of 9 Knowlton Street has been unresponsive to telemetry access request letters, telephone calls, and property visits. Therefore, it is currently infeasible to install telemetry at the property.

As discussed in Section 7.5.1, 10 Morton Street is being renovated and installation of the new EPMM in the modification was completed during this reporting period.

7.8.3. *EPMM Closure Sampling*

As discussed in Section 7.3.2, GEI collected indoor air samples from 13 Knowlton Street in February 2018, March 2019, November 2019, and January 2023 and from 9 Knowlton Street in June 2022, January 2023, and March 2023 to demonstrate that the Option 1 EPMM is not required to maintain a condition of NSR.

Based on the results of the Option 1 EPMM closure sampling, GEI will continue to evaluate the need for an AEPMM to achieve a condition of NSR at 9 Knowlton and 13 Knowlton Street.

7.8.4. Installation of New EPMMs

During this reporting period, the EPMM at the 121 Washington Street development continued installation, as discussed in Section 7.5.3.

7.8.5. AULs and Permanent Solutions

As discussed in Section 7.7., the source of contamination at the Site has been controlled. If post-installation indoor air sampling at a property demonstrates that an EPMM continues to achieve the remedial objectives, then that property is eligible for a Partial PSS with Conditions.

If feasible, GEI will record AULs for each property where an EPMM is installed, and a Partial PSS with Conditions is to be issued.

Once the AULs are recorded, GEI will prepare a Partial PSS with Conditions for the properties with EPMMs. As discussed in Section 7.7, GEI will prepare Partial PSSs for those properties that did not require mitigation.

7.8.6. Future Residential Monitoring

As discussed in Section 1.4., GEI continues to attempt to contact new property owners in the Tufts Street neighborhood as property ownership turnover occurs. As discussed in Sections 5.1 and 5.2, GEI collected indoor air and sub-slab soil vapor sampling at 97 Franklin Street in February 2025; GEI will conduct an additional round of indoor air sampling in the heating season of winter 2025. GEI was able to establish contact with the owner of 84 Franklin Street and collect indoor air samples in May 2025; we will collect another round of indoor air samples in fall 2025. These efforts are documented in Appendix B.

As required by the NOAF/NON, GEI will conduct two rounds of indoor air testing at the following residences where passive EPMMs have been installed: 91 and 93 Franklin Street; 166-168 Glen Street, 17, 32 and 34 Knowlton Street; 4, 11, and 19-19A Morton Street. 91 and 93 Franklin is a single building. As discussed in Section 5.2, indoor air testing was conducted in 7 of the 8 properties between February and April 2025; however, we could not access 4 Morton Street. A second round of indoor air testing will be conducted in the fall of 2025. We will continue to attempt to access the 4 Morton Street property.

As required by the NOAF/NON, GEI will attempt to obtain access to the properties where the property owners previously refused UniFirst's offer to install a vapor mitigation system. These seven properties include: 99 Franklin Street, 192-164 Glen Street, 9, 11-13, 17, 19, and 25 Tufts Street.

8. 60 Tufts Street

8.1. Background

60 Tufts Street is a 17-unit condominium building adjacent to the Property. The mitigation system at 60 Tufts Street was designed and constructed as an SSDS. The SSDS includes 12 vertical sub-slab extraction points and 2 horizontal foundation wall extraction points connected to 2 collection headers and a 5-horsepower regenerative blower with pressure gauges, controls, and particulate filter housed in a locked metal enclosure. GEI began operation of the SSDS on April 24, 2009. A discharge pipe extends from the blower through a parking garage deck and discharges above the roofline of the building.

On July 24, 2015, remote telemetry was installed at 60 Tufts Street. The remote telemetry consists of one radio node and one pressure switch connected to the blower to send notification of a system shut down remotely to the wireless remote monitoring hub located at the Property.

The system does not include off-gas treatment. Based upon the measured flow rate and VOC concentrations, the annual discharge rate of VOCs from the system will be significantly less than 100 lbs per year; therefore, no off-gas treatment is required per MassDEP Policy No. WSC-94-150.

8.2. Remedial Objectives

The objectives of the SSDS at 60 Tufts Street are to:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor migration pathway to indoor air.
- Achieve a condition of NSR for occupants of the condominium building.

8.3. Inspection and Monitoring

The system has been monitored in accordance with the requirements and schedule in the Phase IV RIP, and in accordance with the requirements and schedule presented in subsequent Phase IV Status Reports, and the Phase IV FIR/Phase V ROS.

Operational parameters for the system (e.g., flow rate, vacuum) were historically monitored monthly and indoor air quality in Units 1, 4, and 5 and sub-slab conditions were monitored for 2 years following installation of the EPMM. The Phase IV RIP provided for ongoing annual indoor air sampling. However, post-EPMM indoor air sampling and visual inspections confirmed that the EPMM at 60 Tufts Street has been constructed in accordance with the Phase IV RIP and has achieved the remedial design objectives. Accordingly, GEI no longer conducts annual indoor air testing but has continued to monitor operational parameters of the system.

Once remote telemetry was installed on the system on July 24, 2015, GEI began to perform monitoring of system parameters on a quarterly basis in July 2015. Inspection and monitoring at 60 Tufts Street was performed two times from December 2024 to June 2025. A summary of monitoring activities conducted

during this reporting period is provided in Table 8-1 and the Field Monitoring Forms are provided in Appendix H.

8.4. Performance Efficiency and Effectiveness

As presented in the Phase IV RIP and Phase IV FIR/Phase V ROS reports, the SSDS monitoring data show that the sub-slab vacuum field generated by the SSDS influences nearly the entire floor slab area. Indoor air samples were collected in Units 1, 4, and 5, which are the units closest to the ground floor, for 2 years after EPMM installation. The indoor air testing results indicated that a condition of NSR has been achieved for building occupants at 60 Tufts Street and the soil vapor migration pathway to indoor air has been mitigated to the extent feasible.

8.4.1. AEPMM Closure Testing

On March 20, 2018, a shutdown valve was installed on the SSDS riser pipe at 60 Tufts Street. To simulate conditions without operation of the AEPMM, the SSDS fan was turned off and the shutdown valve was closed for one week beginning on April 17, 2019, prior to collecting soil vapor and indoor air samples. After the indoor air sampling was completed, the shutdown valve was opened, and the blower was reactivated. The results of the indoor air and soil vapor sampling were presented in previous Phase V Status Reports.

8.5. Management of Waste Materials

No waste materials were managed at 60 Tufts Street during this reporting period.

8.6. System Modifications

No system modifications were made during the monitoring period.

8.7. Future Phase V Activities

The system is achieving the remedial design objectives and OMM activities will continue. To confirm system performance, GEI will continue to monitor operational parameters and sub-slab conditions (e.g., flow rate, vacuum) on a quarterly basis. During monitoring events, GEI will also perform maintenance tasks as needed, which may include documenting that the blower is in operation, draining accumulated water from the moisture separator or collection headers, changing the filter element for the blower, changing the batteries in the auto-dialer, and correcting any issues observed during routine inspection of system components. GEI will implement any modifications to the telemetry system that may be required.

8.7.1. EPMM Closure Sampling

As described in Section 8.4.1, GEI conducted EPMM Shutdown Sampling in 2018 and 2019. Based on pre-EPMM indoor air testing at 60 Tufts Street, and changes to the toxicological characteristics for PCE, the EPMM may not be required to maintain a condition of NSR. Additional shutdown sampling may be pursued at a later date based on the results of the previous sampling.

8.7.2. Longest Allowable Duration of AEPMM Shutdown

An operating regime for the 60 Tufts Street AEPMM was included in the Phase IV FIR/Phase V ROS submitted on August 4, 2011, which included an OMM plan for the system. In accordance with the MCP (310 CMR 40.1026[3][f]), and as presented in Status Report No. 7 and RMR No. 22, the longest duration of a shutdown that would be consistent with a level of exposure that does not pose an IH and that poses NSR is 52 years for the 60 Tufts Street property.

8.7.3. Regulatory Closure

As discussed previously in Section 7.7, a Permanent Solution with Conditions can be achieved for properties where an AEPMM has achieved the remedial objectives, an AUL has been recorded for the property, and telemetry is installed. A Partial Permanent Solution Statement with Conditions may be submitted to achieve regulatory closure for 60 Tufts Street if the condominium association for the property executes an AUL. If the last round of shutdown testing demonstrates that an AEPMM no longer is required to maintain a condition of NSR, then a Partial Permanent Solution may be achievable without an AUL.

9. 50 Tufts Street Property

9.1. Background

The remedial system at the Property was originally designed and constructed as an SSDS that includes 22 sub-slab extraction points inside the building, a 15-horsepower regenerative blower with pressure gauges, controls, and particulate filter, and three 2,000-lb activated carbon absorbers operated in series for off-gas treatment. As part of the SSDS installation, the building slab was sealed to minimize vapor transmission through the slab. The cracks and joints in the building slab were filled with flexible sealant and a two-part epoxy coating was applied to the surface of the slab. GEI began operating the SSDS on April 30, 2007.

In July and August 2007, SVE components were added to the system as part of the CRA to address residual VOCs in soil. The SVE system includes seven SVE points installed below the pavement in the north and south parking lots on the Property. The SSDS and the SVE system rely upon shared equipment, including the piping manifold, blower assembly, and off-gas treatment units. GEI began operating the SVE system on August 22, 2007.

In April 2015, a wireless telemetry hub was installed at the Property. The telemetry hub receives telemetry notification from the other AEPMMs at the Site. A radio node was also installed and connected to monitor the 50 Tufts Street system.

9.2. Remedial Objectives

The design objectives of the combined SSDS/SVE system were to:

- Eliminate or mitigate, to the extent feasible, the soil vapor migration pathway to indoor air.
- Achieve a condition of NSR for a commercial full-time worker.
- Reduce the mass of contaminants in the vadose zone.
- Control the potential migration of soil vapor from the Property to the 60 Tufts Street property.

9.3. Inspection and Monitoring

The system has been monitored in accordance with the requirements and schedule in the Phase IV RIP. Monitoring of the system was historically performed monthly; however, once telemetry was installed on the system, GEI began performing quarterly monitoring in July 2015. Operational parameters for the system (e.g., flow rate, vacuum, off-gas treatment efficiency) were monitored six times from December 2024 to June 2025. GEI also measures the vapor pressure of sub-slab extraction points and monitoring points periodically. GEI uses these sub-slab pressure measurements to confirm system effectiveness. The pipe and hose connections on the pressure side of the blower are examined during monitoring visits for potential leaks. Leaks, if encountered, are corrected immediately. Carbon change-outs are scheduled based on carbon tank monitoring data to maximize VOC adsorption while maintaining compliance with regulatory requirements regarding discharge of VOCs to the atmosphere. Procedures to address

potential spills of spent activated carbon during carbon change-outs have been developed and are presented in the system OMM Plan provided in the Phase IV RIP.

GEI performs monitoring for off-gas treatment efficiency monthly. Based on that monitoring, the system off-gas for the combined SSDS/SVE system was within permissible limits during the reporting period. A summary of monitoring activities during this reporting period is provided in Table 9-1, and Field Monitoring Forms are provided in Appendix H.

9.3.1. Granular Activated Carbon Sampling

On February 10, 2025, GEI collected one sample of the granular activated carbon (GAC) from Tank A of the off-gas treatment system. The purpose of the sampling was to facilitate acceptance at a disposal facility following change out of the spent carbon. The sample was collected by digging approximately one foot into the GAC. The sample was submitted to ESS Laboratory of Cranston, Rhode Island for analysis of VOCs, semi-volatile organic compounds (SVOCs), and VOCs and SVOCs analyzed by the Toxic Characteristic Leaching Procedure (TCLP). Concentrations of 1,1-dichloroethane, 1,1-DCE, chloroform, cis-1,2-DCE, and trichlorofluoromethane were detected above the laboratory reporting limit. No SVOCs, TCLP VOCs, or TCLP SVOCs were detected above the laboratory reporting limit. The laboratory data report is in Appendix D.

9.3.2. Soil Vapor Extraction System Sample

Due to the absence of PCE and TCE in the GAC sample, GEI collected a soil vapor sample from the influent monitoring point at the 50 Tufts Street system. The sample was collected using a SUMMA[®] canister and regulator provided by Alpha-Pace. The canister was certified clean by the laboratory. A copy of the certification is in Appendix D. The soil vapor sample was collected over a 1-hour period. A flow regulator was attached to the SUMMA[®] canister at the location of the testing. The laboratory-set flow regulator was then turned on, and the starting pressure and time recorded. The regulator was turned off before reaching ambient pressure, and the final pressure and time were recorded. The sample was analyzed for the Site-specific chlorinated VOCs list.

Concentrations of 1,1-DCE, 1,1-DCA, cis-1,2-DCE, TCA, TCE, and PCE were detected above the laboratory reporting limits. Detected concentrations of PCE were 1,140 $\mu\text{g}/\text{m}^3$. Subsequent monthly monitoring indicates that total VOCs have not been measured above 0.0 ppm from Tank B and breakthrough has not been recorded.

9.4. Performance Efficiency and Effectiveness

The SSDS monitoring data show that the sub-slab vacuum field generated by the SSDS covers most of the building slab area. In conjunction with the physical sealing of the slab, this indicates the soil vapor migration pathway to indoor air is being mitigated by the system. Based on indoor air testing results collected since the combined system has been in operation, and the Method 3 risk characterizations prepared for the Site, a condition of NSR for full-time commercial workers has been achieved for the building at the Property.

The SVE system monitoring data show that vacuum influence from the SVE points in the south parking lot extends approximately 30 feet south of the building and from the SVE points in the north parking lot extends onto 60 Tufts Street.

Three influent and two effluent samples from the carbon treatment system were collected in May 2007, June 2007, and March 2008. The results of this sampling were compared with PID field measurements to estimate the total mass of VOCs removed from soil vapor between April 2007 and May 2014. However, GEI collected more recent influent and effluent samples in February 2014. The results of the February 2014 influent and effluent sampling are a better indicator of current system conditions and were used to estimate the total mass of VOCs removed from soil vapor based on PID field measurements beginning in June 2014. Monitoring data from both the SSDS and SVE components through June 15, 2025, show that approximately 9,507 lbs (approximately 706 gallons) of VOCs have been removed from the vadose zone at the Property (Fig. 9-1).

9.5. Management of Waste Materials

Infrequently, condensate in system piping may accumulate in the moisture separator installed as part of the blower assembly. If observed, the liquid is drained from the moisture separator and dispensed to the bare ground surface at the Property so that it can infiltrate into the subsurface within the Site boundary.

Based on the previous quantities of spent carbon generated by the system, a 2023 Hazardous Waste Report was submitted to MassDEP on March 7, 2024, identifying the Property as a Large Quantity Generator (LQG) facility. GEI will submit the next biennial Hazardous Waste Report in early 2026.

No remediation waste was generated during this reporting period.

9.6. System Modifications

No system modifications were made during this reporting period.

9.7. Future Phase V Activities

The system is achieving the remedial design objectives. Phase V OMM activities will continue in accordance with the requirements and schedule set forth in the Phase IV RIP.

9.7.1. Longest Duration of AEPMM Shutdown

An operating regime for the 50 Tufts Street AEPMMs was included in the Phase IV FIR/ Phase V ROS submitted on August 4, 2011, which included an OMM plan for the system. Indoor air sampling performed at 50 Tufts Street by Geolinsight in September 2006 identified PCE concentrations ranging from 550 to 800 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$), and TCE concentrations ranging from 16 to 150 $\mu\text{g}/\text{m}^3$. In accordance with the MassDEP Fact Sheet "TCE Toxicity Information: Implications for Chronic and Shorter-Term Exposure," dated March 27, 2014, the pre-EPMM concentrations in the building would pose an IH even over a short time period, such as a matter of days. However, GEI performed indoor air sampling during an unscheduled SSDS/SVE system shutdown in March 2015. The March 2015 indoor air concentrations did not pose an IH, and TCE was not detected during the March

2015 indoor air sampling. Based on system monitoring logs, the system was likely down for slightly less than 1 month during the March 2015 shut down. This information indicates that an IH would not be present during a minor shut down of the 50 Tufts Street system. Because the building is currently occupied, sampling cannot be conducted after the system has been shut down for a full 60 days or longer, so the maximum duration for a system shutdown that might pose an IH is not known now.

GEI will continue to operate the AEPMM at 50 Tufts Street.

10. Monitored Natural Attenuation

MNA is part of the remedial strategy to reach a Permanent Solution for the Site. GEI has implemented an MNA program to confirm on-going natural attenuation is occurring at the Site. The MNA program is described in the MNA OMM Plan presented in the Phase IV RIP. The primary elements of the MNA program include:

- Plume Stability Monitoring: A groundwater sampling plan to monitor overburden and bedrock groundwater plume concentrations through time to confirm that the groundwater plumes are stable, and that overall groundwater concentrations of chlorinated VOCs are not increasing.
- Natural Attenuation Evaluation: An evaluation of overburden and bedrock groundwater plume concentrations through time for indications of the presence and rate of natural attenuation processes.

GEI is currently conducting a significant update of the MNA evaluation which will be provided under separate cover.

11. Tufts Street Reconstruction

In July 2023, the City of Somerville announced the Tufts Street Reconstruction project. GEI attended community meetings and community communication events in August and October 2023. At the time, the scope of the project included the reconstruction/ widening of sidewalks, replacement of select catch basins, realignment of Tufts Street, and repaving the road surface. GEI additionally attended a meeting with the City and their LSP (Atlas Technical Consultants LLC [Atlas]) to discuss historical contamination at the 50 Tufts Street property. The planned construction schedule was originally during the summer and fall of 2024.

On February 29, 2024, the City of Somerville announced that based on community feedback the scope of the project would expand to include the addition of planting trees and greenery. The City of Somerville stated that this would require deeper excavations and that due to the historical contamination originating at 50 Tufts Street additional shallow soil analysis was planned. The City of Somerville announced that the construction schedule has been updated to 2025 and 2026. The project was put to bid in February 2025 and awarded in March 2025.

The Tufts Street Reconstruction project website with updated communication and concept plans is:

<https://voice.somervillema.gov/tufts-street-reconstruction?preview=true>.

11.1. City of Somerville Subsurface Investigation

Based on communication with the City of Somerville and their LSP, GEI learned that a subsurface investigation consisting of eight soil borings was conducted in March 2024. Previously, the City of Somerville data was not publicly available, but was submitted as part of a Utility-Related Abatement Measure (URAM) in May 2025.

11.1.1. Utility-Related Abatement Measure

Atlas notified MassDEP on May 9, 2025, of their intent to manage contaminated soil and groundwater associated with the 50 Tufts Street Site (RTN 3-23246) as part of the Tufts Street Reconstruction Project as a Utility Release Abatement Measure (URAM). At the time of notification MassDEP assigned RTN 3-51811 to the URAM. Atlas submitted the URAM to MassDEP on May 16, 2025 (Appendix J).

The URAM summarizes the subsurface investigation Atlas conducted in March 2024, where eight soil borings (ATC-1 through ATC-8) were advanced within Tufts Street (Appendix J). Borings were pre-cleared with vacuum excavation to approximately 5 feet and then advanced using direct-push techniques (i.e., Geoprobe) to approximately 10 feet. Atlas collected two soil samples from each boring at depths of 0 to 5 feet and 5-10 feet for analysis of VOCs. Additionally, Atlas collected two composite soil samples, ATC-1 to ATC-8 0-5 feet and ATC-1 to ATC-8 5-10 feet for analysis of waste disposal parameters. The Atlas summary data tables are in Appendix J. Concentrations of VOCs (PCE) were detected in one of the sixteen soil samples (ATC-8 5-10 feet) at 0.0314 mg/kg. The borings were backfilled and patched at grade.

The URAM states that management of contaminated soil and groundwater have been integrated into the design and the specifications for the project. The URAM states that the contractor must have a health and safety plan in place and if required be prepared to upgrade personal protective equipment (PPE) to Level C. Additionally, check dams are required to be installed within the drainage pipe alignment every 30 feet to mitigate the potential for contaminated groundwater migration. The URAM also stated that to support off-site soil management, a Contained-In-Determination (CID) was submitted to MassDEP in May 2025.

11.1.2. Contained-In Determination

Atlas submitted a CID to MassDEP on May 19, 2025. The CID stated that work for the Tufts Street Reconstruction Project is mostly located within the limits of the 50 Tufts Street Site and therefore they were submitting a CID to reclassify soil with detected concentrations of chlorinated VOCs as appropriate for disposal at an in-state landfill. The CID summarized the subsurface investigation conducted in March 2024. Based on Atlas's data from March 2024 and GEI's February 2024 soil data, Atlas requested that all soil within the right-of-way, except for a limited area in front of the 50 Tufts Street building, be declassified as hazardous waste (Appendix J). The CID stated the limited area in front of the building would be excluded due to elevated concentrations of PCE from GEI's February 2024 soil sampling.

11.2. 50 Tufts Street Soil Borings and Soil Samplings

Based on discussions with UniFirst, on February 12, 2024, GEI observed Northern advance five soil borings (50TUFT-B101 through 50TUFT-B105) on the 50 Tufts Street property adjacent to the property boundary with the City of Somerville sidewalk (Fig 11-1). The purpose of the soil sampling was to evaluate concentrations of chlorinated VOCs on the 50 Tufts Street property near the proposed work area for the Tufts Street Reconstruction Project. Borings 50TUFT-B101 and 501TUFT-B102 were advanced in the northern parking lot and borings 50TUFT-B103 through 50TUFT-B105 were advanced in the southern parking lot. Borings were advanced to a depth of five feet and samples were collected for analysis of VOCs.

Boring logs and Laboratory Data Reports were included in the Phase V Status Report No. 26 and RMR No. 41.

12. Remedial Monitoring Report No. 43

Remedial Monitoring Report No. 43, documenting OMM activities for active remedial systems at the Site, is presented in the BWSC-108A and 108B Transmittal Forms in Appendix A.

General Notes:

1. NA = not applicable.
2. QA/QC = quality assurance/quality check.
3. MS/MSD = matrix spike/matrix spike duplicate.
4. VOC = volatile organic compound.
5. All groundwater samples submitted for VOC testing. Selected samples collected in January 2007, April 2010, April 2011, April 2012, April 2013, April 2014, May 2014, June 2014, April 2015, April 2016, April 2017, April 2018, April 2019, April 2020, April 2021, April 2022, April and May 2023, April 2024, and April 2025 were also submitted for natural attenuation parameter testing.

**Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts**

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "c" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

**Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts**

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "<" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- | | |
|----|--|
| C | The analyte found in associated method blank. |
| C+ | The result has a high bias due to surrogate recovery above upper control limits. |
| E | The value exceeds the calibration range. |
| F+ | The result has a high bias due to matrix spike recovery above upper control limits. |
| F- | The result has a low bias due to matrix spike recovery below lower control limits. |
| G | The result is estimated due to duplicate precision outside control limits. |
| J | The reported result is below the laboratory reporting limit and is estimated. |
| J- | The reported result is estimated. |
| K+ | The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits. |
| K+ | The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits |
| R | The result is rejected due to gross exceedence of minimum response factor criteria. |

**Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts**

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "c" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

**Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts**

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "c" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "c" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts

**Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts**

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "c" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "c" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts

**Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts**

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "c" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

**Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts**

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "<" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

- C+ The analyte found in associated method blank.
- B- The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F+ The result has a high bias due to matrix spike recovery above upper control limits.
- G- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

**Table 4-2. Chemical Testing Results - GEI Groundwater Sampling
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts**

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "c" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "c" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J- The reported result is estimated.
- K The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

Metals (Dissolved)					6010C	µg/l																	
Iron			NS	NS	NT	NT	NT	NT	NT	NT	NT	NT	NT	NT	NT	NT	NT	NT	NT	NT	NT	NT	
Others					NT	NT		NT	NT	NT	NT	NT		NT	NT	NT	NT	NT	NT	NT	NT	NT	
Methane	8015	µg/l	NS	NS			0.21						<10										
Ethane	8015	µg/l	NS	NS			<0.23						<10										
Ethylene	8015	µg/l	NS	NS			<0.31						<10										
Alkalinity	E310.1	µg/l*	NS	NS			143000						208000										
Chloride	E325.3	µg/l	NS	NS			38600						362000										
Iron, Ferrous	3500FE B	µg/l	NS	NS			<200						NT										
Nitrate & Nitrite as N	E353.2	µg/l	NS	NS			2600						1900										
Nitrogen, Nitrate	E353.2	µg/l	NS	NS			2600						1900										
Nitrogen, Nitrite	E354.1	µg/l	NS	NS			<10						30										

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "<" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.

C+ The result has a high bias due to surrogate recovery above upper control limits.

E The value exceeds the calibration range.

F+ The result has a high bias due to matrix spike recovery above upper control limits.

F- The result has a low bias due to matrix spike recovery below lower control limits.

G The result is estimated due to duplicate precision outside control limits.

J The reported result is below the laboratory reporting limit and is estimated.

J+ The reported result is estimated.

K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.

K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits

R The result is rejected due to gross exceedence of minimum response factor criteria.

- General Notes:**
- ft = feet.
 - bgs = below ground surface.
 - ID = identification.
 - GW = groundwater.
 - NAVD = North American Vertical Datum of 1988.
 - The top of the PVC riser was used as the measuring point for depth to groundwater.
 - "--" = Well not yet installed, abandoned, or not measured.
 - NM = Not measured.

- General Notes:**
- ft = feet.
 - bgs = below ground surface.
 - ID = identification.
 - GW = groundwater.
 - NAVD = North American Vertical Datum of 1988.
 - The top of the PVC riser was used as the measuring point for depth to groundwater.
 - "--" = Well not yet installed, abandoned, or not measured.
 - NM = Not measured.

- General Notes:**
- ft = feet.
 - bgs = below ground surface.
 - ID = identification.
 - GW = groundwater.
 - NAVD = North American Vertical Datum of 1988.
 - The top of the PVC riser was used as the measuring point for depth to groundwater.
 - "-" = Well not yet installed, abandoned, or not measured.
 - NM = Not measured.

- General Notes:**
1. ft = feet.
 2. bgs = below ground surface.
 3. ID = identification.
 4. GW = groundwater.
 5. NAVD = North American Vertical Datum of 1988.
 6. The top of the PVC riser was used as the measuring point for depth to groundwater.
 7. "--" = Well not yet installed, abandoned, or not measured.
 8. NM = Not measured.

- General Notes:**
- Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
 - ft bgs = feet below ground surface.
 - µg/l = micrograms per liter.
 - "<" = The analyte was not detected at a concentration above the specified reporting limit.

- Footnote:**
- (a) The groundwater sample from KE-117 on February 6, 2014 was collected during overpumping of the well to simulate construction dewatering conditions and was not collected via low flow sampling techniques.
- (b) WashSW was a grab sample collected from the base of an open excavation within Washington Street.

General Notes

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m³ = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. Concentrations in Bold exceed the Residential Sub-Slab Soil Gas Screening Values.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m³ = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. MassDEP = Massachusetts Department of Environmental Protection
5. Residential Threshold Values for indoor air taken from the Massachusetts Department of Environmental Protection (MassDEP) Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure dated October 2016.
6. Highlighted sample indicates most recent sampling round.
7. April 7, 2015 detections of PCE attributed to dry-cleaned clothing present in the residence.
The indoor air samples collected in February 2016 and November 2016 were collected under conditions that simulate the absence of the passive EPMM at the property.
8. Values in bold exceed the applicable MassDEP Residential Threshold Values.
- 9.

General Notes

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m³ = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. NT= Not tested
5. NS= No standard established
6. MassDEP = Massachusetts Department of Environmental Protection
7. Residential Threshold Values for indoor air taken from the Massachusetts Department of Environmental Protection (MassDEP) Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure dated October 2016.
8. Values in bold exceed the applicable MassDEP Residential Threshold Values.

Qualifying Note:

- J The reported result is below the laboratory reporting limit and is estimated.

General Notes:

1. °F = degrees Fahrenheit.
2. in. Hg = inches of mercury.
3. Temperatures were measured in the field using a hand-held thermometer.
4. Barometric pressures were measured in the field with a digital barometer.

Table 6-1. Summary of SSDS Monitoring Events - Capuano Center
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
 50 Tufts Street
 Somerville, Massachusetts

Monitoring Date	Monitoring Event per RMR Report Period	Type of Monitoring Event	SSDS Field Parameters Measured	Analytical Samples Collected (Yes/No)?
1/8/2025	1	SSDS Quarterly Monitoring	-Pressure readings, VOC concentrations, and flow rate at each manifold pipe. -Pressure readings, VOC concentrations, and flow rate at all the exterior extraction pipes.	No
4/24/2025	2	SSDS Quarterly Monitoring	-Pressure readings, VOC concentrations, and flow rate at each manifold pipe. -Pressure readings, VOC concentrations, and flow rate at all the exterior extraction pipes.	No

General Notes:

1. SSDS = Sub-Slab Depressurization System.
2. RMR = Remedial Monitoring Report.
3. VOC = Volatile Organic Compound.
4. VOC measurements collected with a ppm-RAE calibrated to 100 parts per million (ppm) isobutylene.
5. Pressure readings collected using a Dwyer 475-000-FM manometer.

- General Notes:**
1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
 2. µg/m³ = micrograms per cubic meter.
 3. ppbv = parts per billion by volume.
 4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
 5. FD = Field Duplicate.
 6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.
 7. NT = Not Tested.

- Qualifying Notes:**
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.

- General Notes:**
1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
 2. µg/m³ = micrograms per cubic meter.
 3. ppbv = parts per billion by volume.
 4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
 5. FD = Field Duplicate.
 6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.
 7. NT = Not Tested.

- Qualifying Notes:**
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.

- General Notes:**
1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
 2. µg/m³ = micrograms per cubic meter.
 3. ppbv = parts per billion by volume.
 4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
 5. FD = Field Duplicate.
 6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.
 7. NT = Not Tested.

- Qualifying Notes:**
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.

- General Notes:**
1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
 2. µg/m³ = micrograms per cubic meter.
 3. ppbv = parts per billion by volume.
 4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
 5. FD = Field Duplicate.
 6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.
 - 7 NT = Not Tested.

- Qualifying Notes:**
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.

- General Notes:**
1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
 2. µg/m³ = micrograms per cubic meter.
 3. ppbv = parts per billion by volume.
 4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
 5. FD = Field Duplicate.
 6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.
 - 7 NT = Not Tested.

- Qualifying Notes:**
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.

General Notes:

1. NS = Not sampled.
2. - = Not Applicable.

Footnotes:

- (a) Ventilation fans manufactured by Radon Away.
- (b) An Option 2 or 3 EPMM was initially installed at these properties; however, a fan was added to the EPMM to improve performance. Therefore, these EPMMs consist of Option 1 with Option 2 or 3 EPMM elements.
- (c) EPMM demonstrated to be no longer required based on testing requirements in the MassDEP Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure, Policy #WSC-16-435 (Section 3.7 and Tables 3-1 and 3-2).
- (d) EPMM eliminated during demolition and not installed in redevelopment
- (e) An Option 3 EPMM was initially installed at 10 Morton Street in March 2009; however, a new EPMM was installed during renovations.

General Notes:

1. EPMM = Exposure Pathway Mitigation Measure.
2. See Appendix E for Air Sampling Checklists and Appendix H for EPMM forms.
3. See Section 6 for a description of EPMM Inspection activities. 60 Tufts Street EPMM is inspected quarterly; see Section 7.
4. NA = No inspection was performed during this reporting period.
5. SSDS = Sub-slab depressurization system.
6. Properties identified with -- indicates no EPMM installed

Table 8-1. Summary of SSDS Monitoring Events - 60 Tufts Street
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts

Monitoring Date	Monitoring Event per RMR Report Period	Type of Monitoring Event	SSDS Field Parameters Measured	Analytical Samples Collected (Yes/No)?
1/8/2025	1	SSDS Quarterly Monitoring	-Pressure readings and VOC concentrations at system influent/effluent and blower. -System flow rate.	No
4/24/2025	2	SSDS Quarterly Monitoring	-Pressure readings and VOC concentrations at system influent/effluent and blower. -System flow rate.	No

General Notes:

1. SSDS = Sub-Slab Depressurization System.
2. RMR = Remedial Monitoring Report.
3. VOC = Volatile Organic Compound.
4. VOC measurements collected with a ppm-RAE calibrated to 100 ppm isobutylene gas.
5. Pressure readings collected using a Dwyer 475-000-FM manometer.

Table 9-1. Summary of SSDS Monitoring Events - 50 Tufts Street
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
50 Tufts Street
Somerville, Massachusetts

Monitoring Date	Monitoring Event per RMR Report Period	Type of Monitoring Event	SSDS Field Parameters Measured	Analytical Samples Collected (Yes/No)?
1/8/2025	1	SSDS Quarterly Monitoring	-Pressure readings and VOC concentrations at the combined influent, and effluent pipes. -Pressure readings and VOC concentrations at carbon tanks. -System flow rate.	No
2/11/2025	2	SSDS Monthly Monitoring	-VOC concentrations at the combined influent, and effluent pipes. -VOC concentrations at carbon tanks.	No
3/6/2025	3	SSDS Monthly Monitoring	-VOC concentrations at the combined influent, and effluent pipes. -VOC concentrations at carbon tanks.	No
4/24/2025	4	SSDS Quarterly Monitoring	-Pressure readings and VOC concentrations at the combined influent, and effluent pipes. -Pressure readings and VOC concentrations at carbon tanks. -System flow rate.	No
5/13/2025	5	SSDS Monthly Monitoring	-VOC concentrations at the combined influent, and effluent pipes. -VOC concentrations at carbon tanks.	No
6/13/2025	6	SSDS Monthly Monitoring	-VOC concentrations at the combined influent, and effluent pipes. -VOC concentrations at carbon tanks.	No

General Notes:

1. SSDS = Sub-Slab Depressurization System.
2. RMR = Remedial Monitoring Report.
3. VOC = Volatile Organic Compound.
4. VFD = Variable Flow Drive.
5. SVT/SVE = Soil Vapor Temporary Point/Soil Vapor Extraction.
6. VOC measurements collected with a ppm-RAE calibrated to 100 parts per million (ppm) with 10.6V lamp.
7. Pressure readings collected using a Dwyer 475-000-FM manometer.

EPMM STATUS

- EPMM INSTALLED (ACTIVE)
- EPMM INSTALLED (OTHER EPMM)
- EPMM DEMONSTRATED TO BE NO LONGER REQUIRED (SEE NOTE 1)
- EPMM IN PROGRESS

Preferred Criteria For:

Option 1 (SSDS):

1. Competent concrete slab
2. Poured concrete foundation
3. Granular sub-grade (good sub-slab air flow)

Option 2 (Vapor Trench):

1. Competent concrete slab
2. Silt/clay sub-grade (poor sub-slab air flow)

Option 3 (New Slab Installation):

1. Incompetent concrete slab
2. Silt/clay sub-grade (poor sub-slab air flow)

Option 4 (New Construction):

1. New construction

NSR = No Significant Risk

- BWSC-108B 3 of 5 (Capuano Center)
- BWSC-108A 4 of 5 (Residences)
- BWSC-108A 5 of 5 (MNA)

**COMPREHENSIVE RESPONSE ACTION TRANSMITTAL
FORM & PHASE I COMPLETION STATEMENT**

Pursuant to 310 CMR 40.0484 (Subpart D) and 40.0800 (Subpart H)

Release Tracking Number

3 - 23246

A. SITE LOCATION:

1. Site Name: 50 TUFTS ST & PROP ACROSS THE ST
2. Street Address: 50 TUFTS ST
3. City/Town: SOMERVILLE 4. ZIP Code: 021454129

☒ 5. Check here if the disposal site that is the source of the release is Tier Classified. Check the current Tier Classification Category:

☐ a. Tier I ☐ b. Tier ID ☒ c. Tier II

B. THIS FORM IS BEING USED TO: (check all that apply)

- ☐ 1. Submit a **Phase I Completion Statement**, pursuant to 310 CMR 40.0484.
- ☐ 2. Submit a **Revised Phase I Completion Statement**, pursuant to 310 CMR 40.0484.
- ☐ 3. Submit a **Phase II Scope of Work**, pursuant to 310 CMR 40.0834.
- ☐ 4. Submit an **interim Phase II Report**. This report does not satisfy the response action deadline requirements in 310 CMR 40.0500.
- ☐ 5. Submit a **final Phase II Report and Completion Statement**, pursuant to 310 CMR 40.0836.
- ☐ 6. Submit a **Revised Phase II Report and Completion Statement**, pursuant to 310 CMR 40.0836.
- ☐ 7. Submit a **Phase III Remedial Action Plan and Completion Statement**, pursuant to 310 CMR 40.0862.
- ☐ 8. Submit a **Revised Phase III Remedial Action Plan and Completion Statement**, pursuant to 310 CMR 40.0862.
- ☐ 9. Submit a **Phase IV Remedy Implementation Plan**, pursuant to 310 CMR 40.0874.
- ☐ 10. Submit a **Modified Phase IV Remedy Implementation Plan**, pursuant to 310 CMR 40.0874.
- ☐ 11. Submit an **As-Built Construction Report**, pursuant to 310 CMR 40.0875.
- ☐ 12. Submit a **Phase IV Status Report**, pursuant to 310 CMR 40.0877.
- ☐ 13. Submit a **Phase IV Completion Statement**, pursuant to 310 CMR 40.0878 and 40.0879.

Specify the outcome of Phase IV activities: (check one)

- ☐ a. Phase V Operation, Maintenance or Monitoring of the Comprehensive Remedial Action is necessary to achieve a Permanent or Temporary Solution.
- ☐ b. The requirements of a Permanent Solution have been met. A completed Permanent Solution Statement and Report (BWSC104) will be submitted to DEP.
- ☐ c. The requirements of a Temporary Solution have been met. A completed Temporary Solution Statement and Report (BWSC104) will be submitted to DEP.

B. THIS FORM IS BEING USED TO (cont.): (check all that apply)

- ☐ 14. Submit a **Revised Phase IV Completion Statement**, pursuant to 310 CMR 40.0878 and 40.0879.
- ☒ 15. Submit a **Phase V Status Report**, pursuant to 310 CMR 40.0892.
- ☒ 16. Submit a **Remedial Monitoring Report**. (This report can only be submitted through eDEP.)
- a. Type of Report: (check one) ☐ i. Initial Report ☒ ii. Interim Report ☐ iii. Final Report
- b. Frequency of Submittal: (check all that apply)
- ☐ i. A Remedial Monitoring Report(s) submitted monthly to address an Imminent Hazard.
- ☐ ii. A Remedial Monitoring Report(s) submitted monthly to address a Condition of Substantial Release Migration.
- ☒ iii. A Remedial Monitoring Report(s) submitted every six months, concurrent with a Status Report.
- ☐ iv. A Remedial Monitoring Report(s) submitted, concurrent with a Status Report.
- c. Status of Site: (check one) ☐ i. Phase IV ☒ ii. Phase V ☐ iii. Remedy Operation Status ☐ iv. Temporary Solution
- d. Number of Remedial Systems and/or Monitoring Programs: 5
- A separate BWSC108A, CRA Remedial Monitoring Report, must be filled out for each Remedial System and/or Monitoring Program addressed by this transmittal form.
- ☐ 17. Submit a **Remedy Operation Status**, pursuant to 310 CMR 40.0893.
- ☐ 18. Submit a **Status Report to maintain a Remedy Operation Status**, pursuant to 310 CMR 40.0893(2).
- ☐ 19. Submit a **Transfer and/or a Modification of Persons Maintaining a Remedy Operation Status (ROS)**, pursuant to 310 CMR 40.0893(5) (check one, or both, if applicable).
- ☐ a. Submit a **Transfer of Persons Maintaining an ROS** (the transferee should be the person listed in Section D, "Person Undertaking Response Actions").
- ☐ b. Submit a **Modification of Persons Maintaining an ROS** (the primary representative should be the person listed in Section D, "Person Undertaking Response Actions").
- c. Number of Persons Maintaining an ROS not including the primary representative: _____
- ☐ 20. Submit a **Termination of a Remedy Operation Status**, pursuant to 310 CMR 40.0893(6). (check one)
- ☐ a. Submit a notice indicating ROS performance standards have not been met. A plan and timetable pursuant to 310 CMR 40.0893(6)(b) for resuming the ROS are attached.
- ☐ b. Submit a notice of Termination of ROS.
- ☐ 21. Submit a **Phase V Completion Statement**, pursuant to 310 CMR 40.0894.
- Specify the outcome of Phase V activities: (check one)
- ☐ a. The requirements of a Permanent Solution have been met. A completed Permanent Solution Statement and Report (BWSC104) will be submitted to DEP.
- ☐ b. The requirements for a Temporary Solution have been met. A completed Temporary Solution Statement and Report (BWSC104) will be submitted to DEP.
- ☐ 22. Submit a **Revised Phase V Completion Statement**, pursuant to 310 CMR 40.0894.
- ☐ 23. Submit a **Temporary Solution Status Report**, pursuant to 310 CMR 40.0898.
- ☐ 24. Submit a **Plan for the Application of Remedial Additives** near a sensitive receptor, pursuant to 310 CMR 40.0046(3).
- a. Status of Site: (check one)
- ☐ i. Phase IV ☐ ii. Phase V ☐ iii. Remedy Operation Status ☐ iv. Temporary Solution

C. LSP SIGNATURE AND STAMP:

I attest under the pains and penalties of perjury that I have personally examined and am familiar with this transmittal form, including any and all documents accompanying this submittal. In my professional opinion and judgment based upon application of (i) the standard of care in 309 CMR 4.02(1), (ii) the applicable provisions of 309 CMR 4.02(2) and (3), and 309 CMR 4.03(2), and (iii) the provisions of 309 CMR 4.03(3), to the best of my knowledge, information and belief,

> if Section B indicates that a **Phase I, Phase II, Phase III, Phase IV or Phase V Completion Statement** and/or a **Termination of a Remedy Operation Status** is being submitted, the response action(s) that is (are) the subject of this submittal (i) has (have) been developed and implemented in accordance with the applicable provisions of M.G.L. c. 21E and 310 CMR 40.0000, (ii) is (are) appropriate and reasonable to accomplish the purposes of such response action(s) as set forth in the applicable provisions of M.G.L. c. 21E and 310 CMR 40.0000, and (iii) comply(ies) with the identified provisions of all orders, permits, and approvals identified in this submittal;

> if Section B indicates that a **Phase II Scope of Work** or a **Phase IV Remedy Implementation Plan** is being submitted, the response action(s) that is (are) the subject of this submittal (i) has (have) been developed in accordance with the applicable provisions of M.G.L. c. 21E and 310 CMR 40.0000, (ii) is (are) appropriate and reasonable to accomplish the purposes of such response action(s) as set forth in the applicable provisions of M.G.L. c. 21E and 310 CMR 40.0000, and (iii) comply(ies) with the identified provisions of all orders, permits, and approvals identified in this submittal;

> if Section B indicates that an **As-Built Construction Report**, a **Remedy Operation Status**, a **Phase IV, Phase V or Temporary Solution Status Report**, a **Status Report to Maintain a Remedy Operation Status**, a **Transfer or Modification of Persons Maintaining a Remedy Operation Status** and/or a **Remedial Monitoring Report** is being submitted, the response action(s) that is (are) the subject of this submittal (i) is (are) being implemented in accordance with the applicable provisions of M.G.L. c. 21E and 310 CMR 40.0000, (ii) is (are) appropriate and reasonable to accomplish the purposes of such response action(s) as set forth in the applicable provisions of M.G.L. c. 21E and 310 CMR 40.0000, and (iii) comply(ies) with the identified provisions of all orders, permits, and approvals identified in this submittal.

I am aware that significant penalties may result, including, but not limited to, possible fines and imprisonment, if I submit information which I know to be false, inaccurate, or materially incomplete.

A. DESCRIPTION OF ACTIVE OPERATION AND MAINTENANCE ACTIVITY:

1. Type of Active Operation and Maintenance Activity: (check all that apply)

☐ a. Active Remedial System: (check all that apply)

☐ i. NAPL Recovery

☐ ii. Soil Vapor Extraction/Bioventing

☐ iii. Vapor-phase Carbon Adsorption

☐ iv. Groundwater Recovery

☐ v. Dual/Multi-phase Extraction

☐ vi. Aqueous-phase Carbon Adsorption

☐ vii. Air Stripping

☐ viii. Sparging/Biosparging

☐ ix. Cat/Thermal Oxidation

☐ x. Other Describe: _____

☒ b. Active Exposure Pathway Elimination Measure

Active Exposure Pathway Mitigation System to address (check one): ☒ i. Indoor Air ☐ ii. Drinking Water

☐ c. Application of Remedial Additives: (check all that apply)

☐ i. To the Subsurface

☐ ii. To Groundwater (Injection)

☐ iii. To the Surface (Including stockpiled soil)

☐ d. Active Remedial Monitoring Program Without the Application of Remedial Additives: (check all that apply; Sections C, D and E are not required; attach supporting information, data, maps and/or sketches needed by checking Section G5)

☐ i. Reactive Wall

☐ ii. Natural Attenuation

☐ iii. Other

Describe: _____

2. Mode of Operation: (check one)

☒ a. Continuous

☐ b. Intermittent

☐ c. Pulsed

☐ d. One-time Event Only

☐ e. Other: _____

3. System Effluent/Discharge: (check all that apply)

☐ a. Sanitary Sewer (O1)

☐ b. Groundwater Re-infiltration Re-injection: (check one)

☐ i. Downgradient

☐ ii. Upgradient

☒ c. Vapor-phase Discharge to Ambient Air: (check one)

☒ i. Off-gas Controls

☐ ii. No Off-gas Controls

☐ d. Drinking Water Supply

☐ e. Surface Water (including Storm Drains)

☐ f. Other Describe: _____

B. MONITORING FREQUENCY:

1. Reporting period that is the subject of this submittal:

From: 12/6/24

To: 6/15/2025

(mm/dd/yyyy)

(mm/dd/yyyy)

2. Number of monitoring events during the reporting period: (check one)

☐ a. System Startup: (if applicable)

☐ i. Days 1, 3, 6, and then weekly thereafter, for the first month.

☐ ii. Other Describe: _____

☒ b. Post-system Startup (after first month) or Monitoring Program:

☐ i. Monthly

☐ ii. Quarterly

☐ iii. Annually

☒ iv. Other Describe: OPERATIONAL PARAMETERS QUARTERLY, OFF-GAS MONTHLY

☐ 3. Check here to certify that the number of required monitoring events were conducted during the reporting period.

C. EFFLUENT/DISCHARGE REGULATION: (check one to indicate how the effluent/discharge limits were established)

☐ 1. NPDES: (check one)

☐ a. Remediation General Permit

☐ b. Individual Permit

☐ c. Emergency Exclusion

Effective Date of Permit: _____

(mm/dd/yyyy)

☒ 2. MCP Performance Standard

MCP Citations(s):

WSC-94-150

F. SHUTDOWNS OF ACTIVE REMEDIAL SYSTEM, AEPMM OR ACTIVE REMEDIAL MONITORING PROGRAM:

(check all that apply)

☐ 1. The Active Remedial System or AEPMM had unscheduled shutdowns on one or more occasions during the Reporting Period.

a. Number of Unscheduled Shutdowns: _____ b. Total Number of Days of Unscheduled Shutdowns: _____

c. Reason(s) for Unscheduled Shutdowns: _____

☐ 2. The Active Remedial System or AEPMM had scheduled shutdowns on one or more occasions during the Reporting Period.

a. Number of Scheduled Shutdowns: _____ b. Total Number of Days of Scheduled Shutdowns: _____

c. Reason(s) for Scheduled Shutdowns: _____

☐ 3. The Active Remedial System, AEPMM or Active Remedial Monitoring Program was permanently shutdown/discontinued during the Reporting Period.

a. Date of Final System or Monitoring Program Shutdown: _____
(mm/dd/yyyy)

☐ b. No Further Effluent Discharge

☐ c. No Further Application of Remedial Additives planned; sufficient monitoring completed to demonstrate compliance with 310 CMR 40.0046.

☐ d. No Further Submittals Planned.

☐ e. Other: Describe: _____

G. SUMMARY STATEMENTS: (check all that apply for the current reporting period)

☒ 1. All Active Remedial System checks and effluent analyses required by the approved plan and/or permit were performed when applicable.

☒ 2. There were no significant problems or prolonged (>25% of reporting period) unscheduled shutdowns of the Active Remedial System.

☒ 3. The Active Remedial System, AEPMM or Active Remedial Monitoring Program operated in conformance with the MCP, and all applicable approval conditions and/or permits.

4. Indicate any Operational Problems or Notes:

☐ 5. Check here if additional/supporting Information, data, maps, and/or sketches are attached to the form.

Appendix B Property Owner Notification Letters

June 12, 2025
Project No. 04516-3

Ms. Vera Rodrigues
Hodan Property Management
105 Washington Street
Somerville, MA 02143

**Re: MCP Closure Document for 103 Washington Street
50 Tufts Street Site, Somerville, Massachusetts
MassDEP RTN 3-23246**

Dear Ms. Rodrigues:

On behalf of UniFirst Corporation (UniFirst) of Wilmington, Massachusetts, and in accordance with the Massachusetts Contingency Plan (MCP; 310 CMR 40.1406), GEI Consultants, Inc. is providing you with the attached "Partial Permanent Solution Statement for 103 Washington Street, Somerville, Massachusetts" (the Property). As you are aware, GEI has been investigating environmental conditions in the vicinity of the 50 Tufts Street property in Somerville, Massachusetts (the Site) for the past several years in accordance with the MCP. Your Property (103 Washington Street) was part of that investigation. Figure 2 in the enclosed document shows the Property in relation to the Site boundary. The Site is identified by Massachusetts Department of Environmental Protection (MassDEP) Release Tracking Number (RTN) 3-23246.

As stated in the enclosed document, GEI has determined, as a result of assessment actions, that a level of No Significant Risk (NSR) exists under the MCP and, therefore, no remedial actions are necessary with respect to the Property. In the MCP, such an outcome is a form of regulatory endpoint referred to as a Permanent Solution with No Conditions.

A copy of the enclosed document is being submitted to you in accordance with the MCP. You do not need to respond to this letter. However, if you have any questions, please feel free to contact me at 781.721.4012 or at igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1406. The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party(ies) who is/are addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form.

PURPOSE OF THIS NOTICE

Parties who are taking actions to respond to releases of oil or hazardous material to the environment are required by state regulations (referred to above) to notify the owners of property where the oil or hazardous material is or is likely to be present. These same parties are also required to notify property owners upon completion of actions to address the oil or hazardous material, or if additional investigations show that the oil or hazardous material is not present at a property. **Section C** on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time.

INFORMATION RELATED TO YOUR PROPERTY

Section D on the reverse side of this form indicates the type(s) of oil or hazardous material that is or is likely to be present at your property, and the environmental medium (e.g., soil or groundwater) where it is or is likely to be present. **Please note** that when an investigation indicates that the oil or hazardous material is or is likely to be present at your property, this does not mean that the oil or hazardous material is posing a health risk to you. Parties who are taking actions to address oil and hazardous material releases are required by state regulations to adequately investigate these releases and take necessary actions to ensure that affected properties meet standards that are protective of human health and the environment.

ATTACHED MAP OR DESCRIPTION AND REPORT CONCLUSIONS

The party providing this notice to you is required to attach a map or description that indicates the boundaries of the area where the oil or hazardous material is or is likely to be present, and the conclusions of the site investigation or closure report (**Section E**). These attachments should give you additional information about the nature and location of the oil or hazardous material with respect to your property.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>.

For more information regarding this notice, you may contact the party listed in **Section F** of this form. Information about the disposal site identified in **Section A** is also available in files at the Massachusetts Department of Environmental Protection.

See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Somerville, MA 02143

**Re: Groundwater Sampling
Certain "Public Ways" and Capuano School, Somerville, Massachusetts,
MassDEP RTN 3-23246**

Dear Ms. Wells:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing results for groundwater samples collected on January 20, 2025, from groundwater monitoring wells located on municipal property. The sampling was conducted as part of our investigation related to the site at 50 Tufts Street in Somerville, Massachusetts. We collected groundwater samples from two shallow monitoring wells (MW301 and MW115R).

Groundwater samples were submitted for chemical testing for volatile organic compounds (VOCs). We have attached a summary table of the chemicals detected in the groundwater samples along with the previous sampling results, the laboratory data sheets for the recent sampling, and a figure showing the sampling locations. Thank you for permitting GEI to conduct groundwater sampling on certain public ways and the Capuano School in Somerville, Massachusetts.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403[9] and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any immediate questions regarding the water testing results, please do not hesitate to contact me at 781-721-4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "<" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO₃ per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C+ The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F+ The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.
- K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

**Re: Groundwater Sampling
Certain "Public Ways"
Somerville, Massachusetts**

Dear Ms. Wells:

Thank you for permitting GEI to conduct groundwater sampling on certain public ways in Somerville, Massachusetts. We are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP), following groundwater sampling in March 2025.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com if you have any questions.

Sincerely,

GEI Consultants, Inc

Ileen S. Gladstone, P.E., LSP, LEED AP
Senior Vice President

Christopher Coner, CHMM
Project Manager

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Ms. Kimberly Wells
2. Street Address: 93 Highland Ave, 1st Floor
City/Town: Somerville, MA Zip Code: 02143

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: City of Somerville sidewalks
City/Town: Somerville, MA Zip Code: 02145
2. MCP phase of work during which the sampling will be/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
- ☐ residential ☐ commercial ☐ industrial ☐ school/playground ☒ Other City Streets
- (specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Groundwater Sampling

E. Contact information related to the party providing this notice:

Contact Name: Ileen Gladstone, P.E., LSP, LEED AP

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Dear Ms. Wells:

**Re: Groundwater Sampling
Certain "Public Ways", 90 Washington Street, and
Michael E. Capuano Early Childhood Center
Somerville, Massachusetts**

Thank you for permitting GEI to conduct groundwater sampling at the Capuano Early Childhood Center, 90 Washington Street, and on certain public ways in Somerville, Massachusetts. Following groundwater sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP).

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com if you have any questions.

Sincerely,

June 25, 2025
Project No. 04516-3

Ms. Kimberly Wells
City Clerk
93 Highland Avenue, 1st Floor
Somerville, MA 02143

**Re: Groundwater Sampling Results
Certain "Public Ways" and Michael E. Capuano Early Childhood Center
Somerville, Massachusetts
MassDEP RTN 3-23246**

Dear Ms. Wells:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing results for groundwater samples collected on March 7, March 18, March 19, April 22, April 23, April 24, and April 25, 2025, from groundwater monitoring wells located on municipal property. The sampling was conducted as part of our investigation related to the site at 50 Tufts Street in Somerville, Massachusetts. We:

- Collected groundwater samples from eighteen shallow monitoring wells (GEO-4, GEO-5, GEO-6, MW102, MW103, MW106, MW107, MW108, MW109, MW111R, MW112A, MW115/115R, MW118S, MW119S, MW120S, MW121S, MW122, MW301), two monitoring wells screened in till (MW118T and MW119T), and four monitoring wells screened in bedrock (MW118D, MW120D, MW121D and MW116) on March 7, March 18, March 19, and between April 22 and 25, 2025. We collected a duplicate sample (MW900) from MW116.

Groundwater samples were submitted for chemical testing for volatile organic compounds (VOCs) and one groundwater sample (MW112A) was also tested for manganese and general chemistry compounds including alkalinity, chloride, nitrates, and sulfates. We have attached a summary table of the chemicals detected in the groundwater samples along with the previous sampling results, the laboratory data sheets for the recent sampling, and a figure showing the sampling locations.

Thank you for permitting GEI to conduct groundwater sampling at the Capuano Early Childhood Center, 90 Washington Street, and on certain public ways in Somerville, Massachusetts.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403[10] and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any immediate questions regarding the water testing results, please do not hesitate to contact me at 781-721-4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

LEGEND:

- MONITORING WELL INSTALLED BY TRC, 2014
- BORING BY KLEINFELDER, MARCH 2014 AND APRIL 2014
- MONITORING WELL BY KLEINFELDER, SEPTEMBER 2012, MARCH 2014, AND APRIL 2014
- MONITORING WELL WITH SOIL VAPOR SAMPLE PORT INSTALLED BY GEI, JANUARY 2007 - JANUARY 2008
- MONITORING WELL INSTALLED BY GEI, MAY 2006
- MONITORING WELL INSTALLED BY OTHERS
- PREVIOUSLY INSTALLED IRRIGATION WELL
- GLXC WELL INSTALLED AUGUST 2020
- WELLS IN GRAY HAVE BEEN DESTROYED OR DECOMMISSIONED
- CHAIN LINK FENCE
- ROOM NUMBER AT CAPUANO SCHOOL
- BOUNDARY OF COMMUNITY GARDENS
- STREET ADDRESS
- MBTA = MASSACHUSETTS BAY TRANSPORTATION AUTHORITY

GENERAL NOTES:

- MONITORING WELL LOCATIONS AND ELEVATIONS, AND CAPUANO CENTER COMMUNITY GARDEN LOCATIONS WERE ESTABLISHED BY ON THE GROUND SURVEYS BY BSC GROUP, INC.
- HORIZONTAL CONTROL FOR THIS PLAN WAS ESTABLISHED BY GPS AND IS BASED ON THE NORTH AMERICAN DATUM OF 1983.
- VERTICAL CONTROL FOR THIS PLAN WAS ESTABLISHED BY GPS AND IS BASED ON THE NORTH AMERICAN VERTICAL DATUM OF 1988.
- STREET PROPERTY LINES, AND BUILDINGS ARE BASED ON SOMERVILLE ASSESSORS MAPS AND ARE BEST FIT RELATIVE TO THE LOCATION OF THE 50 TUFTS ST. BUILDING.
- GEI OBSERVED ABANDONMENT OF SH-MW1 AND SH-1 THROUGH SH-5 IN 2007.

50 Tufts Street

Chemical Testing Results - GEI Groundwater Sampling
50 Tufts Street
Somerville, Massachusetts

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bs = feet below ground surface.
3. µg/l = micrograms per liter.
4. * = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C+ The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F+ The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- K- The reported result is estimated.
- K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "<" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C+ The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F+ The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.
- K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

- R The result is rejected due to gross exceedence of minimum response factor criteria.

Chemical Testing Results - GEI Groundwater Sampling
50 Tufts Street
Somerville, Massachusetts

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft lbs = feet below ground surface.
3. µg/l = micrograms per liter.
4. * = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FDA = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C+ The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F+ The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.
- K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft lbs = feet below ground surface.
3. µg/l = micrograms per liter.
4. * = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FDA = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

- B The analyte found in associated method blank.
- C+ The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F+ The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.
- K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

Chemical Testing Results - GEI Groundwater Sampling
50 Tufts Street
Somerville, Massachusetts

[illegible]

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bs = feet below ground surface.
3. µg/l = micrograms per liter.
4. * = The analyte was not detected at a concentration above the specified reporting.

**Re: Groundwater Sampling Results
60 Tufts Street
Somerville, Massachusetts**

To Whom It May Concern:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing results of the groundwater sampling conducted at 60 Tufts Street on April 23, 2025. The sampling was conducted as part of our investigation related to the site at 50 Tufts Street in Somerville, Massachusetts. We collected groundwater samples from monitoring wells MW201 and MW202, located on your property.

The groundwater samples were submitted for chemical testing for volatile organic compounds (VOCs). We have attached a summary table of the chemicals detected in the groundwater samples along with the previous sampling results, and the laboratory data sheets for the recent sampling.

Thank you for permitting GEI to conduct groundwater sampling at your property.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(10) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any immediate questions regarding the water testing results, please do not hesitate to contact me at 781 721-4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Property Manager
2. Street Address: Sanctuary Condominium Trust, Charlesgate, 867 Boylston St
City/Town: Boston, MA Zip Code: 02116

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☒ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☒ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 60 Tufts Street
City/Town: Somerville, MA Zip Code: 02145-4110
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
☒ residential ☐ commercial ☐ industrial ☐ school/playground ☒ Other Condominiums
(specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Annual Groundwater Sampling

E. Contact information related to the party providing this notice:

Contact Name: Ileen Gladstone, P.E., LSP, LEED AP
Street Address: GEI Consultants, Inc., 400 Unicorn Park Drive
City/Town: Woburn, MA Zip Code: 01801-3341
Telephone: (781) 721-4012 Email: igladstone@geiconsultants.com

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

- General Notes:**
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
 2. ft bgs = feet below ground surface.
 3. µg/l = micrograms per liter.
 4. "< " = The analyte was not detected at a concentration above the specified reporting.
 5. SHA = Sanborn Head & Associates.
 6. FD = Field Duplicate Sample.
 7. NT = Not Tested.
 8. * = micrograms CaCO3 per liter

- Qualifying Notes:**
- B The analyte found in associated method blank.
 - C+ The result has a high bias due to surrogate recovery above upper control limits.
 - E The value exceeds the calibration range.
 - F+ The result has a high bias due to matrix spike recovery above upper control limits.
 - F- The result has a low bias due to matrix spike recovery below lower control limits.
 - G The result is estimated due to duplicate precision outside control limits.
 - J The reported result is below the laboratory reporting limit and is estimated.
 - J+ The reported result is estimated.
 - K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
 - K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
 - R The result is rejected due to gross exceedence of minimum response factor criteria.

- General Notes:**
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
 2. ft bgs = feet below ground surface.
 3. µg/l = micrograms per liter.
 4. "< " = The analyte was not detected at a concentration above the specified reporting.
 5. SHA = Sanborn Head & Associates.
 6. FD = Field Duplicate Sample.
 7. NT = Not Tested.
 8. * = micrograms CaCO3 per liter

- Qualifying Notes:**
- B The analyte found in associated method blank.
 - C+ The result has a high bias due to surrogate recovery above upper control limits.
 - E The value exceeds the calibration range.
 - F+ The result has a high bias due to matrix spike recovery above upper control limits.
 - F- The result has a low bias due to matrix spike recovery below lower control limits.
 - G The result is estimated due to duplicate precision outside control limits.
 - J The reported result is below the laboratory reporting limit and is estimated.
 - J+ The reported result is estimated.
 - K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
 - K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
 - R The result is rejected due to gross exceedence of minimum response factor criteria.

**Re: Groundwater Sampling Results
120 Washington Street
Somerville, Massachusetts**

To Whom It May Concern:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing results of the groundwater sampling conducted at 120 Washington Street on April 22, 2025. The sampling was conducted as part of our investigation related to the site at 50 Tufts Street in Somerville, Massachusetts. We collected groundwater samples from monitoring wells MW117S, MW117T, and MW117D, located on your property.

The groundwater samples were submitted for chemical testing for volatile organic compounds (VOCs). We have attached a summary table of the chemicals detected in the groundwater samples along with the previous sampling results, and the laboratory data sheets for the recent sampling.

Thank you for permitting GEI to conduct groundwater sampling at your property.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(10) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any immediate questions regarding the water testing results, please do not hesitate to contact me at 781 721-4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

This Notice is Related to:
Release Tracking Number

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: ITS Realty LLC
2. Street Address: 87 Baker Street
City/Town: Belmont, MA Zip Code: 02478

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☒ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☒ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 120 Washington Street
City/Town: Somerville, MA Zip Code: 02143
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

- General Notes:**
- Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
 - ft bgs = feet below ground surface.
 - µg/l = micrograms per liter.
 - "< " = The analyte was not detected at a concentration above the specified reporting.
 - SHA = Sanborn Head & Associates.
 - FD = Field Duplicate Sample.
 - NT = Not Tested.
 - * = micrograms CaCO3 per liter

- Qualifying Notes:**
- B The analyte found in associated method blank.
 - C+ The result has a high bias due to surrogate recovery above upper control limits.
 - E The value exceeds the calibration range.
 - F+ The result has a high bias due to matrix spike recovery above upper control limits.
 - F- The result has a low bias due to matrix spike recovery below lower control limits.
 - G The result is estimated due to duplicate precision outside control limits.
 - J The reported result is below the laboratory reporting limit and is estimated.
 - J+ The reported result is estimated.
 - K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
 - K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
 - R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "<" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

- A The analyte found in associated method blank.
- C+ The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F+ The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.
- K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

Chemical Testing Results - GEI Groundwater Sampling
50 Tufts Street
Somerville, Massachusetts

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "<" = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

- A The analyte found in associated method blank.
- C+ The result has a high bias due to surrogate recovery above upper control limits.
- E The value exceeds the calibration range.
- F+ The result has a high bias due to matrix spike recovery above upper control limits.
- F- The result has a low bias due to matrix spike recovery below lower control limits.
- G The result is estimated due to duplicate precision outside control limits.
- J The reported result is below the laboratory reporting limit and is estimated.
- J+ The reported result is estimated.
- K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
- K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
- R The result is rejected due to gross exceedence of minimum response factor criteria.

Xinjian Qiao, Trustee
46 Gibson Street
Medford, MA 02155-4831

Dear Mr. Qiao:

**Re: Annual EPMM Inspection
4 Morton Street
Somerville, Massachusetts**

On behalf of UniFirst Corporation, I am writing to request access to your property at 4 Morton Street to perform the annual inspection of the exposure pathway mitigation measure (EPMM) installed in the basement. We previously sent a letter on August 16, 2022, March 13, 2023, August 16, 2023, October 9, 2023, and January 24, 2024.

The EPMM consists of a sub-slab vapor barrier, ventilation piping with extraction points beneath the basement slab, and sealing the basement floor and the below grade portion of the walls. The EPMM was installed to inhibit vapors from intruding through the building foundation. We typically inspect the EPMM annually to confirm that the components are intact and functioning as intended.

Please contact Christopher Coner at 781-721-4135 or cconer@geiconsultants.com, to schedule the annual EPMM inspection of the basement, if you have any questions, or would like additional information.

Our records indicate that your preferred method for scheduling EPMM inspections was by email at qiaox2001@yahoo.com and your home and work numbers were 617-905-5158 and 781-839-1765, respectively. It appears that the home and work phone numbers we have for you are no longer working numbers and we received no response to our email. Please inform me if you have an alternative phone number or email for scheduling future EPMM inspections.

Sincerely,

GEI CONSULTANTS, INC.

CERTIFIED MAIL 9171 9690 0935 0204 6583 94

Shelly Calder
Milton Yarberry
84 Franklin Street, Unit 3
Somerville, MA 02145

Dear Ms. Calder and Mr. Yarberry:

**Re: Request to Conduct Environmental Sampling
84-86 Franklin Street, Unit 3
Somerville, Massachusetts**

The purpose of this letter is to inform you about the environmental conditions in the vicinity of your property located at 84-86 Franklin Street, Unit 3 in Somerville, Massachusetts and to request access to conduct environmental sampling. The sampling would include sub-slab soil vapor and indoor air testing. Contamination is originating from the property located at 50 Tufts Street.

A release of chlorinated volatile organic compounds (VOCs) to soil and groundwater on the 50 Tufts Street Property was first reported to the Massachusetts Department of Environmental Protection (MassDEP) in 2002. Numerous studies have been conducted relating to the 50 Tufts Street Site, and response actions are currently being conducted under the Massachusetts Contingency Plan (MCP) process. Reports documenting response actions conducted at the Site are available for review at the MassDEP Northeast Regional Office in Woburn, Massachusetts. Records are accessible online at the MassDEP Searchable Sites database (<https://eeaonline.eea.state.ma.us/portal#!/search/wastesite>). Additionally, local public document repositories have been established at the Somerville Central Public Library and at the City of Somerville Clerk's Office. The MassDEP release tracking number (RTN) for the Site is RTN 3-23246. The 84-86 Franklin Street property is located within the boundaries of the Site (Fig. 1).

The boundaries of the Site were delineated based on the extent of dissolved concentrations of chlorinated VOCs in groundwater. All properties within the Site, including 84-86 Franklin Street, Unit 3, are serviced by municipal water. Therefore, there is limited potential for direct exposure to contamination in groundwater for human receptors within the Site. Because they are volatile, VOCs have the potential to migrate from subsurface soils or groundwater into the indoor air of buildings. This is known as vapor intrusion.

GEI has conducted groundwater sampling throughout the neighborhood, including on Franklin Street and Franklin Avenue, since 2007. Additionally, GEI collected sub-slab soil vapor samples from 86 Franklin Street (now known as 84-86 Franklin Street, Unit 1 and Unit 2) in April 2007. GEI collected indoor air samples from 86 Franklin Street in June 2007, November 2007, and February 2008. The results of the testing indicated that the groundwater contamination had not affected the indoor air of 86 Franklin Street.

Ms.Shelly Calder
Mr. Milton Yarberry

Mr. Juan Rivera
c/o Skyline Realty
196 Boston Avenue #2100
Medford, MA 02155

Dear Mr. Rivera:

**Re: Summary of Indoor Air Sampling and Environmental Conditions
95R Franklin Street
Somerville, Massachusetts**

The purpose of this letter is to summarize the environmental conditions at 95R Franklin Street in Somerville, Massachusetts associated with the release of chlorinated volatile organic compounds (VOCs) to soil and groundwater on the 50 Tufts Street Property.

A release of chlorinated VOCs on the 50 Tufts Street Property was first reported to the Massachusetts Department of Environmental Protection (MassDEP) in 2002. Numerous studies have been conducted relating to the 50 Tufts Street Site, and response actions are currently being conducted under the Massachusetts Contingency Plan (MCP) process. Reports documenting response actions conducted at the Site are available for review at the MassDEP Northeast Regional Office in Woburn, Massachusetts. Records are accessible online at the MassDEP Searchable Sites database (<https://eeaonline.eea.state.ma.us/portal#!/search/wastesite>). Additionally, local public document repositories have been established at the Somerville Central Public Library and at the City of Somerville Clerk's Office. The MassDEP release tracking number (RTN) for the Site is RTN 3-23246. The 95R Franklin Street property is located within the boundaries of the Site (Fig. 1).

The boundaries of the Site were delineated based on the extent of dissolved concentrations of chlorinated VOCs in groundwater. All properties within the Site, including 95R Franklin Street, are serviced by municipal water. Therefore, there is limited potential for direct exposure to contamination in groundwater for human receptors within the Site. Because they are volatile, VOCs have the potential to migrate from subsurface soils or groundwater into the indoor air of buildings. This is known as vapor intrusion.

GEI collected a sub-slab soil vapor sample from beneath the building in March 2007. Based on the soil vapor sampling results, an exposure pathway mitigation measure (EPMM) was recommended. Installation of the EPMM was completed in December 2007. The EPMM consists of a venting system beneath the basement floor, and an epoxy vapor barrier system on the basement walls. Soil vapor beneath the building is captured via multiple extraction pipes installed beneath the concrete floor in the basement. The soil vapor is re-routed from beneath the slab to the atmosphere via exterior piping that extends vertically above the roofline.

Following the installation of the EPMM, GEI collected indoor air samples from the basement and first floor in December 2007, April 2009, and March 2010. We have attached a summary table of the indoor air sampling results.

The indoor air sampling results confirmed that the EPMM was functioning properly and demonstrated that there is a condition of "No Significant Risk" to occupants of the building at 95R Franklin Street. No Significant Risk is a standard established in the MCP to demonstrate that exposure to residual contamination will not result in unacceptable risks to human health based on regulatory thresholds.

Following installation of the EPMM, the owner of 95R Franklin Street executed a Notice of Activity and Use Limitation ("AUL") that was recorded in the Middlesex South Registry of Deeds on October 23, 2009. An AUL is a document that provides information to current and future property owners and other interested parties about (1) the nature and extent of contamination on the property, (2) the appropriateness of certain uses and activities on the property, and (3) a property owner's obligations to ensure that the requirements of the AUL continue to be met.

In order to maintain a condition of No Significant Risk, the AUL for 95R Franklin Street requires that the EPMM be inspected at least annually to confirm that it is functioning properly. Specific requirements to preserve the EPMM are detailed in the AUL. A copy of the AUL is enclosed with this letter.

GEI on behalf of UniFirst Corporation would like to schedule a time to access the Property to maintain, inspect, and monitor operation of the system. The inspection should take approximately 15 minutes and can be performed on a day and time that is convenient for you. Please contact me at igladstone@geiconsultants.com or 781-721-4012 to answer any of your questions and to coordinate access.

Sincerely,

GEI CONSULTANTS, INC.

Form 1075

NOTICE OF ACTIVITY AND USE LIMITATION

M.G.L. c. 21E, § 6 and 310 CMR 40.0000

Disposal Site Name: 50 Tufts Street, Somerville, Massachusetts
DEP Release Tracking No. (s): 3-23246

This Notice of Activity and Use Limitation ("Notice") is made as of this 23rd day of October, 2009, by Michael T. Fleming as Trustee of the 95R Franklin Street Nominee Trust, c/o Marsh, Moriarty, Ontell, & Golder, PC, 18 Tremont Street, Boston, Massachusetts, together with his successors and assigns (collectively "Owner").

WITNESSETH:

WHEREAS, Michael T. Fleming as Trustee of the 95R Franklin Street Nominee Trust is the owner in fee simple of that certain parcel of land located at 95R Franklin Street in Somerville, Middlesex County, Massachusetts with the buildings and improvements thereon, pursuant to a deed recorded with the Middlesex South District Registry of Deeds in Book 50978, Page 526;

WHEREAS, said parcel of land, which is more particularly bounded and described in Exhibit A, attached hereto and made a part hereof ("Property"), is subject to this Notice of Activity and Use Limitation. The Property is shown on a plan recorded in the Middlesex South District Registry of Deeds in Plan Book 298, Plan 35;

WHEREAS, the Property comprises part of a disposal site as the result of a release of oil and/or hazardous material. Exhibit B is a sketch plan showing the relationship of the Property subject to this Notice of Activity and Use Limitation to the boundaries of said disposal site existing within the limits of the Property and to the extent such boundaries have been established. Exhibit B is attached hereto and made a part hereof; and

WHEREAS, one or more response actions have been selected for a Portion of the Disposal Site in accordance with M.G.L. c. 21E ("Chapter 21E") and the Massachusetts Contingency Plan, 310 CMR 40.0000 ("MCP"). Said response actions are based upon (a) the restriction of human access to and contact with oil and/or hazardous material in soil and/or (b) the restriction of certain activities occurring in, on, through, over, or under the Property. The basis for such restrictions is set forth in an Activity and Use Limitation Opinion ("AUL Opinion"), dated OCTOBER 5, 2009, (which is attached hereto as Exhibit C and made a part hereof);

NOW, THEREFORE, notice is hereby given that the activity and use limitations set forth in said AUL Opinion are as follows:

1. Activities and Uses Consistent with the AUL Opinion. The AUL Opinion provides that a condition of No Significant Risk to health, safety, public welfare, or the environment exists for any foreseeable period of time (pursuant to 310 CMR 40.0000) if the following activities and uses occur on the Property:

50 TUFTS STREET, SOMERVILLE
95R FRANKLIN STREET, SOMERVILLE

00205403

Form 1075

Notice Of Activity And Use Limitation

M.G.L. c. 21E, § 6 and 310 CMR 40.0000

Page 2 of 6

- (i) Any use of the existing building located on the Property, including use of the building as a residence, so long as the vapor barrier and venting system comprising the Exposure Pathway Elimination Measure ("EPEM") are maintained and, if an electric fan is added to the EPEM, such fan operates continuously;
- (ii) Activities and uses which are not identified by this Notice as being inconsistent with maintaining a condition of No Significant Risk;
- (iii) Such other activities or uses which, in the Opinion of an LSP, shall present no greater risk of harm to health, safety, public welfare, or the environment than the activities and uses set forth in this Paragraph; and
- (iv) Such other activities and uses not identified as being Activities and Uses Inconsistent with the AUL.

2. Activities and Uses Inconsistent with the AUL Opinion. Activities and uses which are inconsistent with the objectives of this Notice of Activity and Use Limitation, and which, if implemented at the Property, may result in a significant risk of harm to health, safety, public welfare, or the environment or in a substantial hazard, are as follows:

- (i) In the basement, removal or damage of the concrete floor, the overlying epoxy coating, the vapor barrier, the sub-slab venting system, and/or the protective stucco wall finish;
- (ii) In the basement, any activities which may damage and/or compromise the concrete floor, the overlying epoxy coating, the vapor barrier, the sub-slab venting system, and/or the protective stucco wall finish;
- (iii) In the crawlspace, removal or damage of the vapor transmission layer, vapor barrier, geotextile, and/or the peastone layer;
- (iv) In the crawlspace, any activities which may damage and/or compromise the vapor transmission layer, vapor barrier, geotextile, and/or the peastone layer;
- (v) In the event an electric fan is added to the EPEM, removal or damage of such fan;
- (vi) In the event an electric fan is added to the EPEM, shutting down, turning off, or removing electrical power to the fan, or any other activity that would make such fan inoperable;
- (vii) Any activities which may damage and/or compromise the ventilation piping located on the exterior of the building; and
- (viii) Construction of any occupied structure at the Property without the

installation of an EPEM and subsequent indoor air sampling to confirm its effectiveness in preventing or mitigating vapor intrusion into the structure.

3. Obligations and Conditions Set Forth in the AUL Opinion. Obligations and/or conditions to be undertaken and/or maintained at the Property to maintain a condition of No Significant Risk as set forth in the AUL Opinion shall include the following:

- (i) In the basement, the integrity of the concrete floor, the overlying epoxy floor coating, the vapor barrier, the sub-slab venting system, and the protective stucco wall finish of the existing building must be preserved and the elements of the EPEM must not be damaged or altered;
- (ii) In the crawlspace, the integrity of the vapor transmission layer, vapor barrier, geotextile, and peastone layer must be preserved and the elements of the EPEM must not be damaged or altered;
- (iii) On the exterior of the building, the integrity of the ventilation piping must be preserved, and the elements of the piping must not be damaged or altered;
- (iv) In the event an electric fan is added to the EPEM, power must be maintained to such fan and the fan may not be shut down;
- (v) In the event an electric fan is added to the EPEM, notification must be provided to UniFirst Corporation, together with its successors and assigns and/or its agents, if such fan becomes inoperable, and access must be provided to UniFirst Corporation, together with its successors and assigns and/or its agents, to repair or replace the fan as necessary;
- (vi) Access must be provided, at least annually, to UniFirst Corporation, together with its successors and assigns and/or its agents, to inspect the EPEM for damage and, to the extent necessary to continue the EPEM's effectiveness in preventing or mitigating vapor intrusion into the building, to conduct indoor air testing and/or repair or replace the vapor barrier, venting system, and/or electric fan (to the extent such a fan is added to the EPEM); and
- (vii) Any future construction of an occupied structure at the Property must include the installation of an EPEM to prevent or mitigate vapor intrusion into the structure. The design of the EPEM must be incorporated into the design and construction of the future structure and must be evaluated by an LSP. Follow-up indoor air testing must be conducted to confirm the effectiveness of the EPEM in preventing or mitigating vapor intrusion into the structure.

Form 1075

Notice Of Activity And Use Limitation

M.G.L. c. 21E, § 6 and 310 CMR 40.0000

Page 4 of 6

4. Proposed Changes in Activities and Uses. Any proposed changes in activities and uses at the Property which may result in higher levels of exposure to oil and/or hazardous material than currently exist shall be evaluated by an LSP who shall render an Opinion, in accordance with 310 CMR 40.1080 *et seq.*, as to whether the proposed changes will present a significant risk of harm to health, safety, public welfare, or the environment. Any and all requirements set forth in the Opinion to meet the objective of this Notice shall be satisfied before any such activity or use is commenced.

5. Violation of a Response Action Outcome. The activities, uses, and/or exposures upon which this Notice is based shall not change at any time to cause a significant risk of harm to health, safety, public welfare, or the environment or to create substantial hazards due to exposure to oil and/or hazardous material without the prior evaluation by an LSP in accordance with 310 CMR 40.1080 *et seq.*, and without additional response actions, if necessary, to achieve or maintain a condition of No Significant Risk or to eliminate substantial hazards.

If the activities, uses, and/or exposures upon which this Notice is based change without the prior evaluation and additional response actions determined to be necessary by an LSP in accordance with 310 CMR 40.1080 *et seq.*, the owner or operator of the Property subject to this Notice at the time that the activities, uses and/or exposures change, shall comply with the requirements set forth in 310 CMR 40.0020.

6. Incorporation Into Deeds, Mortgages, Leases, and Instruments of Transfer. This Notice shall be incorporated either in full or by reference into all future deeds, easements, mortgages, leases, licenses, occupancy agreements, or any other instrument of transfer, whereby an interest in and/or a right to use the Property or a portion thereof is conveyed.

Owner hereby authorizes and consents to the filing and recordation and/or registration of this Notice, said Notice to become effective when executed under seal by the undersigned LSP, and recorded and/or registered with the appropriate Registry(ies) of Deeds and/or Land Registration Office(s).

WITNESS the execution hereof under seal this 23rd day of September, 2009.

Michael T. Fleming, Trustee
95R Franklin Street Nominee Trust

QUITCLAIM DEED

I, Susan Southwick now know as Susan Lynn Warren-Southwick, of Somerville, Middlesex County, Massachusetts, for consideration of Two Hundred Ninety-Five Thousand (\$295,000.00) dollars paid, grant to Michael T. Fleming, Trustee of the 95R Franklin Street Nominee Trust under a Declaration of Trust dated March 31, 2008, recorded herewith, with an address of c/o Marsh Moriarty Ontell & Golder, PC, 18 Tremont Street, Boston, MA 02108, Attn: Michael Marsh

with QUITCLAIM COVENANTS

The land in Somerville, Middlesex County, Massachusetts, with the buildings thereon, being a portion of Lot 3 on a Plan of Land in Somerville, belonging to Walter M. Hadley, made by A.F. Sargent, Surv., dated June 21, 1918, and recorded with Middlesex South District Deeds in Book of Plans 298, Plan 35, bounded and described as follows:

NORTHWESTERLY	by land of Smith & Hopkins, 77.5 feet;
NORTHEASTERLY	by other land of said Smith & Hopkins, 22.5 feet;
SOUTHEASTERLY	by Lot 4 on said plan, 45 feet;
NORTHEASTERLY	by said Lot 4, 2.5 feet
SOUTHEASTERLY	by land now or formerly of George A. Hadley, 33.75 feet;
SOUTHWESTERLY	by a 16 foot passageway which is continuation of a way from Franklin Street as shown on said plan, with the privilege of passageway over and use of said continuation of the way for the convenience of the herein demised land for all purposes for which a passageway may be used in the City of Somerville.

Subject to a Grant of Remediation Easement and Restrictions from Susan Southwick and Melissa Warren to UniFirst dated January 28, 2008 and recorded March 14, 2008 at the Middlesex South Registry of Deeds in Book 50885, Page 228.

Subject to a right of passageway and continuation of passageway for all purposes for which a passageway may be used in the City of Somerville as shown on a Plan of Land recorded in the Middlesex South Registry of Deeds in Plan Book 298, Page 35.

Meaning and intending to describe and convey the premises conveyed by deed dated July 15, 1997 recorded in the Middlesex South District Registry of Deeds in Book 27524, Page 258.

EXHIBIT C*OCTOBER 5*, 2009

Reference: Activity and Use Limitation Opinion
95R Franklin Street
Somerville, Massachusetts
DEP RTN 3-23246

Introduction

This Licensed Site Professional (LSP) Opinion for a Notice of Activity and Use Limitation (AUL) was prepared by GEI Consultants, Inc. (GEI) for the property located at 95R Franklin Street in Somerville, Massachusetts (the Property). The Property comprises a portion of the 50 Tufts Street disposal site (the Site) assigned Release Tracking Number (RTN) 3-23246 by the Massachusetts Department of Environmental Protection (DEP). In 2002, a historical release of chlorinated volatile organic compounds (VOCs) to soil and groundwater at the Site was reported to the DEP. Subsequent investigations at the Site identified chlorinated VOCs in indoor air at the Site, and in groundwater and indoor air at residential properties in the vicinity of the 50 Tufts Street property, including 95R Franklin Street. The Property and the 50 Tufts Street property are shown on Fig. 1. UniFirst Corporation of Wilmington, Massachusetts is conducting response actions at the Site.

This LSP Opinion was prepared in accordance with the Massachusetts Contingency Plan (MCP; 310 CMR 40.1074) and the DEP Guidance on Implementing AULs (May 1999). This AUL Opinion applies to the entire Property, as defined in Exhibit A and indicated on Exhibit B of the AUL.

This LSP Opinion provides the following information:

- Why an AUL is appropriate to achieve and/or maintain a condition of No Significant Risk;
- Activities and uses to be prohibited and/or limited;
- Activities and uses to be permitted; and
- Obligations and conditions necessary to meet the objectives of the AUL.

Background

The Property is located in a commercial/residential zoning district, fronts Hadley Court to the south, and is bounded by residential property to the east and west, and a parking area for the Capuano Early Childhood Center to the north. The Property is located within the Site boundary associated with a historic release of chlorinated volatile organic compounds (VOCs) to soil and groundwater at 50 Tufts Street, located southwest of the Property across Tufts Street. From approximately 1955 to approximately 2002, 50 Tufts Street was used for storage and distribution of industrial chemicals, laundry supplies, and dry cleaning supplies. Chemicals stored at and delivered to and from 50 Tufts Street included chlorinated solvents. These chlorinated VOCs – particularly tetrachloroethylene (PCE), trichloroethylene (TCE), and 1,1,1-trichloroethane (TCA) – have been detected in soil, soil vapor, indoor air, and groundwater at 50 Tufts Street.

Based on the results of assessments conducted to date, the Site includes the 50 Tufts Street property, together with portions of properties in the neighborhood to the east and west. Based on multiple rounds of groundwater measurements, the general direction of groundwater flow at the Site is to the northeast across Tufts Street towards Knowlton and Franklin Streets.

Based on groundwater, soil, soil vapor, and indoor air sampling results, GEI identified a several-block area near 50 Tufts Street for evaluation of vapor intrusion as a potential exposure pathway. The evaluation included a program of sub-slab soil vapor testing and indoor air testing. Indoor air testing at the Property indicated the presence of chlorinated VOCs, particularly PCE, and the likelihood of a complete vapor intrusion exposure pathway. The residence at the Property includes a basement and crawl space.

To eliminate or mitigate the exposure pathway, UniFirst Corporation installed an Exposure Pathway Elimination Measure (EPEM) at the Property. In the basement, the EPEM consists of a vapor trench installed around the perimeter of the basement floor and a vapor barrier system covering both the floor and the fieldstone foundation walls, together with a venting system beneath the vapor barrier. Sketches of the EPEM installed in the basement and crawl space are shown in Fig. 2.

Perforated polyvinyl chloride (PVC) pipe was installed in the perimeter trench and the trench was backfilled with crushed stone and capped with three inches of concrete to match the existing slab grade. The trench piping was connected to above-slab ventilation piping that extends up to the floor joists, exits the building above the sill, and extends above the roofline. The EPEM also includes a wall vapor barrier system comprised of a vapor transmission plane, flexible membrane, and an approximately 1-inch-thick layer of cementitious stucco that extends up to the elevation of the outdoor ground surface. The modified basement walls and floor are coated with a two-part epoxy vapor barrier. Soil vapor is captured by the vapor transmission layer and vapor trench piping and ventilated to the outdoor ambient air, bypassing the pathway through the slab into indoor air. The ventilation system is designed so that an electric powered fan may be added to facilitate the flow of soil vapor through the ventilation system. A fan will be added to the ventilation system if and when an LSP determines that such facilitation of flow is necessary or appropriate.

A crawl space is located on the eastern side of the building (Fig. 2). The EPEM in the crawl space consists of a porous geotextile vapor transmission layer applied on the ground surface and covered by a rubberized membrane vapor barrier. A thin filter fabric and 2 to 3 inches of peastone were placed over the vapor barrier for protection. The vapor transmission layer is tied into ventilation piping that extends vertically from the crawl space, exits the building envelope, and is vented above the roofline of the building. Downdraft prevention caps were installed at the end of the ventilation pipes from the crawlspace and basement.

Indoor air testing conducted after the installation of the EPEM did not detect VOCs above laboratory method reporting limits. Installation of the EPEM achieved a condition of No Significant Risk at 95R Franklin Street.

Why an AUL is appropriate to achieve and/or maintain a condition of No Significant Risk at the Site:

The EPEM eliminated or mitigated the exposure pathway for vapor intrusion of chlorinated VOCs into the indoor air at 95R Franklin Street and achieved a condition of No Significant Risk. In order to maintain a condition of No Significant Risk, the integrity of the EPEM must be preserved. Therefore, this AUL is necessary to define the restricted and permitted activities to maintain a condition of No Significant Risk. The AUL is applicable to the entire Property.

AUL Restrictions

The purpose of the AUL is to preserve the integrity of the EPEM because it eliminates or mitigates the exposure pathway and achieves and/or maintains a condition of No Significant Risk.

The following are the activities and uses that will be permitted and prohibited at the Property subject to this AUL.

1. Activities and Uses Consistent with the AUL Opinion. The AUL Opinion provides that a condition of No Significant Risk to health, safety, public welfare, or the environment exists for any foreseeable period of time (pursuant to 310 CMR 40.0000) so long as any of the following activities and uses occur on the Property:

- (i) Any use of the existing building located on the Property, including use of the building as a residence, so long as the vapor barrier and venting system comprising the EPEM are maintained and, if an electric fan is added to the EPEM, such fan operates continuously;
- (ii) Activities and uses which are not identified by this Notice as being inconsistent with maintaining a condition of No Significant Risk;
- (iii) Such other activities or uses which, in the Opinion of an LSP, shall present no greater risk of harm to health, safety, public welfare, or the environment than the activities and uses set forth in this Paragraph; and
- (iv) Such other activities and uses not identified as being Activities and Uses Inconsistent with the AUL.

2. Activities and Uses Inconsistent with the AUL Opinion. Activities and uses which are inconsistent with the objectives of this Notice of Activity and Use Limitation, and which, if implemented at the Property, may result in a significant risk of harm to health, safety, public welfare, or the environment or in a substantial hazard, are as follows:

- (i) In the basement, removal or damage of the concrete floor, the overlying epoxy coating, the vapor barrier, the sub-slab venting system, and/or the protective stucco wall finish;
- (ii) In the basement, any activities which may damage and/or compromise the concrete floor, the overlying epoxy coating, the vapor barrier, the sub-slab venting system, and/or the protective stucco wall finish;
- (iii) In the crawlspace, removal or damage of the vapor transmission layer, vapor barrier, geotextile, and/or the peastone layer;
- (iv) In the crawlspace, any activities which may damage and/or compromise the vapor transmission layer, vapor barrier, geotextile, and/or the peastone layer;
- (v) In the event an electric fan is added to the EPEM, removal or damage of such fan;
- (vi) In the event an electric fan is added to the EPEM, shutting down, turning off, or removing electrical power to the fan, or any other activity that would make such fan inoperable;
- (vii) Any activities which may damage and/or compromise the ventilation piping located on the exterior of the building; and
- (viii) Construction of any occupied structure at the Property without the installation of an EPEM and subsequent indoor air sampling to confirm its effectiveness in preventing or mitigating vapor intrusion into the structure.

3. Obligations and Conditions Set Forth in the AUL Opinion. Obligations and/or conditions to be undertaken and/or maintained at the Property to maintain a condition of No Significant Risk as set forth in the AUL Opinion shall include the following:

- (i) In the basement, the integrity of the concrete floor, the overlying epoxy floor coating, the vapor barrier, the sub-slab venting system, and the protective stucco wall finish of the existing building must be preserved and the elements of the EPEM must not be damaged or altered;
- (ii) In the crawlspace, the integrity of the vapor transmission layer, vapor barrier, geotextile, and peastone layer must be preserved and the elements of the EPEM must not be damaged or altered;
- (iii) On the exterior of the building, the integrity of the ventilation piping must be preserved and the elements of the piping must not be damaged or altered;
- (iv) In the event an electric fan is added to the EPEM, power must be maintained to such fan and the fan may not be shut down;
- (v) In the event an electric fan is added to the EPEM, notification must be provided to UniFirst Corporation, together with its successors and assigns and/or its agents, if such fan becomes inoperable, and access must be provided to UniFirst Corporation, together with its successors and assigns and/or its agents, to repair or replace the fan as necessary;
- (vi) Access must be provided, at least annually, to UniFirst Corporation, together with its successors and assigns and/or its agents, to inspect the EPEM for damage and, to the extent necessary to continue the EPEM's effectiveness in preventing or mitigating vapor intrusion into the building, to conduct indoor air testing and/or repair or replace the vapor barrier, venting system, and/or electric fan (to the extent such a fan is added to the EPEM); and
- (vii) Any future construction of an occupied structure at the Property must include the installation of an EPEM to prevent or mitigate vapor intrusion into the structure. The design of the EPEM must be incorporated into the design and construction of the future structure and must be evaluated by an LSP. Follow-up indoor air testing must be conducted to confirm the effectiveness of the EPEM in preventing or mitigating vapor intrusion into the structure.

Summary and Conclusions

This LSP Opinion has been prepared to support the implementation of a Notice of AUL for a release of oil or hazardous materials at the Property. Based on the results of the Risk Characterization and with the implementation of an AUL on the Property, it is GEI's opinion that a condition of No Significant Risk will be maintained at the Property.

Dear Mr. and Ms. Isaac:

**Re: Indoor Air and Soil Vapor Sampling
10 Morton Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct soil vapor and indoor air sampling at your property located at 10 Morton Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the soil vapor and indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

**Re: Indoor Air Sampling Results
11 Morton Street, Unit 1
Somerville, Massachusetts**

Dear Mr. and Mrs. Miller:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on April 8 and May 7, 2025, at your property located at 11 Morton Street in connection with the ongoing monitoring associated with the historical impacts at the 50 Tufts Street site.

On April 8, 2025, one indoor air sample was collected on the first floor and one indoor air sample was collected in the basement. The samples were collected over a 24-hour period. During sampling, the hardware used to collect the sample in the basement malfunctioned, and the sample was not able to be analyzed by the laboratory. GEI returned on May 7 to recollect both the first floor and basement indoor air samples. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in both the first floor and basement samples during the May 2025 sampling, but it was not detected in the first floor sample during the April 2025 sampling. Concentrations of PCE were detected at 0.203 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) on the first floor and 0.217 $\mu\text{g}/\text{m}^3$ in the basement. Trichloroethylene (TCE) was detected on the first floor in both the April and May 2025 sampling events at concentrations of 1.05 $\mu\text{g}/\text{m}^3$ and 2.77 $\mu\text{g}/\text{m}^3$, respectively, and was detected at a concentration of 0.269 $\mu\text{g}/\text{m}^3$ in the basement during the May 2025 sampling. No other chlorinated volatile organic compounds (CVOCs) were detected in the samples.

In accordance with Massachusetts Department of Environmental Protection (MassDEP) protocols, GEI performed a risk assessment screening using the May 7, 2025, indoor air results. The risk assessment screening demonstrates that the indoor air concentrations pose no significant risk (NSR) to a residential occupant based on a conservative assumed exposure duration of 24-hours per day.

MassDEP regulations provide that individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at

310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

Ileen S. Gladstone, P.E, LSP
Senior Vice President

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Lauren and Steven Miller
2. Street Address: 11 Morton Street
City/Town: Somerville, MA Zip Code: 02145

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☒ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☒ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 11 Morton Street
City/Town: Somerville, MA Zip Code: 02145-4205
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
- ☒ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____
- (specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Dear Ms. Cabral:

**Re: Indoor Air Sampling
17 Knowlton Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct indoor air sampling at your property located at 17 Knowlton Street in Somerville, Massachusetts. Prior to sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

--	---	--

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Somerville, MA 02143

Re: Indoor Air Sampling Results
17 Knowlton Street, Somerville, Massachusetts

Dear Ms. Cabral:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on March 6, 2025, at your property at 17 Knowlton Street to evaluate the potential for vapor intrusion.

On March 6, 2025, one indoor air sample was collected on the first floor and one sample was collected in the basement. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in both the first floor and basement samples. Concentrations of PCE were detected at 0.163 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) on the first floor and 0.203 $\mu\text{g}/\text{m}^3$ in the basement. No other chlorinated VOCs were detected above the laboratory reporting limit.

The detected indoor air concentrations are below the applicable MassDEP residential and commercial indoor air threshold values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Clementina Cabral
2. Street Address: 17 Knowlton Street
City/Town: Somerville, MA Zip Code: 02145-4225

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☒ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☒ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 17 Knowlton Street
City/Town: Somerville, MA Zip Code: 02145-4225
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
- ☒ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____
- (specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor Air Sampling

E. Contact information related to the party providing this notice:

Contact Name: Ileen Gladstone, P.E., LSP, LEED AP
Street Address: GEI Consultants, Inc., 400 Unicorn Park Drive
City/Town: Woburn, MA Zip Code: 01801-3341

NOTICE OF ENVIRONMENTAL SAMPLING

3 - 23246

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Dear Gang Lian and Xiao-Ning Wang:

**Re: Indoor Air Sampling
19-19A Morton Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct indoor air sampling at your property located at 19-19A Morton Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

3 - 23246

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Project 045163

Gang Lian and Ziao-Ning Wang
5 Butterwick Lane
Old Lyme, CT 06371

**Re: Indoor Air Sampling Results
19-19A Morton Street, Somerville, Massachusetts**

Dear Gang Lian and Ziao-Ning Wang:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on February 27, 2025, at your property at 19-19A Morton Street to evaluate the potential for vapor intrusion.

On February 27, 2025, one indoor air sample was collected on the first floor and one indoor air sample was collected in the basement. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in both the first floor and basement samples. Concentrations of PCE were detected at 0.136 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) on the first floor and 0.142 $\mu\text{g}/\text{m}^3$ in the basement. No other chlorinated volatile organic compounds (CVOCs) were detected in the samples.

The detected indoor air concentrations of PCE are below the applicable MassDEP residential indoor air threshold values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Gang Lian and Xiao-Ning Wang
2. Street Address: 5 Butterwick Lane
City/Town: Old Lyme, CT Zip Code: 06371

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☒ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☒ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 19-19A Morton Street
City/Town: Somerville, MA Zip Code: 02145-4205
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
- ☒ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____
- (specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

James Veneziano
PO Box 556
Somerville, MA 02143

Dear Mr. Veneziano:

**Re: Indoor Air Sampling
21 Morton Street (aka 156 Glen Street)
Somerville, Massachusetts**

Thank you for permitting GEI to conduct indoor air and soil vapor sampling at your property located at 21 Morton Street (aka 156 Glen Street) in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

March 27, 2025
Project 045163

James Veneziano
PO Box 556
Somerville, MA 02143

**Re: Indoor Air and Sub-Slab Soil Vapor Sampling Results
21 Morton Street (aka 156 Glen Street)
Somerville, Massachusetts**

Dear Mr. Veneziano:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air and sub-slab soil vapor samples on February 19, 2025, at your property at 21 Morton Street (aka 156 Glen Street) to evaluate the potential for vapor intrusion.

On February 19, 2025, one indoor air sample was collected on the first floor and one indoor air sample was collected in the basement of both the 21 Morton and 156 Glen Street portions of the residence (a total of four samples). The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Tables 1 and 2), and the laboratory data sheets for the recent sampling.

No chlorinated volatile organic compounds (CVOCs) were detected in the samples above the laboratory reporting limit.

On February 19, 2025, GEI installed two soil vapor sampling points and collected two soil vapor samples from the basement of 21 Morton Street and installed one soil vapor sampling point and collected one soil vapor sample from the basement of 156 Glen Street to evaluate the concentrations of chlorinated VOCs in soil vapor beneath the building. Attached is a summary table of the chemicals detected in the soil vapor samples (Tables 3 and 4) and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in both samples at 21 Morton Street, 2.28 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) and $4.73 \mu\text{g}/\text{m}^3$ in SV1 and SV2, respectively. PCE was detected in the one sample at 156 Glen Street, $1.93 \mu\text{g}/\text{m}^3$. 1,1,1-Trichloroethane was detected in both samples at 21 Morton Street, $0.671 \mu\text{g}/\text{m}^3$ and $15.4 \mu\text{g}/\text{m}^3$ in SV1 and SV2, respectively. Trichloroethylene (TCE) was detected in the one sample at 156 Glen Street, $0.145 \mu\text{g}/\text{m}^3$.

The detected indoor air and soil vapor concentrations are below the applicable MassDEP residential and commercial indoor air threshold values and soil vapor screening values. Soil vapor concentrations that are below the soil vapor screening values generally indicate that the vapor intrusion pathway is unlikely to be of concern under current conditions.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Ms. Eliza Datta:

**Re: Indoor Air and Soil Vapor Sampling
31 Tufts Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct indoor air and soil vapor sampling at your property located at 31 Tufts Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air and soil vapor sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

This Notice is Related to:
Release Tracking Number

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Eliza Datta - 31 Tufts St/Tufts Glen Pocket Park LLC
2. Street Address: 40 Homer Street
City/Town: Newton, MA Zip Code: 02459

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 31 Tufts Street
City/Town: Somerville, MA Zip Code: 02145-4116
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
- ☒ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____
- (specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.
- Indoor Air and Sub-slab soil vapor sampling

E. Contact information related to the party providing this notice:

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

**Re: Indoor Air and Soil Vapor Sampling Results
31 Tufts Street
Somerville, Massachusetts**

Dear Ms. Datta:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air and soil vapor samples on February 19, 2025, at your property at 31 Tufts Street to evaluate the potential for vapor intrusion. We are providing you with the sampling results and a "Notice of Environmental Sampling" (Form BWSC-123) as required by the Massachusetts Department of Environmental Protection (MassDEP).

On February 19, 2025, five indoor air samples were collected on the first floor in each of the four units and the utility room. On February 10, 2025, one week prior to sampling, GEI sealed off the vent pipe and the samples were collected with the venting system closed. Attached is a summary table of the chemicals detected in the indoor air samples along with the previous sampling results (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in samples IA-2 (Unit 101) at a concentration of 0.359 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) and IA-3 (utility room) a concentration of 0.231 $\mu\text{g}/\text{m}^3$. Trans-1,2-dichloroethylene (trans-1,2-DCE) was detected in sample IA-1 (Unit 104) at a concentration of 0.341 $\mu\text{g}/\text{m}^3$.

On February 19, 2025, two soil vapor samples were collected from beneath the building slab in the utility room (SV1) and in the northern stairwell (SV2). The samples were collected over 1 hour. Attached is a summary table of the chemicals detected in the soil vapor samples along with the previous sampling results (Table 2), and the laboratory data sheets for the recent sampling. PCE was detected at concentrations of 31.2 $\mu\text{g}/\text{m}^3$ and 47.9 $\mu\text{g}/\text{m}^3$, at SV1 and SV2, respectively. The following chlorinated VOCs were detected in SV1: 1,1,1-trichloroethane (0.393 $\mu\text{g}/\text{m}^3$) and trichloroethylene (0.478 $\mu\text{g}/\text{m}^3$). The following chlorinated VOCs were detected in SV2: 1,1,1-trichloroethane (3.24 $\mu\text{g}/\text{m}^3$), and trichloroethylene (1.55 $\mu\text{g}/\text{m}^3$). On February 24, 2025, GEI returned to the property to open the passive venting system.

The October 2023, January 2024, September 2024, and February 2025 indoor air sampling results indicate that a condition of NSR exists, but additional evaluation is required. We would like to collect additional rounds of indoor air data to continue to evaluate if the EPMM is required to maintain a level of NSR. The next round of indoor air sampling will be conducted in spring/summer 2025 with the vent pipe closed.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner also may request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Eliza Datta - 31 Tufts St/Tufts Glen Pocket Park LLC
2. Street Address: 40 Homer Street
City/Town: Newton, MA Zip Code: 02459

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☒ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☒ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 31 Tufts Street
City/Town: Somerville, MA Zip Code: 02145-4116
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
- ☒ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____
- (specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.
- Indoor Air and Sub-slab soil vapor sampling

E. Contact information related to the party providing this notice:

Contact Name: Ileen Gladstone, P.E., LSP, LEED AP
Street Address: GEI Consultants, Inc., 400 Unicorn Park Drive
City/Town: Woburn, MA Zip Code: 01801-3341

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Dear Ms. Peddle:

**Re: Indoor Air Sampling
32 Knowlton Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct indoor air sampling at your property located at 32 Knowlton Street in Somerville, Massachusetts. Prior to sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

**Re: Indoor Air Sampling Results
32 Knowlton Street, Somerville, Massachusetts**

Dear Ms. Peddle:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on February 28, 2025, at your property at 32 Knowlton Street to evaluate the potential for vapor intrusion.

On February 28, 2025, one indoor air sample was collected in the basement and one sample was collected on the first floor. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in two samples. Concentrations of PCE were detected at 0.163 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) on the first floor and 0.136 $\mu\text{g}/\text{m}^3$ in the basement.

The detected indoor air concentrations are below the applicable MassDEP residential and commercial indoor air threshold values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Sara Peddle
2. Street Address: 32 Knowlton Street
City/Town: Somerville, MA Zip Code: 02145

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☒ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☒ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 32 Knowlton Street
City/Town: Somerville, MA Zip Code: 02145-4135
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
- ☒ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____
- (specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Max Jiang and Matthew Paul Viscue
34 Knowlton Street
Somerville, MA 02145

**Re: Indoor Air Sampling Results
34 Knowlton Street
Somerville, Massachusetts**

Dear Ms. Jiang and Mr. Viscue:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on February 25 and April 9, 2025, at your property at 34 Knowlton Street to evaluate the potential for vapor intrusion.

On February 25, 2025, one indoor air sample was collected in the basement. At the time of sampling, the sample collected from the first floor malfunctioned and was not able to be analyzed. We returned on April 9, 2025, and collected one indoor air sample on the first floor. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in the sample collected on the first floor at a concentration of 0.163 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$). Additionally, trans-1,2-dichloroethylene was detected in both samples at concentrations of 0.127 $\mu\text{g}/\text{m}^3$ on the first floor and 0.135 $\mu\text{g}/\text{m}^3$ in the basement.

The detected indoor air concentrations are below the applicable MassDEP residential and commercial indoor air threshold values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Dear Ms. Calder and Mr. Yarberry:

**Re: Indoor Air Sampling
84 Franklin Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct indoor air sampling at your property located at 84 Franklin Street in Somerville, Massachusetts. Prior to sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Somerville, MA 02145

**Re: Indoor Air Sampling Results
84 Franklin Street
Somerville, Massachusetts**

Dear Ms. Calder and Mr. Yarberry:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on May 7, 2025, at your property at 84 Franklin Street to evaluate the potential for vapor intrusion.

On May 7, 2025, one indoor air sample was collected in the basement, one sample was collected on the first floor, and one sample was collected from the second floor. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in all three samples. Concentrations of PCE were detected at 0.176 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) in the basement, 0.400 $\mu\text{g}/\text{m}^3$ on the first floor, and 0.902 $\mu\text{g}/\text{m}^3$ on the second floor. Additionally, trans-1,2-dichloroethylene was detected in the samples collected in the basement and on the first floor at concentrations of 0.131 $\mu\text{g}/\text{m}^3$ and 0.079 $\mu\text{g}/\text{m}^3$, respectively. The detected indoor air concentrations are below the applicable MassDEP residential indoor air threshold values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Dear Mr. Carey:

**Re: Indoor Air Sampling
91-93 Franklin Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct indoor air sampling at your property located at 91-93 Franklin Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

Somerville, MA 02143

**Re: Indoor Air Sampling Results
91-93 Franklin Street
Somerville, Massachusetts**

Dear Mr. Carey:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on February 28, 2025, at your property at 91-93 Franklin Street to evaluate the potential for vapor intrusion.

On February 28, 2025, one indoor air sample was collected in the basement and two samples were collected on the first floor, one in each of the units. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in all three samples. Concentrations of PCE were detected at 0.183 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) on the first floor of 93 Franklin, 0.163 $\mu\text{g}/\text{m}^3$ on the first floor of 91 Franklin and 0.156 $\mu\text{g}/\text{m}^3$ in the basement.

The detected indoor air concentrations are below the applicable MassDEP residential and commercial indoor air threshold values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Catalina Barhona
97 Franklin Street
Somerville, MA 02145

Dear Ms. Barhona:

**Re: Indoor Air and Soil Vapor Sampling
97 Franklin Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct soil vapor and indoor air sampling at your property located at 97 Franklin Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the soil vapor and indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

**Re: Indoor Air and Sub-Soil Vapor Sampling Results
97 Franklin Street
Somerville, Massachusetts**

Dear Ms. Barahona:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air and sub-slab soil vapor samples on February 19, 2025, at your property at 97 Franklin Street to evaluate the potential for vapor intrusion.

On February 19, 2025, one indoor air sample was collected on the first floor, one indoor air sample was collected on the second floor, and one indoor air sample was collected in the basement. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in the basement sample at a concentration of 0.624 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$), in the first-floor sample at a concentration of $0.190 \mu\text{g}/\text{m}^3$, and in the second-floor sample at a concentration of $0.176 \mu\text{g}/\text{m}^3$. Additionally, trichloroethylene (TCE) was detected in the basement at a concentration of $1.10 \mu\text{g}/\text{m}^3$, in the first-floor sample at a concentration of $0.199 \mu\text{g}/\text{m}^3$, and in the second-floor sample at a concentration $0.220 \mu\text{g}/\text{m}^3$. 1,1,1-trichloroethane (TCA) was detected in the basement sample at concentration of $0.240 \mu\text{g}/\text{m}^3$ and 1,1-dichloroethane was detected in the basement sample at concentration of $0.085 \mu\text{g}/\text{m}^3$.

On February 19, 2025, GEI collected two soil vapor samples from the previously installed sub-slab monitoring points to evaluate the concentrations of chlorinated VOCs in soil vapor beneath the building. Attached is a summary table of the chemicals detected in the soil vapor samples (Table 2) and the laboratory data sheets for the recent sampling.

Concentrations of PCE were detected above laboratory reporting limits. PCE was detected in both samples at $21.0 \mu\text{g}/\text{m}^3$ and $1.04 \mu\text{g}/\text{m}^3$ in SS1 and SS2, respectively. Additionally, concentrations of TCE were detected above laboratory reporting limits. TCE was detected in both samples at $0.113 \mu\text{g}/\text{m}^3$ and $0.269 \mu\text{g}/\text{m}^3$ in SS1 and SS2, respectively.

The concentrations of TCE detected on the first and second floors are below the Massachusetts Department of Environmental Protection (MassDEP) threshold values (TV), which indicate that the vapor intrusion pathway is unlikely to be of concern. Although the concentrations of TCE exceeded the TVs in the basement, a risk characterization, performed by GEI using the February 19, 2025, indoor air results in accordance with MassDEP protocols demonstrates that the indoor air concentrations pose No Significant Risk (NSR) to a residential occupant.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m³ = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. NT= Not tested

Qualifying Note:

- J The reported result is below the laboratory reporting limit and is estimated.

105 Washington Street
Somerville, MA 02143

Dear Ms. Vera Barter:

**Re: Indoor Air and Soil Vapor Sampling
103 Washington Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct soil vapor and indoor air sampling at your property located at 103 Washington Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the soil vapor and indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Vera Barter- Hodan Property Management
2. Street Address: 105 Washington Street
City/Town: Somerville, MA Zip Code: 02143

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 103 Washington Street
City/Town: Somerville, MA Zip Code: 02145-4426
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
- ☒ residential ☒ commercial ☐ industrial ☐ school/playground ☐ Other _____
- (specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.
- Indoor air and sub-slab soil vapor sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

**Re: Indoor Air and Sub-Slab Soil Vapor Sampling Results
103 Washington Street
Somerville, Massachusetts**

Dear Ms. Barter:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air and sub-slab soil vapor samples on February 11, 2025, at your property at 103 Washington Street to evaluate the potential for vapor intrusion.

On February 11, 2025, one indoor air sample was collected on the first floor, one indoor air sample was collected in the basement, one indoor air sample was collected from a unit on the second floor, and one indoor air sample was collected in the second floor hallway. On February 21, 2025, one indoor air sample was collected again on the first floor because the original sample from February 11, 2025, malfunctioned and was not able to be analyzed. The first floor is commercial or ancillary space associated with residences, the units on the second floor are above the commercial space or above the open-air parking. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in three samples. Concentrations of PCE were detected at 0.542 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) in the basement, 0.170 $\mu\text{g}/\text{m}^3$ in Unit 1 on the second-floor, and 0.312 $\mu\text{g}/\text{m}^3$ in the sample from the second-floor hallway. No other chlorinated volatile organic compounds (CVOCs) were detected in the samples.

On February 11, 2025, GEI collected two soil vapor samples from the previously installed sub-slab monitoring points to evaluate the concentrations of chlorinated VOCs in soil vapor beneath the building. Attached is a summary table of the chemicals detected in the soil vapor samples (Table 2) and the laboratory data sheets for the recent sampling.

PCE was detected in both samples at 1.36 $\mu\text{g}/\text{m}^3$ and 33.8 $\mu\text{g}/\text{m}^3$ in SV1 and SV2, respectively. Trichloroethylene (TCE) was detected in both samples at 0.193 $\mu\text{g}/\text{m}^3$ and 26.8 $\mu\text{g}/\text{m}^3$ in SV1 and SV2, respectively. Additionally, cis-1,2-dichloroethylene (cis-1,2-DCE) and trans-1,2-dichloroethylene (trans-1,2-DCE) were detected above the laboratory reporting limit in SV2. Trans-1,2-DCE was detected above the laboratory reporting limit in SV1.

The detected indoor air and soil vapor concentrations are below the applicable MassDEP residential and commercial indoor air threshold values and soil vapor screening values. Soil vapor concentrations that are below the soil vapor screening values generally indicate that the vapor intrusion pathway is unlikely to be of concern under current conditions.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Vera Barter- Hodan Property Management
2. Street Address: 105 Washington Street
City/Town: Somerville, MA Zip Code: 02143

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 103 Washington Street
City/Town: Somerville, MA Zip Code: 02145-4426
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |
|---|--|
| ☐ Immediate Response Action | ☐ Phase III Feasibility Evaluation |
| ☐ Release Abatement Measure | ☐ Phase IV Remedy Implementation Plan |
| ☐ Utility-related Abatement Measure | ☒ Phase V/Remedy Operation Status |
| ☐ Phase I Initial Site Investigation | ☐ Post-Temporary Solution Operation, Maintenance and Monitoring |
| ☐ Phase II Comprehensive Site Assessment | ☐ Other _____ |
- (specify)
3. Description of property where sampling ~~will be~~/has been conducted:
☒ residential ☒ commercial ☐ industrial ☐ school/playground ☐ Other _____
(specify)
4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.
Indoor air and sub-slab soil vapor sampling

E. Contact information related to the party providing this notice:

Contact Name: Ileen Gladstone, P.E., LSP, LEED AP
Street Address: GEI Consultants, Inc., 400 Unicorn Park Drive
City/Town: Woburn, MA Zip Code: 01801-3341
Telephone: (781) 721-4012 Email: igladstone@geiconsultants.com

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Hodan Property Management
105 Washington Street
Somerville, MA 02143

Dear Ms. Vera Barter:

**Re: Indoor Air and Soil Vapor Sampling
105 Washington Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct indoor air and soil vapor sampling at your property located at 105 Washington Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air and soil vapor sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

3 - 23246

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street
City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Vera Barter- Hodan Property Management
2. Street Address: 105 Washington Street
City/Town: Somerville, MA Zip Code: 02143-4426

C. This notice is being given to inform its recipient (the party listed in Section B):

- ☒ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.
- ☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.
- ☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 105 Washington Street
City/Town: Somerville, MA Zip Code: 02143-4426
2. MCP phase of work during which the sampling ~~will be~~/has been conducted:
- | | |

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

**Re: Indoor Air and Soil Vapor Sampling Results
105 Washington Street
Somerville, Massachusetts**

Dear Ms. Barter:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air and soil vapor samples on February 11, 2025 at your property at 105 Washington Street to evaluate the potential for vapor intrusion.

On February 11, 2025, two indoor air samples were collected in the basement, one sample was collected on the first floor, and one sample was collected from the hallway on the second floor. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in all four samples. Concentrations of PCE were detected at 0.705 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) on the first floor, 0.780 $\mu\text{g}/\text{m}^3$ and 0.292 $\mu\text{g}/\text{m}^3$ in the basement, and 0.271 $\mu\text{g}/\text{m}^3$ on the second floor. Trans-1,2-dichloroethylene (trans-1,2-DCE) was detected in the first-floor sample at a concentration of 0.087 $\mu\text{g}/\text{m}^3$.

GEI collected one soil vapor sample from the previously installed sub-slab monitoring point to evaluate the concentrations of chlorinated VOCs in soil vapor beneath the building. Attached is a summary table of the chemicals detected in the soil vapor samples (Table 2) and the laboratory data sheets for the recent sampling.

Concentrations of PCE and trans-1,2-dichloroethylene (trans-1,2-DCE) were detected above the laboratory reporting limits at concentrations of 0.420 $\mu\text{g}/\text{m}^3$ and 0.210 $\mu\text{g}/\text{m}^3$, respectively.

The detected indoor air and soil vapor concentrations are below the applicable MassDEP residential and commercial indoor air threshold values and soil vapor screening values. Soil vapor concentrations that are below the soil vapor screening values generally indicate that the vapor intrusion pathway is unlikely to be of concern under current conditions.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Martin Kwok
166-168 Glen Street
Somerville, MA 02145

Dear Mr. Kwok:

**Re: Indoor Air Sampling
166-168 Glen Street
Somerville, Massachusetts**

Thank you for permitting GEI to conduct indoor air sampling at your property located at 166-168 Glen Street in Somerville, Massachusetts. Prior to sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at <http://www.mass.gov/eea/agencies/massdep/cleanup>. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See <http://public.dep.state.ma.us/SearchableSites2/Search.aspx> to view site-specific files on-line or <http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html> if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Project 045163

Mr. Martin Kwok
166-168 Glen Street
Somerville, MA 02143

**Re: Indoor Air Sampling Results
166-168 Glen Street, Somerville, Massachusetts**

Dear Mr. Kwok:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on February 21, 2025, at your property at 166-168 Glen Street to evaluate the potential for vapor intrusion.

On February 21, 2025, one indoor air sample was collected in the basement and one sample was collected on the first floor. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in two samples. Concentrations of PCE were detected at 1.12 micrograms per meter cubed ($\mu\text{g}/\text{m}^3$) on the first floor and 0.407 $\mu\text{g}/\text{m}^3$ in the basement. Trans-1,2-dichloroethylene (trans-1,2-DCE) was detected in the basement sample at a concentration of 0.230 $\mu\text{g}/\text{m}^3$.

The detected indoor air concentrations are below the applicable MassDEP residential and commercial indoor air threshold values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m³ = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. EPMM = Exposure Pathway Mitigation Measure.
5. NT= Not tested
6. Highlighted sample indicates most recent sampling round.

Qualifying Note:

J The reported result is below the laboratory reporting limit and is estimated.

Table B-1. Correspondence Tracking
Phase V Status Report No. 28 and Remedial Monitoring Report No. 43
Residential and Commercial Properties
Somerville, Massachusetts

Property	Date	Communication
84 Franklin Street	March and April 2025	Mailed certified letters regarding environmental conditions
	April 28, 2025	Email from homeowner following up on GEI's previous correspondence. GEI and homeowner scheduled sampling for May 6, 2025.
	June 16, 2025	Email from homeowner requesting results from sampling, GEI provided the following day.
91-93 Franklin Street	February 2025	Email to contact to schedule indoor air sampling.
	February 2025	Letter to homeowner for notification of sampling.
	April 2025	Mailed letter to homeowner with sampling data results.
95R Franklin Street	March 26, 2025	Followup from property management about previous letters GEI has mailed
97 Franklin Street	February 14, 2025	GEI left a voicemail to schedule indoor air and soil vapor sampling
	April 4, 2025	Mailed letter to homeowner with sampling data results.
166-168 Glen Street	February 14, 2025	Email with homeowner to schedule indoor air sampling
	April 3, 2025	Email correspondence with indoor air sampling results letter
9 Knowlton Street	April 2025	Email correspondence with homeowner regarding EPMM.
17 Knowlton Street	February 20, 2025	Email with homeowner to schedule sampling
	April 4, 2025	Email correspondence with indoor air sampling results letter
32 Knowlton Street	February 21, 2025	Phone call to schedule indoor air sampling
	April 4, 2025	Mailed indoor air sampling results letter
34 Knowlton Street	February 14, 2025	Phone call to schedule indoor air sampling
	February 26, 2025	Homeowner email response to request for vapor pin installation. Agreed to not install the vapor pin at the homeowner request.
	March 24, 2025	Email to schedule resample due to ambient indoor air canister
	April 15, 2025	Email correspondence with indoor air sampling results letter
35-37 Knowlton Street	February 28, 2025	Email to schedule site visit to locate radio node location after renovation
	March 18, 2025	Follow up phone call about node installation
10 Morton Street	Monthly, 2025	Emails and phone communication with homeowner to discuss renovation schedule, site walks, and sampling coordination.
11 Morton Street	February 2025	Emails with homeowner to schedule sampling
	April 3, 2025	Email with homeowner to schedule sampling
	April 30, 2025	Email with homeowner to schedule followup IA sampling and confirmation
	June 25, 2025	GEI email with results and request for phone call
13 Morton Street	February 22, 2025	Email request to measure sump pit in basement
	May 14, 2025	Email to schedule basement repairs, and homeowner request for later in summer due to absence
19-19A Morton Street	February 19, 2025	Email with homeowner to schedule indoor air sampling and coordination with tenants
	April 4, 2025	Email correspondence with indoor air sampling results letter
21 Morton Street	February 12, 2025	Email to schedule indoor air sampling and soil vapor point installation
	March 27, 2025	Email correspondence with indoor air sampling results letter
31 Tufts Street	January 31, 2025	Email to schedule indoor air sampling and closing the vent one week prior, also provided data from September sampling event at owner request
	April 4, 2025	Email correspondence with indoor air sampling results letter and follow-up question/answer on results from owner
103 Washington Street	January 6, 2025	Email request for indoor air sampling results collected in December 2024.
	January 10, 2025	GEI provided indoor air and soil vapor sampling results via email.
	January 27, 2025	Email correspondence to schedule additional sampling at 105 and 103 Washington Street
	February 3, 2025	GEI email response to question about "partial release" referring to the Partial Permanent Solution Statement being prepared for the property.
	February 19, 2025	Email to schedule follow up sampling due to faulty indoor air canister
	March 14, 2025	Email correspondence with indoor air and soil vapor sampling results letter
	June 13, 2025	Request from owner on update for PPSS, GEI email response that it was filed that day.
105-107 Washington Street	January 27, 2025	Email correspondence to schedule additional sampling at 105 and 103 Washington Street
	March 14, 2025	Email correspondence with indoor air and soil vapor sampling results letter
121 Washington Street	Monthly, 2025	Emails and phone communication with developer's site supervisor to discuss renovation schedule, site walks, and sampling coordination.

General Notes:

1. EPMM = Exposure Pathway Mitigation Measure.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.

Gray shading indicates nondetect detection limit is above one or more of the listed criteria.

Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.

² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.

Gray shading indicates nondetect detection limit is above one or more of the listed criteria.

Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.

² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.

Gray shading indicates nondetect detection limit is above one or more of the listed criteria.

Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.

² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.

Gray shading indicates nondetect detection limit is above one or more of the listed criteria.

Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.

² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.

Gray shading indicates nondetect detection limit is above one or more of the listed criteria.

Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.

² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.

Gray shading indicates nondetect detection limit is above one or more of the listed criteria.

Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.
² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.
Gray shading indicates nondetect detection limit is above one or more of the listed criteria.
Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

- U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- ¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.
- ² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.
Gray shading indicates nondetect detection limit is above one or more of the listed criteria.
Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.
² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.
Gray shading indicates nondetect detection limit is above one or more of the listed criteria.
Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.
² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.
Gray shading indicates nondetect detection limit is above one or more of the listed criteria.
Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.
² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.
Gray shading indicates nondetect detection limit is above one or more of the listed criteria.
Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.
² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria.
Gray shading indicates nondetect detection limit is above one or more of the listed criteria.
Bold typeface indicates detection above metiond detection limit.

MA-LLAND: Lined Landfill Limits current as of August, 1997
MA-ULAND: UnLined Landfill Limits current as of August, 1997
RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.
² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.
MCP 2014 S-1 Cleanup Criteria effective April 25, 2014; the lowest S-1/GW-X standard is shown.
**EPA-TCLP: EPA Toxicity Characteristic (TCLP) Regulatory Levels Criteria per 40CFR Part 261 as of September 10, 2015.

U - Not detected at the reported detection limit for the sample.
ND - Not detected.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
¹ - The laboratory reported two sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results and lowest detection limits have been tabulated. Refer to laboratory report for further detail.
² - The laboratory reported three sets of VOC results due to internal standard and/or surrogate nonconformances.
The highest detected results from the low-level analysis and detection limits from the high-level analysis have been tabulated due to significant internal standard issues with the low-level analysis. Refer to laboratory report for further detail.

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

mg/L - milligrams per liter.

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

E - Value exceeds calibration range.

I - The lower value for the two columns has been reported due to obvious interference.

NA - Sample not analyzed for the listed analyte.

N/A - Not available/applicable.

ND - Not detected.

NI - Not ignitable.

NS - No MassDEP standards exist for this analyte.

P - The RPD (relative percent difference) between the results for the two columns exceeds the method-specified criteria.

U - Analyte was not detected at specified quantitation limit.

Values in **bold** indicate the analyte was detected.

Values shown in bold and shaded type are equal to RCS-1 or exceed one or more of the listed MassDEP standards/criteria.

VOCs - Volatile Organic Compounds.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

TPH - Total Petroleum Hydrocarbons.

TCLP - Toxicity Characteristic Leaching Procedure.

RC - Reportable concentration.

* - EPA SW-846 Chapter 7, Table 7-1, Maximum Concentration of Contaminants for Toxicity Characteristic.

** - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

^ - Sample depth for other/VOCs analysis; otherwise for all the analyses.

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

mg/L - milligrams per liter.

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

E - Value exceeds calibration range.

I - The lower value for the two columns has been reported due to obvious interference.

NA - Sample not analyzed for the listed analyte.

N/A - Not available/applicable.

ND - Not detected.

NI - Not ignitable.

NS - No MassDEP standards exist for this analyte.

P - The RPD (relative percent difference) between the results for the two columns exceeds the method-specified criteria.

U - Analyte was not detected at specified quantitation limit.

Values in **bold** indicate the analyte was detected.

Values shown in bold and shaded type are equal to RCS-1 or exceed one or more of the listed MassDEP standards/criteria.

VOCs - Volatile Organic Compounds.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

TPH - Total Petroleum Hydrocarbons.

TCLP - Toxicity Characteristic Leaching Procedure.

RC - Reportable concentration.

* - EPA SW-846 Chapter 7, Table 7-1, Maximum Concentration of Contaminants for Toxicity Characteristic.

** - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

^ - Sample depth for other/VOCs analysis; otherwise for all the analyses.

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

mg/L - milligrams per liter.

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

E - Value exceeds calibration range.

I - The lower value for the two columns has been reported due to obvious interference.

NA - Sample not analyzed for the listed analyte.

N/A - Not available/applicable.

ND - Not detected.

NI - Not ignitable.

NS - No MassDEP standards exist for this analyte.

P - The RPD (relative percent difference) between the results for the two columns exceeds the method-specified criteria.

U - Analyte was not detected at specified quantitation limit.

Values in **bold** indicate the analyte was detected.

Values shown in bold and shaded type are equal to RCS-1 or exceed one or more of the listed MassDEP standards/criteria.

VOCs - Volatile Organic Compounds.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

TPH - Total Petroleum Hydrocarbons.

TCLP - Toxicity Characteristic Leaching Procedure.

RC - Reportable concentration.

* - EPA SW-846 Chapter 7, Table 7-1, Maximum Concentration of Contaminants for Toxicity Characteristic.

** - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

^ - Sample depth for other/VOCs analysis; otherwise for all the analyses.

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

mg/L - milligrams per liter.

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

E - Value exceeds calibration range.

I - The lower value for the two columns has been reported due to obvious interference.

NA - Sample not analyzed for the listed analyte.

N/A - Not available/applicable.

ND - Not detected.

NI - Not ignitable.

NS - No MassDEP standards exist for this analyte.

P - The RPD (relative percent difference) between the results for the two columns exceeds the method-specified criteria.

U - Analyte was not detected at specified quantitation limit.

Values in **bold** indicate the analyte was detected.

Values shown in bold and shaded type are equal to RCS-1 or exceed one or more of the listed MassDEP standards/criteria.

VOCs - Volatile Organic Compounds.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

TPH - Total Petroleum Hydrocarbons.

TCLP - Toxicity Characteristic Leaching Procedure.

RC - Reportable concentration.

* - EPA SW-846 Chapter 7, Table 7-1, Maximum Concentration of Contaminants for Toxicity Characteristic.

** - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

^ - Sample depth for other/VOCs analysis; otherwise for all the analyses.

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

mg/L - milligrams per liter.

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

E - Value exceeds calibration range.

I - The lower value for the two columns has been reported due to obvious interference.

NA - Sample not analyzed for the listed analyte.

N/A - Not available/applicable.

ND - Not detected.

NI - Not ignitable.

NS - No MassDEP standards exist for this analyte.

P - The RPD (relative percent difference) between the results for the two columns exceeds the method-specified criteria.

U - Analyte was not detected at specified quantitation limit.

Values in **bold** indicate the analyte was detected.

Values shown in bold and shaded type are equal to RCS-1 or exceed one or more of the listed MassDEP standards/criteria.

VOCs - Volatile Organic Compounds.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

TPH - Total Petroleum Hydrocarbons.

TCLP - Toxicity Characteristic Leaching Procedure.

RC - Reportable concentration.

* - EPA SW-846 Chapter 7, Table 7-1, Maximum Concentration of Contaminants for Toxicity Characteristic.

** - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

^ - Sample depth for other/VOCs analysis; otherwise for all the analyses.

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

mg/L - milligrams per liter.

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

E - Value exceeds calibration range.

I - The lower value for the two columns has been reported due to obvious interference.

NA - Sample not analyzed for the listed analyte.

N/A - Not available/applicable.

ND - Not detected.

NI - Not ignitable.

NS - No MassDEP standards exist for this analyte.

P - The RPD (relative percent difference) between the results for the two columns exceeds the method-specified criteria.

U - Analyte was not detected at specified quantitation limit.

Values in **bold** indicate the analyte was detected.

Values shown in bold and shaded type are equal to RCS-1 or exceed one or more of the listed MassDEP standards/criteria.

VOCs - Volatile Organic Compounds.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

TPH - Total Petroleum Hydrocarbons.

TCLP - Toxicity Characteristic Leaching Procedure.

RC - Reportable concentration.

* - EPA SW-846 Chapter 7, Table 7-1, Maximum Concentration of Contaminants for Toxicity Characteristic.

** - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

^ - Sample depth for other/VOCs analysis; otherwise for all the analyses.

	Reactive Cyanide	mg/kg	NS	< 250	< 250	NA		10	U	10	U
	Reactive Sulfide	mg/kg	NS	< 500	< 500	NA		10	U	10	U

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

mg/L - milligrams per liter.

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

E - Value exceeds calibration range.

NA - Sample not analyzed for the listed analyte.

N/A - Not available/applicable.

ND - Not detected.

NI - Not ignitable.

NS - No MassDEP standards exist for this analyte.

U - Analyte was not detected at specified quantitation limit.

Values in **bold** indicate the analyte was detected.

VOCs - Volatile Organic Compounds.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

RC - Reportable Concentration.

TPH - Total Petroleum Hydrocarbons.

* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

^ - Sample depth for other/VOCs analysis; otherwise for all the analyses.

(1) - MassDEP RC for C9-C10 aromatics used.

(2) - MassDEP RC for Dichloropropene used.

(3) - MassDEP RC for Dichloropropane used.

(4) - MassDEP RC for Chlorotoluene used.

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

U - Not detected at the reported detection limit for the sample.

- Not analyzed.

(1) - Value for C9-C10 aromatics used.

(2) -Value for 1,3-Dichloropropene used.

(3) - Criteria applicable to xylene (total), the sum of the xylene isomers.

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

U - Not detected at the reported detection limit for the sample.

- Not analyzed.

(1) - Value for C9-C10 aromatics used.

(2) - Value for 1,3-Dichloropropene used.

(3) - Criteria applicable to xylene (total), the sum of the xylene isomers.

1,4-Dioxane	123-91-1	0.2	6	20	mg/kg	0.071	U	0.062	U

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

U - Not detected at the reported detection limit for the sample.

- Not analyzed.

(1) - Value for C9-C10 aromatics used.

(2) - Value for 1,3-Dichloropropene used.

(3) - Criteria applicable to xylene (total), the sum of the xylene isomers.

	Sulfide, Reactive	mg/kg	NS	NS	NS	10	U	NA		10	U	NA	
	Ignitability		NS	NS	NS	NI		NA		NI		NA	

Notes:
mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).
su - Standard unit.
umhos/cm - Micro-mhos per centimeter.
I - The lower value for the two columns has been reported due to obvious interference.
ND - Not detected.
NI - Not ignitable.
NA - Sample not analyzed for the listed analyte.
NS - No MassDEP standards exist for this analyte.
P - The relative percent difference (RPD) between the results for the two columns exceeds the method-specified criteria.
U - Analyte was not detected at specified quantitation limit.
Values in **bold** indicate the analyte was detected.
VOCs - Volatile Organic Compounds.
SVOCs - Semivolatile Organic Compounds.
PCBs - Polychlorinated Biphenyls.
TPH - Total Petroleum Hydrocarbons.
RC - Reportable concentration.
(1) - MassDEP RC for C9-C10 aromatics used.
(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.
(3) - MassDEP RC for Dichloropropane used.
(4) - MassDEP RC for Dichloropropene used.
(5) - MassDEP RC for Chlorotoluene used.
* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

	Ignitability		NS	NS	NS	NI		NA		NI		NA	

Notes:
mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).
su - Standard unit.
umhos/cm - Micro-mhos per centimeter.
I - The lower value for the two columns has been reported due to obvious interference.
ND - Not detected.
NI - Not ignitable.
NA - Sample not analyzed for the listed analyte.
NS - No MassDEP standards exist for this analyte.
P - The relative percent difference (RPD) between the results for the two columns exceeds the method-specified criteria.
U - Analyte was not detected at specified quantitation limit.
Values in **bold** indicate the analyte was detected.
VOCs - Volatile Organic Compounds.
SVOCs - Semivolatile Organic Compounds.
PCBs - Polychlorinated Biphenyls.
TPH - Total Petroleum Hydrocarbons.
RC - Reportable concentration.
(1) - MassDEP RC for C9-C10 aromatics used.
(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.
(3) - MassDEP RC for Dichloropropane used.
(4) - MassDEP RC for Dichloropropene used.
(5) - MassDEP RC for Chlorotoluene used.
* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

	Ignitability		NS	NS	NS	NI		NA		NI		NA	

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

I - The lower value for the two columns has been reported due to obvious interference.

ND - Not detected.

NI - Not ignitable.

NA - Sample not analyzed for the listed analyte.

NS - No MassDEP standards exist for this analyte.

P - The relative percent difference (RPD) between the results for the two columns exceeds the method-specified criteria.

U - Analyte was not detected at specified quantitation limit.

Values in **bold** indicate the analyte was detected.

VOCs - Volatile Organic Compounds.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

TPH - Total Petroleum Hydrocarbons.

RC - Reportable concentration.

(1) - MassDEP RC for C9-C10 aromatics used.

(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.

(3) - MassDEP RC for Dichloropropane used.

(4) - MassDEP RC for Dichloropropene used.

(5) - MassDEP RC for Chlorotoluene used.

* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

Notes:
mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).
su - Standard unit.
umhos/cm - Micro-mhos per centimeter.
I - The lower value for the two columns has been reported due to obvious interference.
ND - Not detected.
NI - Not ignitable.
NA - Sample not analyzed for the listed analyte.
NS - No MassDEP standards exist for this analyte.
P - The relative percent difference (RPD) between the results for the two columns exceeds the method-specified criteria.
U - Analyte was not detected at specified quantitation limit.
Values in **bold** indicate the analyte was detected.
VOCs - Volatile Organic Compounds.
SVOCs - Semivolatile Organic Compounds.
PCBs - Polychlorinated Biphenyls.
TPH - Total Petroleum Hydrocarbons.
RC - Reportable concentration.
(1) - MassDEP RC for C9-C10 aromatics used.
(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.
(3) - MassDEP RC for Dichloropropane used.
(4) - MassDEP RC for Dichloropropene used.
(5) - MassDEP RC for Chlorotoluene used.
* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

	pH	SU	NS	NS	NS	7.8		NA		8		NA	
	Cyanide, Reactive	mg/kg	NS	NS	NS	10	U	NA		10	U	NA	
	Sulfide, Reactive	mg/kg	NS	NS	NS	10	U	NA		10	U	NA	
	Ignitability		NS	NS	NS	NI		NA		NI		NA	

Notes:
mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).
su - Standard unit.
umhos/cm - Micro-mhos per centimeter.
I - The lower value for the two columns has been reported due to obvious interference.
ND - Not detected.
NI - Not ignitable.
NA - Sample not analyzed for the listed analyte.
NS - No MassDEP standards exist for this analyte.
P - The relative percent difference (RPD) between the results for the two columns exceeds the method-specified criteria.
U - Analyte was not detected at specified quantitation limit.
Values in **bold** indicate the analyte was detected.
VOCs - Volatile Organic Compounds.
SVOCs - Semivolatile Organic Compounds.
PCBs - Polychlorinated Biphenyls.
TPH - Total Petroleum Hydrocarbons.
RC - Reportable concentration.
(1) - MassDEP RC for C9-C10 aromatics used.
(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.
(3) - MassDEP RC for Dichloropropane used.
(4) - MassDEP RC for Dichloropropene used.
(5) - MassDEP RC for Chlorotoluene used.
* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

	Ignitability		NS	NS	NS	NI		NA		NI		NA	

Notes:
mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).
su - Standard unit.
umhos/cm - Micro-mhos per centimeter.
I - The lower value for the two columns has been reported due to obvious interference.
ND - Not detected.
NI - Not ignitable.
NA - Sample not analyzed for the listed analyte.
NS - No MassDEP standards exist for this analyte.
P - The relative percent difference (RPD) between the results for the two columns exceeds the method-specified criteria.
U - Analyte was not detected at specified quantitation limit.
Values in **bold** indicate the analyte was detected.
VOCs - Volatile Organic Compounds.
SVOCs - Semivolatile Organic Compounds.
PCBs - Polychlorinated Biphenyls.
TPH - Total Petroleum Hydrocarbons.
RC - Reportable concentration.
(1) - MassDEP RC for C9-C10 aromatics used.
(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.
(3) - MassDEP RC for Dichloropropane used.
(4) - MassDEP RC for Dichloropropene used.
(5) - MassDEP RC for Chlorotoluene used.
* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

	Ignitability		NS	NS	NS	NI		NA		NI		NA	

Notes:
mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).
su - Standard unit.
umhos/cm - Micro-mhos per centimeter.
I - The lower value for the two columns has been reported due to obvious interference.
ND - Not detected.
NI - Not ignitable.
NA - Sample not analyzed for the listed analyte.
NS - No MassDEP standards exist for this analyte.
P - The relative percent difference (RPD) between the results for the two columns exceeds the method-specified criteria.
U - Analyte was not detected at specified quantitation limit.
Values in **bold** indicate the analyte was detected.
VOCs - Volatile Organic Compounds.
SVOCs - Semivolatile Organic Compounds.
PCBs - Polychlorinated Biphenyls.
TPH - Total Petroleum Hydrocarbons.
RC - Reportable concentration.
(1) - MassDEP RC for C9-C10 aromatics used.
(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.
(3) - MassDEP RC for Dichloropropane used.
(4) - MassDEP RC for Dichloropropene used.
(5) - MassDEP RC for Chlorotoluene used.
* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

	Sulfide, Reactive	mg/kg	NS	NS	NS	10	U	NA		10	U	NA	
	Ignitability		NS	NS	NS	NI		NA		NI		NA	

Notes:
mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).
su - Standard unit.
umhos/cm - Micro-mhos per centimeter.
I - The lower value for the two columns has been reported due to obvious interference.
ND - Not detected.
NI - Not ignitable.
NA - Sample not analyzed for the listed analyte.
NS - No MassDEP standards exist for this analyte.
P - The relative percent difference (RPD) between the results for the two columns exceeds the method-specified criteria.
U - Analyte was not detected at specified quantitation limit.
Values in **bold** indicate the analyte was detected.
VOCs - Volatile Organic Compounds.
SVOCs - Semivolatile Organic Compounds.
PCBs - Polychlorinated Biphenyls.
TPH - Total Petroleum Hydrocarbons.
RC - Reportable concentration.
(1) - MassDEP RC for C9-C10 aromatics used.
(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.
(3) - MassDEP RC for Dichloropropane used.
(4) - MassDEP RC for Dichloropropene used.
(5) - MassDEP RC for Chlorotoluene used.
* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

	Ignitability		NS	NS	NS	NI		NA		NI		NA	

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

I - The lower value for the two columns has been reported due to obvious interference.

ND - Not detected.

NI - Not ignitable.

NA - Sample not analyzed for the listed analyte.

NS - No MassDEP standards exist for this analyte.

P - The relative percent difference (RPD) between the results for the two columns exceeds the method-specified criteria.

U - Analyte was not detected at specified quantitation limit.

Values in **bold** indicate the analyte was detected.

VOCs - Volatile Organic Compounds.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

TPH - Total Petroleum Hydrocarbons.

RC - Reportable concentration.

(1) - MassDEP RC for C9-C10 aromatics used.

(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.

(3) - MassDEP RC for Dichloropropane used.

(4) - MassDEP RC for Dichloropropene used.

(5) - MassDEP RC for Chlorotoluene used.

* - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

Notes:

mg/kg - milligrams per kilogram (dry weight) or parts per million (ppm).

mg/L - milligrams per liter.

su - Standard unit.

umhos/cm - Micro-mhos per centimeter.

1 - The lower value for the two columns has been reported due to obvious interference.

NA - Sample not analyzed for the listed analyte.

N/A - Not applicable/available.

NI - Not ignitable.

NS - No MassDEP standards exist for this analyte.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

U - Analyte was not detected at specified quantitation limit.

Values in bold indicate the analyte was detected.

Values shown in bold and shaded type exceed one or more of the listed MassDEP standards/criteria.

VOCs - Volatile Organic Compounds.

** - Reuse and Disposal of Contaminated Soil at Massachusetts Landfills, MassDEP Policy # COMM-97-001, August 1997.

** - EPA SW-846 Chapter 7, Table 7-1, Maximum Concentration of Contaminants for Toxicity Characteristic.

SVOCs - Semivolatile Organic Compounds.

PCBs - Polychlorinated Biphenyls.

RC - Reportable concentration.

TPH - Total Petroleum Hydrocarbons.

(1) - Value for C9-C10 aromatic used.

(2) - Criteria applicable to xylene (total), the sum of the xylene isomers.

(3) - Value for Dichloropropane used.

(4) - Value for Dichloropropene used.

(5) - Value for Chlorobenzene used.

< - Sample name for Other/VOC analysis.

<> - Lab Sample ID for Other/VOC/TCLP analysis; otherwise Lab Sample ID applied to Other/VOC analysis.

Yellow shading indicates detected result is equal to or above one or more of the listed criteria, except for MA Background Level Natural soil.

Gray shading indicates nondetect detection limit is above one or more of the listed criteria, except for MA Background Level Natural soil.

RCS-1-14: MCP 2014 RCS-1 Reportable Concentrations Criteria effective April 25, 2014.

RCS-2-14: MCP 2014 RCS-2 Reportable Concentrations Criteria effective April 25, 2014.

BUD-S3/G3: MassDEP Proposed S3, GW-3 Beneficial Use Determination (BUD) Values Criteria per Draft Interim Guidance Document effective March 18, 2004.

MA-BLNS: Background Level Natural soil current as of 10/24/07

MA-LLAND: Lined Landfill Limits current as of August, 1997

MA-ULAND: UnLined Landfill Limits current as of August, 1997

TRC-SSSR-GLX: Site Specific Soil Reuse Criteria: Vehicle Maintenance Facility for GLX Project Criteria per client-provided Table X February 21, 2018.

Saugus: Acceptance Criteria for Aggregate Industries - Saugus Quarry, Table 1.

U - Not detected at the reported detection limit for the sample.

J - Estimated value.

MADEP MCP Response Action Analytical Report Certification

This form provides certifications for all samples performed by MCP methods. Please refer to the Sample Results and Container Information sections of this report for specification of MCP methods used for each analysis. The following questions pertain only to MCP Analytical Methods.

An affirmative response to questions A through F is required for "Presumptive Certainty" status		
A	Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times?	YES
B	Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed?	YES
C	Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances?	YES
D	Does the laboratory report comply with all the reporting requirements specified in CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data?"	YES
E a.	VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications).	N/A
E b.	APH and TO-15 Methods only: Was the complete analyte list reported for each method?	N/A
F	Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)?	YES
A response to questions G, H and I is required for "Presumptive Certainty" status		
G	Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocol(s)?	NO
H	Were all QC performance standards specified in the CAM protocol(s) achieved?	NO
I	Were results reported for the complete analyte list specified in the selected CAM protocol(s)?	YES
For any questions answered "No", please refer to the case narrative section on the following page(s).		

Please note that sample matrix information is located in the Sample Results section of this report.

Project Name: TUFTS STREET
Project Number: 045163

Lab Number: L2503615
Report Date: 01/27/25

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Pace Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments and solids are reported on a dry weight basis unless otherwise noted. Tissues are reported "as received" or on a wet weight basis, unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Pace's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Pace Project Manager and made arrangements for Pace to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

MCP Related Narratives

Volatile Organics

In reference to question G:

L2503615-02D: One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

L2503615-01, -02D, and -03: Initial Calibration did not meet:

Lowest Calibration Standard Minimum Response Factor: 1,4-dioxane (0.002), 1,1,2-trichloroethane (0.1858)

Average Response Factor: 1,4-dioxane, 1,1,2-trichloroethane

L2503615-01, -02D, and -03: The associated continuing calibration standard is outside the acceptance criteria for several compounds; however, it is within overall method allowances. Associated results are considered to be biased high if the %D is negative and biased low if the %D is positive. A copy of the continuing calibration standard is included as an addendum to this report.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: Data Usability Report

Project Name: TUFTS STREET
Project Number: 045163

Lab Number: L2503615
Report Date: 01/27/25

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA, this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- F** - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

Report Format: Data Usability Report

Project Name: TUFTS STREET
Project Number: 045163

Lab Number: L2503615
Report Date: 01/27/25

Data Qualifiers

- ND** - Not detected at the reporting limit (RL) for the sample.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- V** - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)
- Z** - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Pace Analytical Services performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Pace Analytical Services shall be to re-perform the work at it's own expense. In no event shall Pace Analytical Services be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Pace Analytical Services.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

MADEP MCP Response Action Analytical Report Certification

This form provides certifications for all samples performed by MCP methods. Please refer to the Sample Results and Container Information sections of this report for specification of MCP methods used for each analysis. The following questions pertain only to MCP Analytical Methods.

An affirmative response to questions A through F is required for "Presumptive Certainty" status		
A	Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times?	YES
B	Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed?	YES
C	Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances?	YES
D	Does the laboratory report comply with all the reporting requirements specified in CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data?"	YES
E a.	VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications).	N/A
E b.	APH and TO-15 Methods only: Was the complete analyte list reported for each method?	N/A
F	Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)?	YES
A response to questions G, H and I is required for "Presumptive Certainty" status		
G	Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocol(s)?	YES
H	Were all QC performance standards specified in the CAM protocol(s) achieved?	NO
I	Were results reported for the complete analyte list specified in the selected CAM protocol(s)?	YES
For any questions answered "No", please refer to the case narrative section on the following page(s).		

Please note that sample matrix information is located in the Sample Results section of this report.

Project Name: TUFTS STREET
Project Number: 045163

Lab Number: L2513286
Report Date: 03/17/25

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Pace Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments and solids are reported on a dry weight basis unless otherwise noted. Tissues are reported "as received" or on a wet weight basis, unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Pace's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Pace Project Manager and made arrangements for Pace to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Volatile Organics

In reference to question H:

L2513286-01: Initial Calibration did not meet:

Lowest Calibration Standard Minimum Response Factor: 1,4-dioxane (0.0019)

Average Response Factor: 1,4-dioxane

Verification: dichlorodifluoromethane (136%)

L2513286-01: The associated continuing calibration standard is outside the acceptance criteria for three compounds; however, it is within overall method allowances. Associated results are considered to be biased high if the %D is negative and biased low if the %D is positive. A copy of the continuing calibration standard is included as an addendum to this report.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
	Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: Data Usability Report

Project Number: 045163

Lab Number: L2513286
Report Date: 03/17/25

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA, this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- F** - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

Report Format: Data Usability Report

Project Name: TUFTS STREET
Project Number: 045163

Lab Number: L2513286
Report Date: 03/17/25

Data Qualifiers

- ND** - Not detected at the reporting limit (RL) for the sample.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- V** - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)
- Z** - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Pace Analytical Services performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Pace Analytical Services shall be to re-perform the work at it's own expense. In no event shall Pace Analytical Services be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Pace Analytical Services.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

MADEP MCP Response Action Analytical Report Certification

This form provides certifications for all samples performed by MCP methods. Please refer to the Sample Results and Container Information sections of this report for specification of MCP methods used for each analysis. The following questions pertain only to MCP Analytical Methods.

An affirmative response to questions A through F is required for "Presumptive Certainty" status		
A	Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times?	YES
B	Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed?	YES
C	Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances?	YES
D	Does the laboratory report comply with all the reporting requirements specified in CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data?"	YES
E a.	VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications).	N/A
E b.	APH and TO-15 Methods only: Was the complete analyte list reported for each method?	N/A
F	Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)?	YES
A response to questions G, H and I is required for "Presumptive Certainty" status		
G	Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocol(s)?	NO
H	Were all QC performance standards specified in the CAM protocol(s) achieved?	NO
I	Were results reported for the complete analyte list specified in the selected CAM protocol(s)?	YES
For any questions answered "No", please refer to the case narrative section on the following page(s).		

Please note that sample matrix information is located in the Sample Results section of this report.

Project Name: TUFTS STREET
Project Number: 045163

Lab Number: L2516183
Report Date: 03/27/25

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Pace Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments and solids are reported on a dry weight basis unless otherwise noted. Tissues are reported "as received" or on a wet weight basis, unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Pace's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Pace Project Manager and made arrangements for Pace to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Report Date: 03/27/25

Case Narrative (continued)

MCP Related Narratives

Volatile Organics

L2516183-03D: A copy of the continuing calibration standard is included as an addendum to this report.

In reference to question G:

L2516183-01D, -02D, and -03D: One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

L2516183-01D, -02D, -04, and -05: Initial Calibration did not meet:

Lowest Calibration Standard Minimum Response Factor: 1,4-dioxane (0.0019)

Average Response Factor: 1,4-dioxane

Verification: dichlorodifluoromethane (136%)

L2516183-03D: Initial Calibration did not meet:

Lowest Calibration Standard Minimum Response Factor: bromodichloromethane (0.2427), 1,4-dioxane (0.0016)

Average Response Factor: bromodichloromethane, 1,4-dioxane

L2516183-01D, -02D, -04, and -05: The associated continuing calibration standard is outside the acceptance criteria for several compounds; however, it is within overall method allowances. Associated results are considered to be biased high if the %D is negative and biased low if the %D is positive. A copy of the continuing calibration standard is included as an addendum to this report.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
	Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: Data Usability Report

Project Name: TUFTS STREET
Project Number: 045163

Lab Number: L2516183
Report Date: 03/27/25

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA, this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- F** - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

Report Format: Data Usability Report

Project Name: TUFTS STREET
Project Number: 045163

Lab Number: L2516183
Report Date: 03/27/25

Data Qualifiers

- ND** - Not detected at the reporting limit (RL) for the sample.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- V** - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)
- Z** - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Pace Analytical Services performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Pace Analytical Services shall be to re-perform the work at it's own expense. In no event shall Pace Analytical Services be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Pace Analytical Services.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.
